2023-12-13| Tempo Timesheets 17.0.0 Release

This **version 17.0.0 of Tempo Timesheets** is compatible with **Atlassian's Jira 9.x** platform. This version improves the experience of removing users from a team.

1 Timesheets logo

WHAT'S NEW

- We've made it easier to remove users from a team without losing any of their data. When you remove a member from a team, in addition to permanently deleting a user from the team, which can impact financial and reporting information, you now have the option of disabling the user, which will not affect their financial or reporting information. This does not impact the user's membership in other teams. Learn more: [Removing Members from a Team](#)¹
- Fixed issue related to logging time with keyboard shortcut
- Fixed issue related to issues fetched by the account custom budget burn-up chart
- Fixed bug that occurred when deleting a board in the Team page

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)² to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³ (UPM).

2023-10-19 | Tempo Timesheets and Custom Charts for Jira

When installed, **Custom Charts for Jira**, version 5.5.1, allows you to seamlessly visualize time-tracking data from **Timesheets** using **Custom Charts**.

2 Timesheets logo

WHAT'S NEW

- When you install **Custom Charts for Jira**, version 5.5.1, you can report on **Timesheets** data in **Custom Charts**⁵. This integration allows you to:
 - Use **Custom Charts**' dashboards and charts to visualize time tracking data from **Timesheets**, such as comparing the estimated time spent by the worklog author on an issue against the actual time spent.
 - Report on more granular time data using specific dates, such as calculating charts based on work logged within the last week.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)**⁶ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo. The deprecated code will be removed in our October release.

2023-03-21| Tempo Timesheets for Server 16.4.0 Release

This **version 16.4.0 of Tempo Timesheets** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed an issue in **Tempo > My Work** page that now navigates to the correct user's page while approving timesheets.
- Fixed an issue that the worklogs don't appear when logged directly in the epic.
- Fixed a broken **Learn More** link in **Settings > Work Attributes > Configure API URL**.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)³⁴ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³⁵ (UPM).

2022-10-18| Tempo Timesheets for Server 16.0.0 Release

We've released **version 16.0.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes and improvements.

- The option to export to PDF in '**Export to PDF**' and '**Download Account Report PDFs**' is removed due to security reasons. See the [KB article](#)⁴⁶ for workaround options.
- The deprecated `WorkAttributeValueService.getWorkAttributeValueById()` method is removed. See the [Server Code Deprecation and Removal page](#)⁴⁷.
- The deprecated `WorkAttributeValueService.getWorkAttributeValueById()` method is removed. See the [Server Code Deprecation and Removal page](#)⁴⁸.

FIXES

- Fixed: Problems are encountered when generating reports for worklogs with multiple accounts.
- Fixed: The User Timesheets Gadget keeps loading when editing and selecting a different user.

IMPROVEMENTS

- Improved: Email notifications are added to supported languages: German, Spanish, Portuguese, French, Russian and Chinese.
- Improved: Added a query param that acts as a toggle for worklog-related event dispatching, allowing customers to disable it.

2022-02-15| Tempo Timesheets for Server 15.4.0 Release

This **version 15.4.0 of Tempo Timesheets** is compatible with **Atlassian's Jira 8.x** platform.

FIXES

- Team members joined on the last day of the month is not shown in **Teams > Utilization** tab.
- **My Work** in timesheet view does not update total hours when changing worklog to a date outside the period.
- Deleted users with no user key preventing collaborators module to render correctly. Worklogs without an author key, will not be considered in the collaborators module.
- Logged time report exports to excel user which is not in filtered location.
- Unauthorized user cannot see worklog approvals.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)⁸⁵ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-12-07| Tempo Timesheets for Server 15.2.0 Release

This **version 15.2.0 of Tempo Timesheets** is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

FIXES

- Fixed: The Worklog Distribution Gadget is not rendering correctly.
- Fixed: Logging time from the issue view does not use the current time.
- Fixed: Logging time in a subtask does not show the inherited account from the parent task in reports.
- Fixed: Account PDF report does not open when logo is configured.
- Fixed: Logging time with work attributes result in errors.
- Fixed: Change server app key to resolve issue with server to cloud migration.

IMPROVEMENTS

- Unused account approval code is removed to improve report performance:
 - a. The 'Account Approval Status' column is removed from worklog exports
 - b. The (include=[ACCOUNT_APPROVAL]) in the Worklog API is no longer supported
- Improved loading time of worklog reports.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)⁹⁷ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-11-9| Tempo Timesheets for Server 15.1.0 Release

We've released **version 15.1.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version provides worklog limit for reports in API.

FIXES

- Fixed: A limit for the maximum worklogs is placed and notifies the user if the limit is exceeded.
- Fixed: Ability to enable or disable the export reports through API.
- Fixed: While filtering accounts by Category and the Archived status, JQL now shows the issues with the archived accounts.
- Fixed: Issue Lists with epic grouping are now displaying correctly.
- Fixed: Fixed issue related to account object that appears inside {} symbols.
- Fixed: Users can now select any combination of "Issue List" and "Group By" filters.

IMPROVEMENTS

- Improved the account inheritance of a cloned subtask.
- Account Category Types no longer duplicates after switching to German.

 Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹⁰³ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-10-19 | Tempo Timesheets for Server 15.0.1 Release

We've released **version 15.0.1 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version disables worklog reports and limits the worklog v4 base query to a number of worklogs to process.

This release adds capabilities intended for enterprise customers to limit the usage of worklog reporting related features. This can be used to limit the load on the system introduced by processing larger volumes of worklog data. [See KB article¹⁰⁹](#).

- **Disable worklog export**

A boolean flag is added to the global configuration REST API to hard disable the worklog report export. If disabled, the worklog reports shows an error message explaining the reason why the export cannot be used.

- **Limit the worklog query base count**

A number you can configure in the global configuration REST API to hard disable query processing of large volumes of data. If a number is configured, then the worklog v4 search engine blocks unsafe queries and shows an error message to the user explaining that the query is too large.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page¹¹⁰](#) to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-10-12 | Tempo Timesheets for Server 15.0.0 Release

We've released **version 15.0.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and an improvement.

Note that we have synchronized the version numbers of our products and restarted them at version 15.0.0 in this release. Tempo Timesheets moved from version 11.9.2 to 15.0.0 to comply with the updated numbering sequence.

FIXES

- Fixed: Unable to load Planned vs Actual report due to worklog search error.
- Fixed: Tempo's green icon is layered on top of Jira's menu when no time/planned hours or expenses are logged on Jira issues.
- Fixed: Subtasks that are without worklogs are not properly grouped under the parent issues.
- Fixed: Grouping the issue list in My Work by component or fix version causes a perpetual loading indicator.
- Fixed: The Worked and Remaining Estimate values are not displayed properly when edited.
- Removal notification: Previously deprecated private endpoint `/rest/tempo-core/1/work-attribute/value` is removed.
- Removal notification: Previously deprecated private endpoint `rest/tempo-core/1/users/search` is removed.
- Removal notification: Previously deprecated private endpoint `/tempo-rest/2.0/worklogs/{worklogId}/attributes` is removed.

IMPROVEMENT

- Improved: LDAP sync is faster in certain situations when using nested groups.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹¹³ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-09-14 | Tempo Timesheets for Server 11.9.0 Release

We've released **version 11.9.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes.

NOTE: The 'Issues List' and 'Group By' feature is restored in this 11.9.0 Server Release.

FIXES

- Fixed: The checkbox 'Include non-working days' is not shown when end date includes a non-working day.
- The 'Issue Lists' and 'Group by' features can be used simultaneously.
- Fixed: Timesheet approval hours are shown incorrectly in Approval Log and notification emails when on the edge of a period.
- Fixed: Log Time form stops working when 'End Date' field is cleared.
- Fixed: Error appearing in console.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹²² to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-07-13 | Tempo Timesheets for Server 11.7.0 Release

We've released **version 11.7.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

IMPROVEMENTS

- Approvers can now see the total number of hours they are approving even if they don't have the 'Browse Project' permission rights for all workload issues (Phase 1)
- Note: The next upcoming releases will include the rest of the updated screens (Phase 2)

FIXES

- Fixed: Changing the account of a Jira subtask from 'Inherited From Parent' to 'None' in Edit mode does not save the changes.
- Fixed: A team approver still appears for a user who is no longer an active team member.
- Fixed: The Timesheet Reviewer value is not synchronized with the updates from a Jira Nested Group.
- Fixed: The project link in the Dashboard's 'Planned time by team' gadget must be directed to 'Planned Time Report', when Planner is installed.
- Fixed: The 'Linked Boards' on the team page takes two to five minutes to load.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹³⁰ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-06-15 | Tempo Timesheets for Server 11.6.0 Release

We've released **version 11.6.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and no new features.

FIXES

- Fixed: Selecting the first account from the drop-down list in the Logged time report is ignored.
- Fixed: Unable to scroll down to the end of the list in the Team view list.
- Fixed: Jira header overlay covers part of Tempo Timesheet pages.
- Fixed: In order to improve performance of Reports for Users with many Dynamic Dropdown Work Attributes, the DD-WA information is only fetched for the initial rows in view and then for rows in view once the user stops scrolling (for 1 second).
- Fixed: Opening the Log time form with the + icon in the Time tracking section, opens the Jira Log Work form instead.
- Fixed: Clarify REST documentation to indicate that account links can only be created/updated using the Account Links endpoint.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹³³ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹³⁴ (UPM).

2021-05-11 | Tempo Timesheets for Server 11.5.0 Release

We've released **version 11.5.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and no new features.

FIXES

- Fixed: Fixed the dropdown menu in the Teams Details page so that it now highlights the selected team in the overall list.
- Fixed: Improved UX when removing a program from a team, particularly when all teams are removed from the program.
- Fixed: Repeating plans no longer disappear from My Work after you have logged time on another repeated plan on the same day.
- Fixed: When grouping data in the user timesheet, it is now possible to uncheck Issue in the Group by field.
- Fixed: Tempo uses the selected timestamp as a start time when creating worklogs using the "w" keyboard shortcut
- Fixed: Tempo remembers your sorting configuration when you navigate between the Timesheet and Calendar views in My Work.
- Fixed: Worklog splitting now works when the "Maximum hours per day per user" setting is enabled and maximum hours have been reached.
- Fixed: Administrators can access the Tempo Analytics page in cases where Projectrak (previously Profields) is installed alongside Tempo.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹³⁶ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-04-13 | Tempo Timesheets for Server 11.4.0 Release

We've released **version 11.4.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and gives users the option to access Tempo Timesheets in German.

IMPROVEMENTS

- Tempo Timesheets is now available in German. To change languages, click on your Jira user image in the upper right corner, select Profile, navigate to Preferences and change your language to German.

FIXES

- Fixed: Applied a word-break to the Log Time description field in the Tempo panel of the Jira issue view so that it no longer runs on indefinitely.
- Fixed: The "Add" button in the Location History modal within the Manage Staff page is now disabled if no location is selected.
- Fixed: Work per day and Remaining Estimate labels were truncated in Log Work dialog.
- Fixed: Price rate for employees who are members of multiple teams reflects their role in the team assigned to the issue.
- Fixed: Performance of the JQL Filter Picker has been improved. When you have a large number of filters visible, you may need to use the search function if your filter does not appear in the list of filters loaded by default.
- Fixed: Fixed Logged Time report worklog permissions to ensure that users can't see worklogs that they aren't supposed to.
- Fixed: Addressed styling bug where Jira header was appearing above image preview container.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Server Code Deprecation and Removal page](#)¹³⁹ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁴⁰ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)¹⁴¹ and comes bundled with the following Tempo plugins:

2021-03-09 | Tempo Timesheets for Server 11.3.0 Release

We've released **version 11.3.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version makes it possible to filter users by Tempo Program IDs in the Manage Staff page.

NOTE: The 'Issues List' and 'Group By' feature is removed from this 11.3.0 Server Release and it will be restored in an upcoming 11.9.0 Server Release.

IMPROVEMENTS

- It is now possible to filter users by Tempo Program IDs (a Program is a collection of Tempo Teams) in the Manage Staff page.

FIXES

- Fixed: Addressed misalignments in the Log Time dialog when the Jira language is not set to English.
- Fixed: Tempo sidebar no longer overlaps the Jira header drop-down navigation.
- Fixed: Username was not showing correctly in report exports for disabled users when they were members of a team through a Jira group (for users using Jira 8.7.0 and higher).
- Fixed: Logged column will not be visible in My Work if user unselects it in the My Work view settings and then refreshes browser.
- Fixed: The new Belarusian Ruble (BYN) is now available in the Price Tables setting instead of the old Belarusian Ruble (BYR). An update task (DB upgrade task 13) will insert the currency into the database if it is missing.
- Fixed: Time and Expense report was not showing a spinner (after navigating via the date picker) when rendering worklogs takes a long time.
- Fixed: In Manage Staff, partial selector indicator no longer disappears after a user hovers or takes an action.
- Fixed: Issue lists and group by issue in the My Work Timesheet view now work the same as in Tempo Cloud. You can only group by issue when using an issue list.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁴² (UPM).

This release is compatible with products listed in the [Compatibility Page](#)¹⁴³ and comes bundled with the following Tempo plugins:

2021-02-15 | Tempo Timesheets for Server 11.2.0 Release

We've released **version 11.2.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Fixed discrepancy in Grid View (Weeks) splitting reports when in "Create Printable View"
- Fixed: Gradual slowdown in issue search when navigating often while Tempo is installed and enabled
- Fixed: Users would periodically and incorrectly get an error about not having permission to set billable hours in the Timesheet inline edit
- Fix: IssueKey added to Tracker if started from Issue-Search

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager¹⁴⁸ (UPM).

2021-02-10 | Tempo Timesheets for Server 11.1.0 Release

We've released **version 11.1.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Input in date picker for reports has been widened to allow the display of 2 character digits.
- Fixed: Subtitle of print report displays according to accepted requirements.
- Fixed: Clarified REST API documentation about updating membership in Teams.
- Fixed: Removed endpoint that can query worklogs by issuedOrKey.
- Fixed: Removed unsupported querying of worklogs by jiraWorklogId.
- Fixed: Removed unused/unsupported query parameter customFieldKeys from the worklog v4 search API.
- Fixed: Team memberships no longer show duplicates in the Manage Staff page.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹⁵⁰ (UPM).
	This release is compatible with products listed in the Compatibility Page¹⁵¹ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... - Tempo Core 11.1.0 - Tempo Accounts 11.1.0 - Tempo Teams 11.1.0 - Tempo Planning API 11.1.0 - Tempo Platform Jira 11.1.0 - Tempo Platform API 11.1.0

151. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2021-01-19 | Tempo Timesheets for Server 11.0 Release

We've released **version 11.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. **This includes changes to the Jira SPI and Jira REST API.**

This latest major version of Tempo Timesheets features changes to the **Jira SPI and Jira REST API**. This results in the Tempo Team custom field being returned as an object rather than as a string and also makes it possible to update the Jira SPI with an object. While it is still possible to use the existing Jira REST API endpoints to update the team custom field with name or ID, it is no longer possible to use the Jira SPI to do so.

The goal in making these changes is to give you more flexibility when integrating with the Tempo Team custom field through the Jira SPI and API interfaces, and to allow those of you who use these interfaces to simplify your third party integrations. These changes will return a Team object that includes both the team name and the team ID (instead of just the team ID), which will allow you to access more information when you use the Jira SPI and REST API interfaces.

Please note that these changes may have an impact on third party apps and integrations within your organization. We recommend that you confirm that your critical third party apps are compatible with this change before upgrading.

You can find more technical information about these changes [here](#)¹⁵². We have also compiled information to help you understand how to update the [team custom field in ScriptRunner scripts](#)¹⁵³.

IMPROVEMENTS

- Tempo Team custom field is now returned as an object (rather than a string) that includes both the team name and the team ID.
- CSV exports of Jira issue data now include team name instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira.
- Deprecation warning: Private endpoint `rest/tempo-core/1/users/search` is being deprecated and slated for removal

FIXES

152. <https://tempo-io.atlassian.net/wiki/spaces/KB/pages/1377468417/Jira+SPI+and+REST+API+changes+in+Tempo+11>

153. <https://tempo-io.atlassian.net/wiki/spaces/KB/pages/1682080365/Tempo+Team+custom+field>

- Fixed: Error message in account creation form is now truncated if it's too long. It can be hovered over to see the full message in a callout.
- Fixed: In cases where browser language triggers a Tempo error message in the console, they will now see a console.warn message instead of a console.error message.
- Fixed: Fixed bug where Print Report did not work on latest version of Firefox.
- Fixed: Reports were showing an infinite spinner while trying to load user information for some deleted users (when grouping by Users).
- Fixed: Added back missing key-string for "Add Expense".
- Fixed: Reports will now always show worklogs for deleted users from an external user directory.
- Fixed: Period dropdown in Timesheets calendar view was not updating without refresh.
- Fixed: Date validation issues while creating worklogs.
- Fixed: Removed "group by Team" option from User Timesheet since it shouldn't have been available there to begin with.
- Fixed: Changed styling on Reports subtask tooltip so that text is more readable.
- Fixed: Editing a date in the list view of a report now sends the worklogUpdated track event.
- Fixed: Clarified REST API documentation for updating memberships in Teams.
- Fixed: Clarified REST API documentation for worklogs in Timesheets.
- Fixed: Clarified REST API documentation for Accounts.
- Fixed: Changed the header in the Programs tab on the Teams Overview page to "Programs"

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹⁵⁴ (UPM).
	This release is compatible with products listed in the Compatibility Page¹⁵⁵ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... - Tempo Core 11.0 - Tempo Accounts 11.0 - Tempo Teams 11.0 - Tempo Planning API 11.0 - Tempo Platform Jira 11.0 - Tempo Platform API 11.0

2021-01-04 | Tempo Timesheets for Server 10.18.8 Release

We've released **version 10.18.8 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Tempo Reports Week view now correctly displays worklogs (no longer moved between weeks).
- Fixed: Boards are now shown in the Teams section in Jira core.
- Fixed: Issue summary is now visible for all time records in the Tempo My Work calendar view.
- Fixed: Users can now track time on subtasks in the Jira issue view.
- Fixed: Error in Tempo issue panel no longer occurs when issue workflow is corrupted.
- Fixed: Tempo ignores Jira permission exceptions when checking JQL filter for favorites (when running a JQL report).
- Fixed: When exporting Tempo reports, only members of a team are included in the Users tab if they do not have worklogs.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.8, please follow [these instructions](#)¹⁵⁹.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁶⁰ (UPM).

2020-12-14 | Tempo Timesheets for Server 10.18.7 Release

We've released **version 10.18.7 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: There are no longer delays in opening the Tempo Log Time or Add Expense dialogs when navigating through tickets in the Jira issue search.
- Fixed: Team Timesheet Gadget now loads even if deleted users are still in the team.
- Fixed: Fixed bug where clicking the name in the Account column of Tempo Reports would redirect user to the wrong page.
- Fixed: Work attribute name is no longer hidden by the value field in the Log Time dialog.
- Fixed: Accounts with no worklogs now display their name instead of loading dots in the My Work timesheet view.
- Fixed: My Work display now expands when window is resized.
- Fixed: There are no longer errors when executing a JQL filter with the Account field.
- Fixed: You can now save the "People in Version" gadget again.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.7, please follow [these instructions](#)¹⁶².

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁶³ (UPM).

2020-12-07 | Tempo Timesheets for Server 10.18.6 Release

We've released **version 10.18.6 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: We are always working on improving how we show our data in reports. This improvement adds the function of only showing child labels when relevant like No-Sub-task and No epic. This avoids duplication of the data visualization.
- Fixed: Fixing bug where customer search in report filter was case sensitive.
- Fixed: Deleted attribute in dynamic dropdown causes endless error messages in list view when grouping by worklogs.
- Fixed: Bug fixed where summary was missing on issue in worklog popover.
- Fixed: Fixed bug where team lead with edit other worklogs team permission is prevented from editing work attribute on worklogs.
- Fixed: You are now able to delete accounts again when all project links are removed.
- Fixed: Fixed bug where time is reset on worklog when editing date in worklog edit dialog box.
- Fixed: Team permission cache not reset when users log in or out.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.6, please follow [these instructions](#)¹⁶⁵.

2020-11-17 | Tempo Timesheets for Server 10.18.5 Release

We've released **version 10.18.5 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Reporter user name shown instead of user_key in the "Reporter" column when exporting the Logged Time report to CSV, even when the reporter did not log any time during the timeframe exported.
- Fixed: Fixed a bug which prevented the special characters from loading correctly when exporting the Logged Time report to PDF. We are looking into what can be done to support CJK languages.
- Fixed: Dynamic dropdown field is not updated after changes in the dependent field.
- Fixed: Period dropdown in My Work calendar view is not updated without refresh.
- Fixed: Location is shown as ID instead of name when printing Tempo reports.
- Fixed: Fixed a bug in Excel format for Servlet export where user key was being shown instead of user name for Timesheet Approval Actor and Timesheet Approval Reviewer. These fields are included if addApprovalStatus=true is included in the parameter list.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.5, please follow [these instructions](#)¹⁶⁸.

2020-10-19 | Tempo Timesheets for Server 10.18.4 Release

We've released **version 10.18.4 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. Tempo Administrators and Tempo Team Administrators can now filter users by their Jira status (active, inactive or all) in the Manage Staff page in Settings. Timesheets customers can now enable the team commitment legacy feature.

IMPROVEMENTS

- Tempo Administrators and Tempo Team Administrators can now sort users by their Jira status (active, inactive or all) in the Manage Staff page in Settings.
- Timesheets-only customers can now enable the team commitment legacy feature under Settings - Configuration - Legacy Features.
- Updated Tempo Servlet Export plugin to support exporting Excel 2007 format (which supports more than 65,000 rows) by using the format=ooxml parameter.
- We have made improvements to make the Customer browser much faster when loading a large number of Tempo Customers. We've also aligned the Customer browser with the overall look and feel of Tempo, added filtering capabilities and improved its error handling.

FIXES

- Fixed: Added id to submit timesheet button.
- Fixed: All billable hours which have been logged to internal issues are now displayed in reports.
- Fixed: Now possible to inline edit worklogs on last day of the period.
- Fixed: "Actions" button on Manage Staff page in Settings is visible after you have selected a user.
- Fixed: Dynamic dropdown now works even if user has many Jira custom fields.
- Fixed: Adjusted how Tempo gadget displays dates in the header of the timesheet table so that it works when the Jira language is set to Russian.
- Fixed: In order to avoid the overlapping of labels in the Tempo Workload Distribution gadget, the text under the bars is now limited as the count of bars increases.

- Fixed: Eliminated bug which caused a leaving page confirmation dialog to be shown after searching in issue side panel in My Work and then trying to navigate to a new page.
- Fixed: Link on Account Name in logged time report no longer loses selected time period.
- Fixed: Corrected text and removed double quotes from the French translation for Aujourd'hui in the My Work header and Créer l'équipe on the Teams page.
- Fixed: Account that is not linked to a project can no longer be selected as a work attribute.
- Fixed: Holiday shows a pink color in My Work Timesheet view
- Fixed: Eliminated broken link in Reports Account key column in Logged Time report.
- Fixed: It is now possible to open the Log Time dialog in Firefox from the issue view dropdown when the issue panel has been disabled.
- Fixed: Adjusted inconsistent estimates in Tempo reports.
- Fixed: Selected period in Tempo reports stays the same even when you click on team members.
- Fixed: Epic now shows in Tempo reports when the issue type was changed to Epic.
- Fixed: Fixed error message when moving worklogs in reports.
- Fixed: Broken date range picker in reports.
- Fixed: Jira groups are not shown as members of team in permissions page.
- Fixed: My Work now remembers my period selection.
- Fixed: Fixed upgrade task 18 in Teams for users who had experienced failure previously.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.4, please follow [these instructions](#)¹⁷¹.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁷² (UPM).

This release is compatible with products listed in the [Compatibility Page](#)¹⁷³ and comes bundled with the following Tempo plugins:

2020-09-24 | Tempo Timesheets for Server 10.20.1 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the features described below have been included in the version [10.18.4 release](#) (see page 124). You can find more information [here](#)¹⁷⁴.

We've released **version 10.20.1 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This hotfix corrects an error when reindexing issues with the team custom field.

- **HOTFIX**

- Bug fixed: Error when reindexing issues with the team custom field.

Starting with Tempo Timesheets 10.19.0, CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira. In addition, **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)¹⁷⁵.

2020-09-07 | Tempo Timesheets for Server 10.19.0 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the fixes described below have been included in the version [10.18.4 release](#) (see page 124). You can find more information [here](#)¹⁸².

We've released **version 10.19.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. Customers exporting Jira issue data to CSV will now see team name (instead of team ID) in the Team field. TeamCustomField now returns a Team object instead of a string. **The latter change may require updates to your third party apps or integrations.**

• Improvements

- CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira.
- **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)¹⁸³.

• Fixes

- Fixed: MsSql, MySql and Oracle database users were not seeing all teams in the teams overview page.

2020-08-17 | Tempo Timesheets for Server 10.18.0 Release

We've released **version 10.18.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. Team visibility can now be managed through Team Permission Roles. The release also contains other improvements and several bug fixes.

• Improvements

- Team visibility can now be managed through Team Permission Roles with a new permission: *View Team*. This replaces an older permission (*Browse team*) that used to control this through the *Team is visible to* setting. Read more [2020-07-29 | Updates to Team Permissions are Coming](#)¹⁹².
- Account Approval Status has been added as a column to report exports. This is intended to support the future release of a new and improved account approval feature. In the meantime, the status in the new Account Approval column will always show as Pending

• Fixes

- Fixed: JQL filter team returns no users if team is not found.
- Fixed: Customer picker is now more performant.
- Fixed: Dynamic drop down now shows stored keys for worklogs with values not found in external dynamic service. This can happen if the external service is changed so that it returns different ids.
- Fixed: Worklogs are now shown for disabled users for managers that have team permissions.
- Fixed: The overlapping issue with app navigator.
- Fixed: Teams linked to projects/boards and issues can now be deleted (with a warning).
- Fixed: JQL team member now only includes currently active team members.
- Fixed: Consistent rounding of hours in team approvals page.
- Fixed: Timesheets Report inline edit date-picker now respects the ISO 8601 setting

¹⁹². <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/1111458024/2020-07-29+Updates+to+Team+Permissions+are+Coming>

- Fixed: Jira logo misalignment.
- Fixed: Export report performance improvement.
- Fixed: My Work does not keep selected period type.

2020-07-10 | Tempo Timesheets for Server 10.17.3 Release

This hotfix for **Tempo Timesheets for Server** fixes issues with the German translation in the Timesheet gadget and with exporting large reports in xls format

• HOTFIX

- Fixed an error in the German translation which caused the User Timesheet gadget to display the current period as the month of January, regardless of the time of the year. Note that this was a display bug only so the dates and worklogs were correct, it was just the header that was wrong.
- If a customer tries to export a report to Excel '97 (.xls old format) and it contains more than 65,535 worklogs, it will now split the report into multiple sheets. It will also split into multiple sheets for Excel 2007 (.xlsx format), which holds maximum 1,048,576 worklogs per sheet.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹⁹⁷ (UPM).
	This release is compatible with products listed in the Compatibility Page¹⁹⁸ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.17.3 • Tempo Accounts 6.17.3 • Tempo Teams 6.17.3 • Tempo Planning API 6.17.3 • Tempo Platform - JIRA 6.17.3 • Tempo Platform API 6.17.3

197. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

2020-07-03 | Tempo Timesheets for Server 10.17.2 Release

This hotfix for **Tempo Timesheets for Server** fixes an issue with showing Account names in Report view.

- **HOTFIX**

- Fixed: Names of accounts with keys that start on 0 (zero) are not loaded in Report view.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager¹⁹⁹ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁰⁰ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.17.2 • Tempo Accounts 6.17.2 • Tempo Teams 6.17.2 • Tempo Planning API 6.17.2 • Tempo Platform - JIRA 6.17.2 • Tempo Platform API 6.17.2

2020-06-11 | Tempo Timesheets for Server 10.17.0 Release

We've released **version 10.17.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. We've fixed the header in the User Timesheet toolbar so that it now shows the total hours worked and required hours. The release also contains other improvements and several bug fixes.

• Improvements

- You can now see the issue type by hovering over the issue icon in reports.
- Total hours worked and required hours for the selected period is now visible in the User Timesheet toolbar.
- We've changed how Billable Hours are displayed in the Jira History log. It is now human readable, for example, "1h" instead of "3600" (seconds).

• Fixes

- Fixed: A bug where users with Delete Own Worklogs permission only could not delete a worklog in the User Timesheet.
- Fixed: A bug where users could not navigate to the Approval Log page.
- Fixed: A bug where the **View in Tempo** link in the Project Report did not work.
- Fixed: Not possible to change Account lead.
- Fixed: Holidays are no longer displayed in a pink color in the My Work Timesheet view in 10.16.0.
- Fixed: The font size in Timesheets and Reports had been reduced. We've now increased the font size.
- Fixed: A bug that caused the Account Revenue page not to render correctly if the report data was larger than the size limit of the session storage cache.
- Fixed: The Period option is not available in the Log Time form in the My Work calendar view.
- Fixed: Total revenue is sometimes duplicated.
- Fixed: A bug where Holidays would be shown in Reports even when group by user is removed until the page was refreshed.

- Fixed: My Work does not keep selected period type.
- Fixed: A regression bug which caused logtime report export to fail if it contained worklogs from a deleted user.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁰³ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁰⁴ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.17.0 • Tempo Accounts 6.17.0 • Tempo Teams 6.17.0 • Tempo Planning API 6.17.0

2020-05-22 | Tempo Timesheets for Server 10.16.1 Release

This hotfix for **Tempo Timesheets for Server** includes an improvement to our license expiry notification and several bug fixes.

• HOTFIX

- We've improved our license expiry notification to show only to Jira Administrators.
- Fixed: Account drop-down in reports is too narrow making it difficult to select the correct account. We've fixed this to make picker options more readable in reports.
- Fixed: Tempo gadgets do not load and freeze the Jira instance.
- Fixed: Total revenue is sometimes duplicated.
- Fixed: The value of a dynamic drop-down is not displayed in the Log Time form.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁰⁹ (UPM).
	This release is compatible with products listed in the Compatibility Page²¹⁰ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.16.1 • Tempo Accounts 6.16.1 • Tempo Teams 6.16.1 • Tempo Planning API 6.16.1

2020-05-12 | Tempo Timesheets for Server 10.16.0 Release

We've released **version 10.16.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. In this release we introduce the new Tempo look. We've also made improvements to the Planned vs Actual report and fixed several bugs.

• New Features

- We're excited to launch the newest iteration of the Tempo brand to our Server and Data Center customers. This includes our updated Tempo logo as well as a newly designed Tempo sidebar. These changes are part of a larger rebranding effort that we have recently implemented across the company. To make the best use of screen real estate for the content that matters most, you can now unpin the sidebar and have it show up as a hamburger menu in the upper-left corner. Read more here: [Tempo is Getting a New Look](#)²¹¹.

• Improvements

- We've made improvements to the suggested name when saving a Planned vs Actual report.

• Fixes

- Fixed: Not all Jira groups are available in the filter picker on the Manage Staff page.
- Fixed: A bug where Trackers would go under the sidebar on the My Work page.
- Fixed: A bug where Holidays would be shown in Reports even when removing group by user until the page was refreshed.
- Fixed: A performance issue with the Tempo team member jql function.
- Fixed: Teams Overview: not all teams the member is part of are displayed when filtering by member.
- Fixed: Team Utilization Report does not respect last day of period.
- Fixed: Inactive users are displayed in approvers list when submitting Timesheets.

211. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/858095786/2020-05-05+Tempo+is+Getting+a+New+Look>

- Fixed: A bug where remembered report settings were not used when navigating to User report from Team Timesheets approval overview page.
- Fixed: Workload and Holiday Schemes with members cannot be deleted.
- Fixed: "None" set as Team value when the name is entered manually in the Team Custom field. Now you can enter the exact name of the team without having to wait for the drop-down to render.
- Fixed: Utilization Report shows accounts with no correct category.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²¹² (UPM).
	This release is compatible with products listed in the Compatibility Page²¹³ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.16.0 • Tempo Accounts 6.16.0 • Tempo Teams 6.16.0 • Tempo Planning API 6.16.0

2020-04-14 | Tempo Timesheets for Server 10.15.0 Release

We've released **version 10.15.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces the Planned vs Actual report. It also contains several bug fixes.

• New Features

- **Planned vs Actual in Tempo Reports.** Server and Data Center customers with both Timesheets and Planner can now access Planned vs Actual in the Tempo Reports overview. This report shows planned hours against logged time so that managers and team leads can see how well the project is going according to plan and execution. A data visualisation canvas features key metrics of the report as well as two charts for planned hours, logged hours, and the variance. Read more about the Planned vs Actual report in our [user documentation](#)²¹⁸.

• Fixes

- Fixed: Account work attribute has no value when the worklog is moved to a different issue.
- Fixed: Problems with the Account column and the dynamic drop-down Attribute column in Logged Time report when viewing in Firefox. We've now replaced select with tui-select in reports.
- Fixed: Issue with the performance of the Accounts report. The performance has now been improved when needing to fetch Account Information through either GroupBy Account or showing the Account Column in List View.
- Fixed: JQL search doesn't find a team after it has been renamed. We've now removed the need to reindex Jira after renaming a team. After upgrade, a reindex is recommended. A minor change has been done to the display of the team-customfield field when exporting the customfield in the Tempo Worklog servlet. It will now display the team-id, instead of the team-name.

218. <https://tempo-io.atlassian.net/wiki/spaces/HCTIMESHEETSDC/pages/3390376190/Planned+vs+Actual+Report>

- Fixed: Users with the *View All Worklogs* permission viewing another user in the User Timesheet got an error saying "User does not have permission to approve timesheet".
- Fixed: Unable to change account name to equal account key.
- Fixed: A bug where Account search was broken, for example in project settings/accounts.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²¹⁹ (UPM).

2020-03-26 | Tempo Timesheets for Server 10.14.0 Release

We've released **version 10.14.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. In this release we've added the location field to report exports and improved our worklog search algorithm. We've also fixed several issues.

• Improvements

- We've added the location field to the report data exports of Logged Time reports.
- We've updated our worklog search algorithm which improves response times significantly for the Team Approvals page.

• Fixes

- Fixed: Users with the permission to plan time for their team members can plan time for users that are not in their teams. Now team leads can only select users for which they have permission to plan in the Plan Time form.
- Fixed: We've improved the performance for rest call behind tempo Team custom field picker.
- Fixed: Wrong approval status on users tab when exporting a report containing multiple approval periods to Excel.
- Fixed: Issue icons broken in Jira instances with a suffix in their base URL.
- Fixed: Logged time report shows users who are no longer members of the jira group that is used for the team.
- Fixed: JQL required *Work on issues* permission when searching for epics in Tempo report.
- Fixed: Custom Issue picker list not visible when moving worklogs in Timesheets view.
- Fixed: Error when importing accounts for customers with other than English language.
- Fixed: Some users were not able to fill out the Log Time form when using a required dynamic drop-down work attribute with multiple parameters and a single option.
- Fixed: PDF export showing incorrect information for planned time.
- Fixed: Adding holidays in a Holiday scheme will retain values if validation fails.
- Fixed: Teams Overview: filters are not updated on screen load, only on full page refresh.

- Fixed: Team role drop-down list not able to scroll down.
- Fixed: Exception when the filtering of accounts leads to more than 2100 params in dbQuery on MSSqlServer.
- Fixed: A bug which caused only the first 1000 JQL filters to be returned to the front-end. Now all filters are returned and can be selected as a "filter" on a custom report.
- Fixed: Deleting expense categories with expenses linked to deleted issues should now work.
- Fixed: Unable to delete team for Jira instances without Tempo team custom field.
- Fixed: Performance problem with Tempo Team navigator. We've applied the quickest solution to show spinner until the data is fetched.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²²⁷ (UPM).
	This release is compatible with products listed in the Compatibility Page²²⁸ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.14.0 • Tempo Accounts 6.14.0 • Tempo Teams 6.14.0 • Tempo Planning API 6.14.0

230. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2020-03-10 | Tempo Timesheets for Server 10.13.0 Release

We've released **version 10.13.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. In this release we've made some improvements for the configuration of Holiday Schemes and the navigation in My Work when viewing the timesheets of other users. We've also fixed several issues.

• Improvements

- We've improved the usability in Holiday Schemes configuration in Tempo Settings by allowing you to type in dates and showing validation errors when data input is malformed.
- When viewing someone else's timesheet in MyWork, clicking the My Work icon in the Tempo sidebar now takes you to your own timesheet.

• Fixes

- Fixed: An issue where loading the issue view would take very long or crash altogether due to the collaborators panel loading many worklogs.
- Fixed: Wrong information in the TEAM API documentation. We've now updated the documentation.
- Fixed: The stop button does not work when trying to stop the tracker in IE11. Now IE11 show the Log Time form when the tracker is stopped.
- Fixed: A broken Account key link in the Logged time report. The Account Key link in the Key Column of Reports now redirects you properly to the corresponding Account overview page.
- Fixed: Missing estimates in reports when loading issues from issue list.
- Fixed: Timesheet User Gadget crashes if the status name has a slash.

• Removal of Legacy Features

- We're removing the Team Commitment from Tempo Teams. This change has no effect on customers with Timesheets only. For more information about how this change affects Planner users, see [release notes for Tempo Planner for Server 7.13.0 \(see page 383\)](#).

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ²³¹ (UPM).
	This release is compatible with products listed in the Compatibility Page²³² and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.13.0 • Tempo Accounts 6.13.0 • Tempo Teams 6.13.0 • Tempo Planning API 6.13.0

231. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

232. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2020-02-11 | Tempo Timesheets for Server 10.12.0 Release

We've released **version 10.12.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces Location in the Manage Staff and Reporting tools. We've also aligned with Atlassian to comply with GDPR standards and fixed several issues.

• New Features

- Tempo is pleased to introduce **Location** into the Manage Staff and Reporting tools.
 - Easily update and manage the Location of your staff. This update will allow you to create locations and assign them to your staff members, as well as filter by location inside of Manage Staff.
 - You can now report by Location. You can now Filter and Group by Locations in Tempo Logged Time reports.
- Check out our user documentation for more information about [Locations](#)²³³.

• Aligning with Atlassian to comply with GDPR standards

- In line with Atlassian's changes towards GDPR compliance, Jira Administrators will now have the ability to **anonymize a range of personal information for existing users**. This will allow you to do the following:
 - Change user keys and usernames of existing users.
 - Anonymize user profiles.
 - Delete or anonymize personal information that appears in Jira.

For more information about Atlassian's GDPR changes, see <https://confluence.atlassian.com/adminjiraserver/anonymizing-users-992677655.html>

• Fixes

- Fixed: The team timeline shows incorrect hours when planning time for a team that consists of members that have been bulk added to the team.
- Fixed: It's possible to select archived accounts in reports.

233. <https://tempo-io.atlassian.net/wiki/spaces/HCTIMESHEETSDC/pages/3390375903/Creating+and+Deleting+Staff+Locations>

- Fixed: Inconsistency in the Polish translation in the scheduler. In order to create a more consistent look and feel, the scheduler email in Polish now has the Period Type words reverted to English.
- Fixed: Plans in Reports, with an Issue that has an Account field and value set, are now grouped appropriately.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²³⁴ (UPM).
	This release is compatible with products listed in the Compatibility Page²³⁵ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.12.0 • Tempo Accounts 6.12.0 • Tempo Teams 6.12.0 • Tempo Planning API 6.12.0

2020-01-14 | Tempo Timesheets for Server 10.11.0 Release

We've released **version 10.11.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x platform**. In this release we've changed the default setting from *required* to *optional* for **Remaining estimate** and **Description** in the Log Time form.

• Improvements

- To reduce the friction from having **Remaining estimate** and **Description** fields in the Log Time form as *required* by default, we've changed the behavior to make those fields *optional* by default. This change will impact new customers and **customers that have never changed these settings before**. It is still possible to make **Remaining estimate** and **Description** required fields if your company desires. To do so, the Tempo Administrator needs to configure the logging time options and ensure that the **Remaining estimate** and **Worklog description** options are not selected. For more information about how to change logging time options, see [Configuring Logging Time Options](#)²³⁸.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ²³⁹ (UPM).

2019-12-10 | Tempo Timesheets for Server 10.10.0 Release

We've released **version 10.10.0 of Tempo Timesheets** which is compatible with **Atlassian's Jira 8.x** platform. This release fixes an issue where the Logged Time report didn't remember grouping preferences, price tables were not displayed for accounts, and reports displayed incorrect number of hours. We've also fixed an issue with Jira filters in My Work.

• Fixes

- Fixed: The grouping preferences set for the Logged Time report in the Reports overview are not remembered when the report is generated from the Jira issue view.
- Fixed: When archived accounts are added to the Accounts overview, the **Price Table** column is empty until the page is refreshed.
- Fixed: Reports display incorrect number of hours in the Weeks view.
- Fixed: Filter results are still displayed in the Timesheet view after the filter has been removed in the My Work Calendar view.

2019-10-10 | Tempo Timesheets for Server 10.8.0 Release

We've released version 10.8.0 of Tempo Timesheets which is compatible with Atlassian's **Jira 8.x** platform. This release introduces improvements to the reporting options. The Logged Time report lets you easily create the report you need, and grouping and sorting options help you organize your report so it's easy to read. We've also worked on some translation issues and fixed some bugs.

• New Features

- We've made a number of improvements to the reporting options. The Report overview has a new look and feel and the custom report is now called **Logged Time** report. It provides an overview of the time spent on projects at any level and it also replaces the report templates. Now you create Logged Time reports and filter it by the information you need to see. You can then save the filtered reports for future use and reference. To help you avoid running reports you might not want and might take a long time to generate, you can apply filters and groups before running the report. As a part of this update, reports can be grouped by epics and sub-tasks and you can also sort the data in alphabetical or numerical order.

For more information about the improved reporting options, check out our [user documentation](#)²⁵⁹.

- **Improvements**

- The TeamRole custom field did not show the selected value in bulk edit overview. We have changed the display of the TeamRole Customfield in the servlet export so that instead of showing the teamRole-id, it now shows the teamRole-name. This fixes the display on the confirmation step when bulk editing the teamRole value on issues.
- We've added more German translations. Also, translation strings for *Lithuania Litas* and *Latvia Lat* have been updated with *Lithuania Euro* and *Latvia Euro*.
- Report PDF export now supports Epic and Sub-task grouping.
- Teams with Project-links will be sorted first and the total number of returned teams has been increased.

- **Fixes**

- Fixed: Clicking on an issue key in the issues side panel should open the issue in another tab.
- Fixed: Editing a worklog in the Issue view is still possible after the period is closed for all users. Worklogs can no longer be edited within the Jira Issue view and are moved to a future date if they belong to a closed period.
- Fixed: It was not possible to add users to a team when the team's visibility had been changed. We've fixed the "Team Visibility" modal to support adding groups.
- Fixed: Time and Expense report is not reflecting Team role change if the Team custom field on the issue is changed.
- Fixed: Jira Native gadgets fail when using Account custom field.
- Fixed: There was a security issue with a direct link to User Preferences with username being provided as a parameter. It let any Jira Application user modify the "My Supervisor" and "Timesheet Actions" parameters for this specified user. We've removed the tempoUserSettings page and code.
- Fixed: Running tracker on different browser tabs does not show the correct time in all tab.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁶⁰ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁶¹ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.8.0 • Tempo Accounts 6.8.0 • Tempo Teams 6.8.0 • Tempo Planning API 6.8.0

2019-09-30 | Tempo Timesheets for Server 10.7.2 Release

This hotfix for **Tempo Timesheets for Server** fixes the Jira Native gadgets that failed to use the Team custom field and Account custom field.

• HOTFIX

- Fixed: Account custom field and Team Role custom field were not displaying on Jira dashboards. We've fixed the Jira Native gadgets and they can again be used with statistic gadgets.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ²⁶⁴ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁶⁵ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.7.2 • Tempo Accounts 6.7.2 • Tempo Teams 6.7.2 • Tempo Planning API 6.7.2

2019-09-12 | Tempo Timesheets for Server 10.7.0 Release

Compatible with Atlassian's **Jira 8.x** platform. In this release we introduce a new feature that allows you to easily update staff workload and holidays. We've also made improvements to the team custom field and fixed some issues.

• New Features

- Easily update staff workload and holidays

Tempo is pleased to introduce Manage Staff, a tool that lets users with the *Tempo Team Administrator* permission easily change the workload and holiday schemes of many Jira users simultaneously. With the Manage Staff tool team administrators also get a good overview of their staff as they can look up staff members based on team memberships and roles, Jira groups, as well as workload- and holiday schemes. Customers using Tempo Staff ID are able to search and view staff by ID of their employees.

For more information about how to use Manage Staff, see our [user documentation](#)²⁶⁶.

• Improvements

- The TeamRole custom field did not show the selected value in bulk edit overview. We have changed the display of the TeamRole Customfield in the servlet export so that instead of showing the teamRole-id, it now shows the teamRole-name. This fixes the display on the confirmation step when bulk editing the teamRole value on issues.

• Fixes

- Fixed: It was not possible to add users to a team when the team's visibility had been changed. We've fixed the "Team Visibility" modal to support adding groups.
- Fixed: The **Log Time** button in the Jira issue view was not translated into German or French.
- Fixed: Some customers could not load their **My Work** page after upgrading to Tempo Timesheets 10.

266. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/481394745/Changing+Staff+Workload+and+Holidays+-+Tempo+Server>

- Fixed: For users with the View team worklogs permission the user picker would not be displayed in the User timesheet.
- Fixed: The Issue picker filter tab did not respect filter sorting.
- Fixed: IE-11 Issue view not loading when selecting subtask.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁶⁷ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁶⁸ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.7.0 • Tempo Accounts 6.7.0 • Tempo Teams 6.7.0 • Tempo Planning API 6.7.0

2019-08-13 | Tempo Timesheets for Server 10.6.1 Release

This hotfix for **Tempo Timesheets for Server** fixes an issue with the userkey and username in Holiday and Workload schemes.

• HOTFIX

- Fixed: Holiday and Workload pages worked incorrectly when the username was different from the userkey. Now the user information for users of Holiday and Workload schemes are fetched by userKey not userName.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ²⁷³ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁷⁴ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.6.0 • Tempo Accounts 6.6.0 • Tempo Teams 6.6.0 • Tempo Planning API 6.6.0

273. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

274. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2019-07-10 | Tempo Timesheets for Server 10.5.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release includes various bug fixes and an updated Servlet API.

We've released an updated Servlet API to address issues with the team custom field in various Jira views. For more information about these changes, see [Changes are Coming to the Servlet API on July 10, 2019](#)²⁷⁵.

- **Fixes**

- Fixed: Users without the Tempo Accounts permissions can access the Import/Export Accounts page if they have the URL to the page. Now unpermitted users see the page with only the text "403 Forbidden".
- Fixed: Error where having more than 1000 projects caused an error in reports when filtering/exporting for certain types of Oracle databases.
- Fixed: Adding a Jira group to a team through API results in an error.
- Fixed: Exceeding the team summary character limit throws a 500 error. Now the summary can hold unlimited length of string.
- Fixed: Team custom field not showing selected value in bulk edit overview. We have changed the display of the Team Customfield in the xml export, servlet export, etc. Instead of showing the team-id, it now shows the team-name. This fixes the display on the confirmation step when bulk editing the team value on issues.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)²⁷⁶ (UPM).

275. <https://tempo-io.atlassian.net/wiki/spaces/HCA/pages/450363572/2019-06-14+Changes+are+Coming+to+the+Servlet+API+with+Timesheet+version+10.5+on+July+10+2019>

[Click here to view plugins bundled with this release...](#)

- Tempo Core 6.5.0
- Tempo Accounts 6.5.0
- Tempo Teams 6.5.0
- Tempo Planning API 6.5.0

277. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2019-06-13 | Tempo Timesheets for Server 10.4.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release includes various bug fixes.

• Fixes

- Fixed: List of accounts is not sorted in the Tempo Account Budget Burn-up Chart and Tempo Account Monthly Budget Burn-up Chart gadgets. Now the list is sorted alphabetically by key (ignoring case).
In the Tempo Account Hours by Customer gadget the customers are sorted alphabetically by the first letter of the first word (ignoring case).
- Fixed: When in-line editing the billable hours column in a Tempo report, the edited value is not displayed.
- Fixed: It is not possible to edit worklogs created on the first day of a period where the previous period is closed and log time with start time is not enabled.
- Fixed: Billable seconds can be set to negative value in Tempo reports.
- Fixed: When submitting approval logs for past periods where period configuration is set to Weekly displays "Unknown Period" instead of the Week #.
- Fixed: Bug where last/next day selections in reports would be lost on refresh.
- Fixed: Hovering over worklogs with a long description in the Jira issue view, results in a blue-black flashing pop-up window. Now descriptions that are too long are limited to a certain number of lines and the remaining lines are obfuscated.
- Fixed: Entry in the **To** box of the Log Time dialog box is overwritten when fast switching/ keyboard typing.
- Fixed: The **Enable plan approval** setting is available for users with only Timesheets installed.
- Fixed: Error message regarding logging time on parent issues not being allowed is displayed in the background and the focus remains on the Log Time form.

- Fixed: When trying to access the Account report through the "key" link in the report, it sends you to the user timesheet instead of the Account report. The account key in reports now links to that account's timesheet. The period you are viewing will also carry over.
- Fixed: Worklog Distribution gadget displays wrong time frame.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁷⁸ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁷⁹ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.4.0 • Tempo Accounts 6.4.0 • Tempo Teams 6.4.0 • Tempo Planning API 6.4.0

2019-05-07 | Tempo Timesheets for Server 10.3.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release includes various bug fixes.

• Fixes

- Fixed: The **View Timesheet** button in the approval email redirects to the period last viewed instead of the period that requires approval.
- Fixed: Error when using the navigation arrows at the top of a user's Approval Log in the Teams view.
- Fixed: Navigating from Approval Log to timesheet results in an missing period key error.
- Fixed: A typo in the Spanish translation of the Teams page. The column heading for team name is both in English and Spanish.
- Fixed: Error when editing worklogs where work attributes are required.
- Fixed: When scrolling to the right with the horizontal scrollbar in the Team Timesheet, the scrollbar disappears behind the vertical browser scrollbar when browser scrollbar is present.
- Fixed: Global option missing in the account/project drop-down list.
- Fixed: Account import not working if the import file includes only required fields columns.
- Fixed: Incorrect remaining estimate is set on a worklog when moving it to another day.
- Fixed: **Log Time** button is available in the Jira issue view although logging time on the issue is not allowed.
- Fixed: My Work gadget shows the wrong date when language is set to German.
- Fixed: Performance issue while enabling tempo-teams plugin.
- Fixed: Exporting reports to PDF fails if component is null.
- Fixed: When using the gear icon to access a team member's Approval log, the current period is displayed instead of the period viewed in the Team timesheet.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁸⁰ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁸¹ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.3.0 • Tempo Accounts 6.3.0 • Tempo Teams 6.3.0 • Tempo Planning API 6.3.0

2019-04-11 | Tempo Timesheets for Server 10.2.0 Release

Compatible with Atlassian's **Jira 8.x** platform. In this release we've made improvements to the User Timesheet view so that you can see the issue lists configured in the My Work Issues side panel. Your timesheet now also saves your view configurations. We've also updated the permission overview and period links from the approval log. This release also includes several bug fixes.

• Improvements

- We've implemented a feature allowing you to see the issue lists configured in the My Work Issues side panel in your Timesheet view. This will allow you to use your User Timesheet to track time on issues that are relevant to you. The issue lists will enable you to view issues in your Timesheet even though you have not logged time on them.

- Now your timesheet remains in the same configuration you left it in so that you don't need to adjust the display to meet your needs every time you open it.
- Third party developers can now listen to events when Tempo Work Attribute configuration changes.
- We've updated the title and description for the Expense Categories in Tempo settings. We've added a description of Tempo Rate Administrator permission to the Tempo Permission Overview page.
- Period links from approval log now redirect to the My Work Timesheet rather than the custom report.

• Fixes

- Fixed: Jira project links are not updated when importing accounts.

- Fixed: Global accounts displayed when filtering the Accounts overview by "No Projects".
- Fixed: Accounts with "#" is in the Account name are not exported.
- Fixed: Editing other fields when configuring holiday schemes defaults the date to something else.
- Fixed: Unlinked account can be set on issue via REST api call.
- Fixed: When switching between accounts in the Time and Expenses report, the current period selection is not respected.
- Fixed: Error when clicking on the new timezone in Approval log.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁸² (UPM).
	This release is compatible with products listed in the Compatibility Page²⁸³ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.2.0 • Tempo Accounts 6.2.0 • Tempo Teams 6.2.0 • Tempo Planning API 6.2.0

282. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

283. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2019-03-14 | Tempo Timesheets for Server 10.1.0 Release

- Compatible with Atlassian's **Jira 8.x** platform. In this release of Tempo Timesheets for Server we've updated permission descriptions and fixed various issues.

• Improvements

- We've updated the Tempo permission description for Accounts on the Permission Overview page. It now reads: "Ability to create, configure, and delete accounts. Some account configuration tasks require the Administer Jira permission."
- We've updated the Tempo permission description for Timesheets on the Permission Overview page. It now reads: "Grant or deny access to Tempo Timesheets to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."
- We've made some improvements to the timesheet approval workflow making it easier to submit and approve timesheets:
 - Users are no longer limited to the last 3 periods when submitting timesheets.
 - Users with the permission to approve timesheets can now do so directly from the user timesheet. The **Approve** and **Reject** buttons have been added to the timesheet view for approvers when viewing the timesheet of another user.
 - We've also made it easier for approvers to find the relevant timesheets by navigating directly to it from the Teams Approval page and the approval notification email.
- We've improved the Issue key display in reporting. To make space for more content in each of the report columns, we've made changes to the layout of reports. For example, the issue key column now supports up to 12 characters before truncating.
- To improve the support for extending functionality of the Log Time dialog box, we've added a bind event 'logWorkOpened' when Log Time dialog box opens.

• Fixes

- Fixed: Parts of Tempo content not translated.
- Fixed: Not all filters showing up in reports when there are more than 1000 filters.

- Fixed: Teams with members not displayed, despite having all the required permissions.
- Fixed: When team members are added to a team through a Jira group, inactive group members are displayed in the Capacity and Utilization reports.
- Fixed: Not possible to enter a negative value when adding an expense in the Issue view.
- Fixed: My personal My Work calendar shows my team's worklogs after having viewed these worklogs in timesheets.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁸⁴ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁸⁵ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 6.1.0 • Tempo Accounts 6.1.0 • Tempo Teams 6.1.0 • Tempo Planning API 6.1.0

284. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

2019-02-14 | Tempo Timesheets for Server 10.0.0 Release

We've released **version 10 of Tempo Timesheets** which is compatible with Atlassian's **Jira 8.0**. Tempo Timesheets 10.0.0 is not backward compatible with the Jira 7.x platform. This release also introduces improvements to the My Work gadget and the Tempo Issue picker. Log work is now referred to as log time and we've also fixed issues with the Holiday Scheme, large groups in the Team Overview, and more.

As announced earlier ([view announcement²⁸⁶](#)), **Tempo Timesheets 10.0 supports Jira 8.0**. Note that Tempo Timesheets 10.0.0 is not backward compatible with the Jira 7.x platform. If you upgrade to Jira 8, you will need to upgrade to Tempo Timesheets 10.0.0. Make sure to check out [these instructions²⁸⁷](#) before upgrading the Tempo apps.

- **Improvements**

- Log work is now called **log time** in Tempo.
- The My Work gadget now shows worklogs and plans ordered by start time.
- You can add Jira filters or projects to your Tempo Issue picker and My Work side panel. This is done via the My Work Issues side panel configuration, see <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/366709500>.
- The **Log Time** button is now disabled while the User picker is loading in the Log Time dialog box.
- When creating or updating a plan in the My Work Calendar, the plan card is updated dynamically, similar to when creating and editing worklog cards.

- **Fixes**

- Fixed: Tempo panel is not displayed when issue is in "work is denied" status.
- Fixed: Incorrect Team Administrator description in Global permissions.
- Fixed: It is not possible to define floating holidays in a Holiday Scheme when the system language is other than English.

286. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/380044147/2019-02-08+Jira+8+support+changes+to+Resource+Planning>

287. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/382304307/Tempo+Apps+compatible+with+Jira+8>

- Fixed: When the language is set to other than English in Jira, the My Work gadget does not load data and the date shows an "invalid date" error.
- Fixed: When a group of 100+ members is added to a team, it is displayed as having 0 members in the Team Overview.
- Fixed: Groups with 100+ members do not show up in the Approval Log.
- Fixed: Custom attributes are deleted from a worklog when it is moved from one issue to another.
- Fixed: Users without access to Tempo products can be added to Tempo teams.
- Fixed: Opening the Log Time dialog box using the keyboard shortcut w does not automatically set focus on the first field.
- Fixed: Dynamic drop-down attribute with {account} placeholder not working in reports.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁸⁸ (UPM).

2019-08-20 | Tempo Timesheets for Server 9.5.0 Release

Compatible with Atlassian's **Jira 7.x** platform. In this release we've made some improvements that let you to customize the Log Time dialog box. This release also includes several bug fixes.

• Improvements

- We've made some improvements that enable you to customize the Log Time dialog box to your business needs. Worklog ID is now exposed when editing a worklog, so that you can send the ID to the edit REST end-point.

• Fixes

- Fixed: The **View Timesheet** link in the timesheet approval email would take the approver to the period last viewed instead of the submitted approval period. The link now redirects the approver to the period indicated in the email.
- Fixed: Users without the Tempo Accounts permissions could access the Import/Export Accounts page if they had the URL to the page. Unpermitted users now see the page with only the text "403 Forbidden".
- Fixed: Editing worklogs resulted in a "work attribute required" error. We've added validation for required Work Attributes.
- Fixed: When submitting approval logs for past periods, where period configuration is set to Weekly, displayed "Unknown Period" instead of the Week #.
- Fixed: When logging time using the work attribute of the type dynamic drop-down, the values of the work attribute would disappear when generating a report (List view and include the work attribute). Dynamic Drop-down now caches search results.
- Fixed: IE-11 Issue view not loading when selecting subtask.
- Fixed: Incorrect remaining estimate was set on a worklog when moving it to another day.
- Fixed: Performance issue while enabling tempo-teams plugin.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁹² (UPM).
	This release is compatible with products listed in the Compatibility Page²⁹³ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 5.5.0 • Tempo Accounts 4.5.0 • Tempo Teams 4.5.0 • Tempo Planning API 4.5.0

2019-03-21 | Tempo Timesheets for Server 9.4.0 Release

Compatible with Atlassian's **Jira 7.x** platform. In this release we've made improvements to the User Timesheet view so that you can see the issue lists configured in the My Work Issues side panel. Your timesheet now also saves your view configurations. We've also updated the permission overview and period links from the approval log. This release also includes several bug fixes.

• Improvements

- We've implemented a feature allowing you to see the issue lists configured in the My Work Issues side panel in your Timesheet view. This will allow you to use your User Timesheet to track time on issues that are relevant to you. The issue lists will enable you to view issues in your Timesheet even though you have not logged time on them.

- Now your timesheet remains in the same configuration you left it in so that you don't need to adjust the display to meet your needs every time you open it.
- We've added a description of Tempo Rate Administrator permission to the Tempo Permission Overview page.
- Period links from approval log now redirect to the My Work Timesheet rather than a custom report.
- To improve the support for extending functionality of the Log Time dialog box, we've added a bind event 'logWorkOpened' when Log Time dialog box opens.

• Fixes

- Fixed: Not possible to enter a negative value when adding an expense in the Issue view.

- Fixed: Tempo scheduler fails to send reminder emails.
- Fixed: Accounts with "#" is in the Account name are not exported.
- Fixed: Editing other fields when configuring holiday schemes defaults the date to something else.
- Fixed: The personal My Work calendar shows the team's worklogs after having viewed these worklogs in timesheets.
- Fixed: My Work Timesheet view not rendering when navigating directly to it after viewing a custom report.
- Fixed: Not all filters showing up in reports if the number of filters is bigger than 1000.
- Fixed: Teams that have members not displayed in a customer's environment despite all the required permissions.
- Fixed: When team members are added to a team through a Jira group, inactive group members are displayed in the Capacity and Utilization reports.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager²⁹⁸ (UPM).
	This release is compatible with products listed in the Compatibility Page²⁹⁹ and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 5.4.0 • Tempo Accounts 4.4.0 • Tempo Teams 4.4.0 • Tempo Planning API 4.4.0

2019-02-14 | Tempo Timesheets for Server 9.3.0 Release

- **Tempo Timesheets 9.3.0** is compatible with Atlassian's **Jira 7.x** platform. In this release we've made some improvements to the timesheet approval workflow, report display, and the My Work calendar and gadget. Also, now Jira filters and projects can be used to filter issues in the Issue picker, and log work is referred to as log time. The release also includes several bug fixes.

Tempo Timesheets 9.3.0 supports **Jira 7.x**. Note that Tempo Timesheets 9.3.0 is not compatible with Jira 8.0 so please take care when selecting your installation versions from the Atlassian Marketplace.

- **Improvements**

- Log work is now called **log time** in Tempo.
- The My Work gadget now shows worklogs and plans ordered by start time.
- You can now add Jira filters or projects to your Tempo Issue picker and My Work side panel. This is done via the Issue picker configuration in the My Work side panel. For more

information about how to configure the Issue picker, see [Configuring the Issue picker](#)³⁰⁰.

Configure issue picker ✕

ADD CUSTOM ISSUE LIST

Add Jira project ▼

Add Jira filter ▼

ISSUE LISTS

- Azome** JIRA PROJECT ✕
- Recent issues
- Internal issues
- Favorite issues
- Assigned issues
- Watched issues

- The **Log Time** button is now disabled while the User picker is loading in the Log Time dialog box.
- When creating or updating a plan in the My Work Calendar, the plan card is updated dynamically, similar to when creating and editing worklog cards.
- We've made some improvements to the **timesheet approval workflow** that make it easier to submit and approve timesheets:
 - Users are no longer limited to the last 3 periods when submitting timesheets.
 - Users with permission to approve timesheets can now do so directly from the user's timesheet. Approvers can find the **Approve** and **Reject** buttons on the Period drop-down when viewing the timesheet of another user.

Total Hours 32h / 40h Log Time Current Period 0h ▼ Timesheet ⚙

RECENT TIMESHEETS

11	MO	Current period OPEN	32h / 40h	Submit
3		Last period WAITING FOR APPROVAL	40h Behind	Approve Reject
3		2019-02-03 - 2019-02-09	0h / 40h	
2		Period 2019-01-27 APPROVED	40h Behind	Reopen
8		2019-01-27 - 2019-02-02	0h / 40h

300. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/366709500/Configuring+the+Issue+picker+in+Tempo+Timesheets+for+Server>

- The Approval log is now accessed through the cogwheel in the user timesheet.

Total Hours 30m / 40h [Log Time](#) [Submit period 2019-01-18](#) [Calendar](#) [Timesheet](#) 

[Grace Period](#)
[Approval Log](#)

	02 SA	03 SU	04 MO	05 TU	06 WE	07 TH
	0	0	0	0	0	0

- We've also made it easier for approvers to find the relevant timesheets by navigating directly to it from the Teams Approval page and the approval notification email.
- We've improved the Issue key display in reporting. To make space for more content in each of the report columns, we've made changes to the layout of reports. For example, the issue key column now supports up to 12 characters before truncating.
- We've updated the Tempo permission description on the Permission Overview page. It now reads: "Grant or deny access to Tempo Timesheets to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."
- Fixes**
 - Fixed: Tempo panel is not displayed when issue is in "work is denied" status.
 - Fixed: Incorrect Team Administrator description in Global permissions.
 - Fixed: It is not possible to define floating holidays in a Holiday Scheme when the system language is other than English.
 - Fixed: When the language is set to other than English in Jira, the My Work gadget does not load data and the date shows an "invalid date" error.
 - Fixed: When a group of 100+ members is added to a team, it is displayed as having 0 members in the Team Overview.
 - Fixed: Groups with 100+ members do not show up in the Approval Log.
 - Fixed: Custom attributes are deleted from a worklog when it is moved from one issue to another.
 - Fixed: Users without access to Tempo products can be added to Tempo teams.
 - Fixed: Opening the Log Time dialog box using the keyboard shortcut w does not automatically set focus on the first field.
 - Fixed: Dynamic drop-down attribute with {account} placeholder not working in reports.
 - Fixed: Error with German translation.
 - Fixed: In the My Work Calendar when entering 0m or 0h in the Planned Time box in the Plan Time dialog box, the page crashes.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³⁰¹ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)³⁰² and comes bundled with the following Tempo plugins:

2019-01-10 | Tempo Timesheets for Server 9.2.0 Release

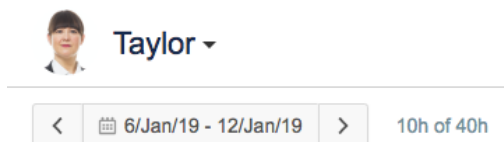

- **My Work** features an improved UI with many productivity enhancements and Period Management is now accessed through Tempo Settings. We've also fixed several issues.

New Features and Improvements

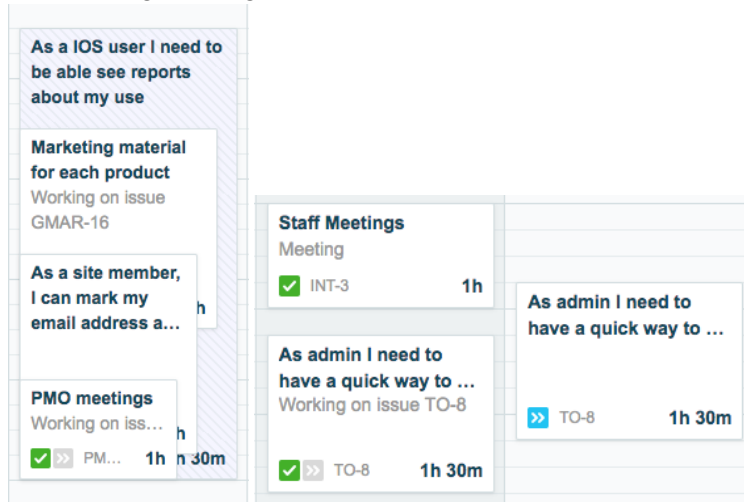

We've made some improvements to **My Work**, making it even easier to log time quickly. Improvements include:

- A streamlined header lets you navigate between weeks quickly, and modify your view
- In the **User Timesheet**, total hours worked vs total required is neatly displayed to the immediate right of the date-picker.

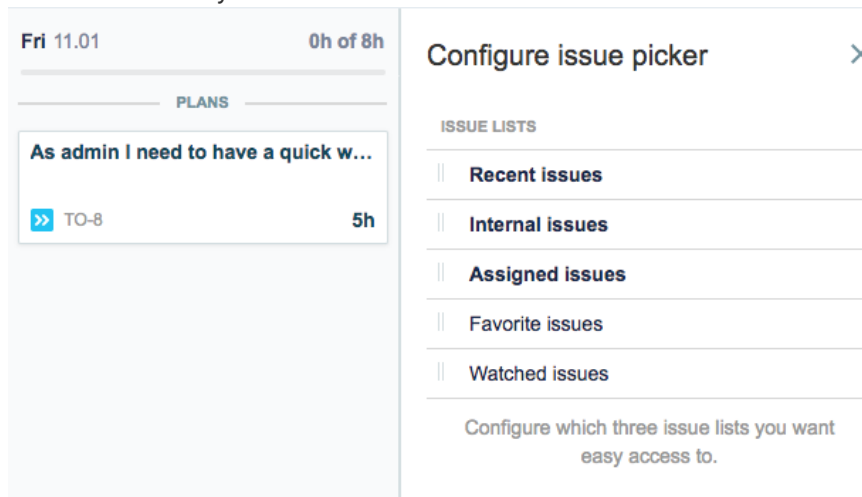

- Worklog and Plan cards have received a face-lift, and now stack neatly in the **Time view** when they overlap, making it easy to select them. Pending and rejected Plan cards are shaded differently so you can quickly see their status at a glance. The cards are also labelled according to type and status. Worklog cards that originate from plans show the source icon greyed-out

next to the green Log Work check-mark.

- When time is logged on a Plan card, the original Plan card is hidden from view, even when logged hours are less than planned. When a Worklog that originates from a Plan card is deleted, or moved to another issue, the original Plan card is displayed again.
- You can edit plans by dragging and dropping a card between days and users. When dragging a plan card that is a part of a period plan, only the selected card will be moved.
- You can move worklogs between issues. If you logged time on the wrong issue, you can move the worklog to another issue. Simply click the ellipsis in the upper-right corner of the card to display the Move Worklog dialog box and select the issue you want to move the logged time to.
- The Issues side panel now integrates the Tempo Issue Picker. The user interface in the Issue Picker Configuration has been simplified to let you interactively select which issue lists to include as the default selections, and quickly change the order. You can now simply drag-and-drop issue lists. The top three lists are bolded to show that they are selected. Note that Jira filters are currently unavailable in the issue lists.

Improvements

- Users with the Tempo Administrator permission can now access Period Management through Tempo Settings instead of Jira Administration. Managing Tempo periods no longer requires the Jira Administrator permission.

Fixes

- Fixed: When logging time through a shortcut in My Work the resulting worklog does not show up in the My Work Calendar.
- Fixed: Plans are displayed as worklogs in reports.
- Fixed: When editing worklogs the date picker starts on a wrong date.
- Fixed: Period management option is missing.
- Fixed: Misspelled word in Italian translation.
- Fixed: Report Totals not updating correctly when **Filter By** or **Group By** parameters are changing.
- Fixed: User that have no or limited permissions to view accounts can see customer, categories, and price table in the Accounts list.
- Fixed: No issues are shown in the plan item picker when **Disable Empty JQL Queries** is set to **ON**.

2018-11-29 | Tempo Timesheets for Server 9.0.0 Release

With **Tempo Timesheets for Server 9.0.0** we've introduced **My Work**, a new 'User Timesheet' to log work and plan time for yourself, and have replaced other predefined timesheets views with our next generation reporting engine to deliver a more powerful and flexible time-tracking and reporting tool. We've also introduced new team permission settings that let you easily manage access to data. You'll discover navigation improvements that let you access Tempo views and applications quickly and easily.

Note

Tempo Timesheets 9.0.0 is compatible with Tempo Planner 6.0.0 and Tempo Budgets 12.0.0. Earlier versions of Planner and Budgets are NOT compatible with Tempo Timesheets 9.0.0

The Tempo Timesheets 9.0.0 release introduces some big changes and major improvements. To read a detailed description of the changes see [Changes in Tempo Timesheets 9.0.0. \(see page 214\)](#)

You can also get a good overview of the major changes in Tempo Timesheets 9 by watching a recording of our webinar introducing [Tempo Timesheets 9³¹¹](#).

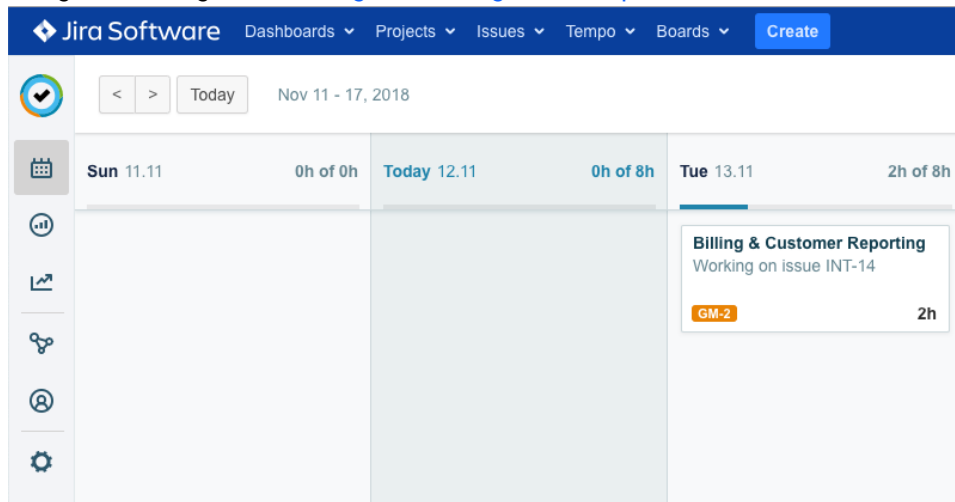

- **New Features**

- **More powerful time tracking.** We've introduced **My Work** to replace the User Timesheet, and have replaced remaining timesheet views, including Team, and Account timesheets, with the new Tempo reporting engine to deliver an even more powerful time-tracking and reporting tool. This means more flexibility when filtering and grouping your data, as well as improved export options - including optimizations for printable media. The **My Work** Tempo Calendar is now the default view in Timesheets. From there you can easily track your time by planning your work in advance and then quickly converting your plans to worklogs.
- **New permission settings.** New permissions give you flexibility to control who can view and manage personal data, while ensuring that external stakeholders have the level of access they need to get their job done. Access to worklogs can now be granted directly from

311. <https://www.youtube.com/watch?v=L1PdsF0-fNA>

Tempo using the new **Team Permissions**. These permission changes help you to comply with local privacy legislation. Learn more about the new permissions [here](#)³¹².

- **Tempo sidebar.** We've made navigation improvements by introducing the **Tempo sidebar** and simplifying the Tempo menu to make it easier for you to find what you're looking for. You now have one-click access to Tempo views and applications from everywhere in the product. This change also improves the performance of the UI. For more information about navigation changes, see [Navigation changes in Tempo Timesheets 9.0](#)³¹³.

- Tempo calendar and worksheets are now accessed by clicking **My Work** in the sidebar or on the **Tempo** menu.
- Team planning and resource planning are found under **Planning** in the sidebar or on the **Tempo** menu.
- We've also started to move Tempo configuration to a dedicated **Tempo Settings** page, making them more accessible to the people that need them. Budget users can now manage Team and Account configurations, as well as issue Expense categories from Tempo Settings, accessible via the new Tempo sidebar navigation. With this release, you can easily access global configuration settings for the following categories by clicking the Settings icon  in the Tempo sidebar.
- **Improvements**
 - When logging work, you can now configure the issue picker to show favorite issues and Jira filters. Click [here](#) to see [how](#)³¹⁴.
 - Reporting optimization. All reports accessible from one location. Users are now able to export PDF reports for multiple accounts from the Report Overview, instead of from the Accounts browser.
- **Feature Removal**

312. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/315490361/2018-11-01+Big+changes+coming+soon+to+Tempo+Server#id-2018-11-01|BigchangescomingsoontoTempoServer-Reportingoptimizations>

313. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/362676450>

314. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/877068762/Log+Time+Form++Tempo+Server>

- **Planning for others.** Calendar is now the default view in Timesheets, and there you maintain the ability to plan time for yourself. This is to facilitate better time tracking – plan your work in advance and convert the plans to worklogs. Tempo also offers [Planner](#)³¹⁵, a powerful tool that helps you easily manage your resource planning to effectively plan your resources.
- **Support for Jira issue security.** Jira's issue security feature is no longer supported in Tempo which means that Tempo reports will display the issue summary, even when there is an issue-level security scheme configured for that issue.
- **Account approvals.** We've removed the Account approvals feature in order to make the user interface more coherent and focused on time tracking.
- **APIs:** The existing APIs don't support the new permissions, among other items (for example, invalid worklogs). Therefore we've made updates to our APIs. [Click here](#)³¹⁶ for information about these changes.
- **JQL filter in User Timesheet:** Filtering based on issues is no longer possible in the user timesheet. Users can create worklog reports filtered by issues using Tempo Reports.

Changes in Tempo Timesheets 9.0.0

Navigation

We've made navigation improvements to put focus on specific use cases and we're moving towards a single reporting tool to satisfy the reporting needs of our customers. *In context* reports are still available so that users can quickly access timesheet reports for specific users, teams, or accounts, but with this change users are no longer able to context switch directly from context specific timesheets report. Instead, users can create and save reports filtered on users, teams, accounts, projects, and more in the Tempo Reports overview. The new Tempo sidebar navigation provides quick access to Tempo Reports.

Reporting

We are upgrading Tempo reporting technology which means that timesheet reports are now powered by our new, more robust and flexible reporting engine. There are several changes that users will notice when using the new timesheets. In general, users will notice more user friendly reports that provide more flexibility for presentation, and better quality exporting options.

Here are some of the most noticeable changes:

- **Report layout and content**
 - The timesheet, calendar, report, and list views have been consolidated to Calendar and Timesheet, where Timesheet can be represented in grid view or list view.
 - Tempo Calendar and Timesheet are now accessed via **My Work**, with Calendar being the default view.
 - Timesheet reports now have more grouping options.

315. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/252052035>

316. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/332267631/2018-11-01+API+Changes+with+upcoming+Server+release>

- Timesheet reports now have more granular column controls.
- Timesheet reports now have more exporting options.
- Timesheet reports now allow users to select from different date and time formatting options.
- Users with **Edit Own Worklogs / Edit All Worklogs / Manage Team Worklogs** permission can move and split worklogs
- External hours are not displayed in the new Tempo reports.
- Invalid worklogs are no longer supported and invalid worklogs warning is not displayed in Tempo reports.
- Weekly totals are not displayed in reports by default. To view totals users must adjust the reporting period to the appropriate time frame using the date picker.
- To Date totals are not displayed in reports by default. To view To Date totals users must adjust the reporting period to the appropriate time frame using the date picker.
- **Exporting Reports**
 - A print option is available for all Tempo Reports which allows users to print or save reports to a PDF file exactly as they appear in the user interface.
 - The People tab in the CSV and XLS/XLSX format is now called Users. Planned tab is no longer available in the CSV and XLS/XLSX format.
- **Timesheet reports**
 - **User Timesheet**
 - Filtering based on issues is no longer possible in the user timesheet. Users can create worklog reports filtered by issues using Tempo Reports.
 - Approval log is now accessible through the submit dropdown in calendar and timesheet.
 - User Preferences are no longer accessible from the user timesheet:
 - **Users are not able to view or edit workload or holiday schemes.**
 - This is now accessible to *Tempo Administrators* and *Tempo Team Administrators* via **Tempo Settings** → **Working Days**.
 - **Users are not able to select the default supervisor.**
 - **Users are not able to adjust email settings.**
 - **Team Timesheet**
 - View timesheet for individual team.
 - Approval log is no longer accessible directly from the Team Timesheet.
 - User Preferences are no longer available from the team timesheet:
 - **Users are not able to view or edit workload or holiday schemes.**
 - This is now accessible to *Tempo Administrators* and *Tempo Team Administrators* via **Tempo Settings** → **Working Days**.
 - **Users are not able to select the default supervisor.**
 - **Users are not able to adjust email settings.**

- **Account Timesheet**

- Account approvals are no longer supported in Tempo Timesheets.
- The account timesheets no longer include the monthly budget in hours. The monthly account budget is still available in the Account Monthly Budget Burnup Chart gadget.
- Filtering is no longer available in the Account Timesheet. Instead, users can use Tempo Reports to filter on Customers, Accounts, Account Categories and Account Category Types and much more.

- **Agile Timesheet**

- The Agile Timesheet is no longer supported.

Teams

- **Team Overview**

- The Team overview page design has been improved and consolidated to a single page, where users can view all attributes of the teams and make configuration changes. The permission configuration page is still a separate page and is accessed via the cogwheel in the page header.
- Workload and holiday schemes are no longer available through the Team page. Instead, users can view and manage these settings through Tempo settings.
- The **Mission** field, where you could enter the team's mission, has been replaced by a larger field called **Summary**.
- Deactivation of team memberships is not supported. A membership can be deleted when it is no longer relevant/required.
- Creating multiple memberships for the same user in a single team is not supported.
- Creating placeholder memberships for non-Jira users is no longer supported. NOTE: anonymous members that were added to Tempo Teams before upgrading to Timesheets 9.0.0, will still exist as team members of those teams.

- **Creating Teams**

- We have added a **create another** option to the create Team dialog box to help creating many teams in succession.

Accounts

- **Unaccounted Hours**

- The Unaccounted Hours report has been replaced by Tempo Reports. Users can find worklogs that have no account by *Grouping By Accounts*. This has the added benefit of including worklogs where the account work attribute is used.

- **Accounts Browser**

- Accounts settings previously accessible via the Manage drop-down in the Accounts Browser, are now accessible via Tempo Settings in the Tempo sidebar. This includes Account Categories, Import / Export Accounts and Price Tables.
- The Export Timesheets Reports for downloading multiple Account timesheets as a PDF file is now accessible via Tempo Reports. Multiple Account timesheets can now be downloaded in a PDF format using the ... menu at the top right.

- Predefined search filters are no longer available in the Accounts browser.
- **Account Overview**
 - The Accounts overview page design has been improved and consolidated to a single page, where users can view all attributes of the accounts and make configuration changes.
 - Teams linked to same projects as an Account are no longer displayed in the Accounts overview page.
- **Creating Accounts**
 - Users can now link project to Accounts directly in the Create Account dialog box.
 - We have added a “create another” option to the Create Account dialog box to help creating many accounts in succession.
 - Creating Customers and Categories on the fly is no longer supported. Users can only select from already existing Customers and Categories. Customers can be created in the Customers browser. Account Categories can be created in Tempo Settings.

Tempo Settings

A number of Tempo settings previously accessible through the Jira Administration page or the Teams

or Accounts Browsers, have been moved to the Tempo Settings accessible on the **Tempo sidebar**.

- **Configuration**
 - **Permission Overview** provides an overview of how permissions are used in Tempo.
 - **Internal Issues** configuration. Ordering of internal issues is no longer supported. Internal issues *Activity* is no longer supported.
 - **Work Attributes**
 - **Expense Categories**
- **Working Days**
 - **Workload** and **Holiday** schemes. We’ve added the functionality to search for scheme members to make changes to scheme memberships easier.
 - Users with the Tempo Team Administrator permission can now view and edit Tempo Working Days.
- **Periods**
 - **Period Configuration**
- **Teams**
 - **Team Roles**
- **Accounts**
 - **Import / Export** Accounts. This was previously accessed through the Accounts Browser.
 - **Account Categories**. This was previously accessed through the Accounts Browser.
 - **Price Tables**. This was previously accessed through the Accounts Browser.

Jira Administration

There are a few changes to the configuration options in the Jira Administration **Add-ons** settings.

- Field settings can now be found under **Custom Fields**.
- The invalid worklogs feature is no longer supported. This includes the *Expression* for validating worklogs.
- The worklog validation is no longer supported.

Planning

You can no longer plan work for others in a timesheet. You maintain the ability to plan work for yourself in the Calendar, which is now the default view, and you can also use Tempo Planner manage your resource planning.

Removed from Timesheets, but available with Planner:

- Plan time (other than for yourself).
- Plan approval (in Team/User timesheet).

Removed from Tempo:

- Overview of plans in timesheets (comes with Planner).
- Resource capacity features in timesheets (color coding).
- Planned tab in excel export.

2018-11-15 | Tempo Timesheets for Server 8.15.2 Release

This release of **Tempo Timesheets for Server** includes a number of bug fixes.

• Improvements

- *Data-attributes* have been added to Work Attribute fields in the Custom Report to enable extensions to Tempo work attribute fields.

• Fixes

- Fixed: Tracker start and stop buttons do not take focus when using the **Tab** key.
- Fixed: Not possible to log work through Jira gadgets or User Timesheet gear icon (cogwheel).
- Fixed: Log work option is not working in the issue detail view on the agile board.
- Fixed: The issue menu remains open when logging work on sub-tasks in the issue view.
- Fixed: NullPointerException when trying to export report that contained worklogs from users that have been deleted in Jira.
- Fixed: Old user name is displayed in the the Weekly timesheet status email after the user name has been changed.
- Fixed: Approved timesheet email notification is not sent to users when approving the timesheets through the User Timesheet view.
- Fixed: The Jira **Log work** option is not available on the **More** menu in the Issue view after installing Tempo Timesheets.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³²¹ (UPM).

2018-10-11 | Tempo Timesheets for Server 8.15.0 Release

Tempo Timesheets 8.15.0 introduces the ability for administrators to control content displayed to certain users or roles, as well as a variety of bug fixes.

• New Features

- You can now control which users can access the Tempo Timesheets add-on for Jira ([view announcement](#)³²⁵). The access is managed by configuring the [Tempo Timesheets Access global permissions](#)³²⁶ in Jira. Timesheet reminder notifications will not be sent out to users without access to Tempo Timesheets.

• Fixes

- Fixed: When creating issues, the team order in the **Teams** custom field is inconsistent. Now the teams are ordered alphabetically.
- Fixed: Both Jira and Tempo dialogs are shown when logging work through the "." keyboard shortcut.
- Fixed: A weekly approval period is shown as a monthly period in the Timesheet view.
- Fixed: Team members added by group are not shown in the Approval report.
- Fixed: A rounding issue in the User Timesheet gadget when logging time with more than two decimals.
- Fixed: When searching for worklogs via REST APIs, the date range search constraints are not respected when a team member has a membership ending in the said date range.
- Fixed: The user key link to view User Reports results in an error. Links to the Account and User Report have now been fixed. Clicking any link in the key column of the new reports, will open the link in a new tab.
- Fixed: Error when loading Account Burn Up gadget with more than 1000 account worklogs on Oracle database.
- Fixed: New reports do not display work attribute values that have been deleted.
- Fixed: Memory leak in javascript.

2018-09-13 | Tempo Timesheets for Server 8.14 Release

This version offers improved print options for reports and an easier navigation in the Accounts browser.

• Improvements

- We have optimized Tempo reports for printable media, providing you with better tools to print reports. The improved **Print** option opens the report in a preview tab, where you can change the orientation of the report before printing. You can save the report to PDF using the browser print options.
- The export options in Tempo reports are now organized into *Export Report* and *Export Data* for improved usability.
- Users with **Timesheets** and **Planner** installed can now report on plans in the Custom report.

• Fixes

- Fixed: Tempo Timesheets has a timeout parameter set to 10, should be 60. Now Tempo plug-ins have been configured with the same timeout values as others on Jira Server start-up.
- Fixed: Incorrect calculation of remaining estimate.
- Fixed: Shortcut bug for Polish keyboards.
- Fixed: Users that do not have the permission to log work on Issues in any Project are displayed in the list of users that receive emails from the Scheduler.
- Fixed: Error rendering 'is.origo.jira.tempo-plugin:collaboratorsmodule'. Collaborators panel now supports large allocation queries on Oracle SQL.
- Fixed: Users with correct permissions cannot edit plans for themselves or other users if the plan was created by another user.
- Fixed: Team members that do not have *Approve Timesheets* permission cannot select their Team on the Jira dashboard gadgets. Now *Browse Team* permission is required instead of *Approve Timesheet* permission to select the Team in the Timesheets/Team Hours gadget.
- Fixed: Error when trying to view the Timesheet using the link in the approval email. Now the correct link to user Timesheet is provided in the approval email.

- Fixed: When sharing a Jira filter with a group of users, this filter is not available in the Custom Report JQL filters.
- Fixed: Misleading error message when trying to log work in a closed period.
- Fixed: Filters not shown in advanced Timesheet. Now you can include characters such as +, -, *, and ? in the search when searching for filters in the advanced Timesheet.
- Fixed: Deleting a Jira group times out due to Tempo database queries. Now we only re-index teams where the deleted group had a membership when deleting a Jira group.
- Fixed: AO_2D3BEA_USER_INDEX table is cleared and repopulated every time a node is restarted. Now we do not re-index users on plugin install when less than 30 minutes have passed since the last index was run.

	Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager³³¹ (UPM).
	This release is compatible with products listed in the Compatibility Page³³² and comes bundled with the following Tempo plugins: Click here to view plugins bundled with this release... • Tempo Core 4.13.0 • Tempo Accounts 3.12.0 • Tempo Teams 3.12.0 • Tempo Planning API 3.18.0 • Tempo Budgets 11.13.0

2018-08-31 | Tempo Timesheets for Server 8.13.2 Release

Tempo Timesheets 8.13.2 is now compatible with Jira for Data Center.

Tempo Timesheets for Jira Data Center

- Tempo Timesheets is now compatible with Jira for Data Center

2018-08-30 | Tempo Timesheets for Server 8.13.1 Release

Tempo Timesheets 8.13.1 introduces a new panel in the Issue view and report improvements, as well as bug-fixes across the product.

- **New Tempo panel**

- A new panel is being introduced in the Jira Issue view, combining the two existing Tempo panels. The new panel shows worklogs and plans you have permission to view ordered by date. It is possible to filter the panel to show only your data or all data. It is also possible to show both worklogs and plans, or only one at a time. Tempo stores your panel settings between issues.
- Tempo entries are no longer edited in-line, but in an update form for the worklog/plan. Previously, the editing of worklogs was limited to the few fields displayed, but in the update form you can edit all worklog/plan fields. Prior to this change, plans could not be edited in the issue.
- The worklog history is now displayed as a tab at the bottom of the Jira Issue view, labelled as "Worklogs". As before, you will only see worklog data that your permission settings allow you to view.
- We have introduced improvements to expenses that allows managers with the appropriate permissions to view, edit, and delete other users expenses.
- The general appearance of dialog boxes has also been improved.

- **Tempo Reports Improvements**

- Date and time preferences. You can now change the date and time formats directly from Report Preferences when creating Tempo reports.
- We've made improvements to layout and naming of columns in Tempo reports, better aligning the columns with the columns control.
- Anonymized worklogs are consolidated at the top level in **PDF** reports, regardless of grouping.

- **Bug fixes**

- When you type a name that does not exist in the Team field in the Issue view or Edit issue view, the name you typed is now saved in the Team Field.

- Fixed an issue where the Team field in the Issue view was not displayed when "Anyone" viewed the issue (a user that is not logged in but has the Browse Project permission).
- Plans are now correctly ordered by start time in the My Work Calendar view.
- When users get the **No Access** notification in Tempo Timesheets, it means the current user doesn't have *Jira Browse Projects* permission for the particular project in question. Users without this permission can't view any project issues, worklogs or plans.
- The **Team** custom field now inherits the value set in the linked epic when creating issue.
- Fixed an issue where new attributes were not added at the bottom of the Work Attributes static list. Attribute items can also be reordered in the list.
- A user that has the *View All Worklogs* permission can view the Timesheets for other users in a given project without having the *Approve Timesheets* permission.
- The User Timesheet and Team Timesheet gadgets in Firefox now display all dates correctly.
- Fixed an issue where the Accounts Hours By Customer gadget displayed accounts with zero (0) worked hours.
- Fixed an issue where it was not possible to show time and expenses for one day in the Time and Expenses report.
- The Expense form now accepts both a period (..) and a comma (,) as a delimitator, depending on the user's locale.
- Inactive team members are no longer shown in the team approval log.
- Tempo supports up to 15 letters in the date field – if the date is longer, the rest is shown on hover.
- Fixed an issue where Calendar would not resize when showing approval banner.

Upgrading to Tempo 8.13.1 is free for all customers with an active Tempo license. If you are using JIRA Server, you can upgrade Tempo via the JIRA [Universal Plugin Manager](#)³³³ (UPM).

This release is compatible products listed in the [Compatibility Page](#)³³⁴, and bundled with the following **Tempo System Plugins**:

- Tempo Core 4.12.0
- Tempo Accounts 3.11.0 Plan Core 3.17.0
- Tempo Teams 3.11.0
- Tempo Planning API 3.16.0
- Tempo Budgets 11.12.0 Platform 1.11.0

333. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

2018-06-18 | Tempo Timesheets for Server 8.12 Release

Tempo Timesheets 8.12 includes a new Report Overview, the ability to add Required Hours to Tempo reports, the choice of any day of the week as the start of the work-week, as well as a variety of bug fixes.

18 June 2018 - **HOTFIX**

- Fixed SQL exception when querying PERIOD_CONFIG table on Timesheets 8.12.1.

15 June 2018

New Features & Improvements

- **New Report Overview** lets you save custom reports and get quick access to targeted reports using report templates.
- You can now choose to include sub-tasks when filtering on issues in Tempo reports.
- Plan approval is now enabled by default. You access this setting from Global Configuration.
- We have made improvements on filtering data in Tempo Custom Reports. This reduces wait time when there is a lot of data to be processed.
- The issue key of parent issues is now prefixed to the issue summary of sub-tasks in Tempo reports.
- Users can now see totals for planned, billable, and worked hours in the List view of Tempo reports.
- You can now add a **Required Hours** column to Tempo reports that shows hours required based on the user's workload scheme. This option is available when grouping by users.
- Custom fields implemented as dynamic dropdowns are now supported in the Log Work form used in the My Work Calendar view and in Tempo Reports.
- The Period page is now called Period Configuration. Selecting between weekly and monthly periods is now accessed from this page.
- Timesheet approval is now enabled by default and can no longer be disabled. You can select between a monthly and weekly Timesheet approval from the Period Configuration page.

334. <https://tempoplugin.jira.com/wiki/spaces/TD/pages/247573282/Tempo+Product+Compatibility>

- If weekly approvals are enabled, you can now quickly switch between monthly and weekly periods from the date-picker in Reports.
- You can now choose any day of the week when you opt to configure the start day of the work-week.
- When you have defined a second period, you can now access it directly from the Periods section in the date-picker.
- My Work gadget is a new user agenda style gadget in Tempo that shows the user schedule for the day. The gadget can both display planned and worked time as well as how user work logs are progressing towards planned time.

Bug fixes

- Fixed an issue where the **Log Work** button, under the **More** dropdown in Issue view, did not work Jira 7.10.
- Fixed MsSql compatibility issues in Timesheets upgrade task no. 736.
- Fixed a bug where in the new Custom Report, issue links would not work with a custom contextPath.
- The date-picker now works correctly when you add an expense in the issue. This is fixed for Jira versions 7.4.0+.
- An issue where an empty Account work attribute value was displayed in reports and included in export has been fixed.
- Fixed issue picker field width when converting tracker to worklog.
- Fixed an issue where users with *Approve Timesheets* permissions were not able to grant themselves a grace period and edit their own worklogs.

	Upgrading to Tempo Timesheets 8.12 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ³³⁵ (UPM).

2018-05-10 | Tempo Timesheets for Server 8.11 Release

This release includes bugfixes for Tempo Timesheets: when sending scheduler emails, messages will be sent out if the instance or user profile settings for "email type" are set to "text", users can now filter by Jira filters in Custom Reports, icon sizes in Custom Report headers have been fixed, and more.

• Bugfixes

- When sending scheduler emails, messages will be sent out if the instance or user profile settings for "email type" are set to "text".
- Users can now filter by Jira filters in Custom Reports.
- Icon sizes in Custom Report headers have been fixed.
- Plan approval links now work for users that have been renamed.
- Logging work with commas now works with all languages.
- The Worklog Calendar View now displays correctly in Firefox whenever the window is resized.
- For 3rd party integrators to our server plugins: When updating worklogAttributeValue in Report or List view, we now include the worklog when throwing the "Worklog Updated Event".
- The number of REST calls sent from the Timesheets view has been reduced.
- An error where the scheduler was sending emails continuously when a user did not have an email address configured in Jira has been fixed.

Upgrading to Tempo Timesheets for Server 8.11 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³³⁷ (UPM).

337. <https://confluence.atlassian.com/display/JIRA/Managing+Add-ons>

This release is compatible with products listed in the [Compatibility Page](#)³³⁸ and the following Tempo plugins.

2018-04-12 | Tempo Timesheets for Server 8.10 Release

This release includes bugfixes, and improvements towards more powerful reports for Tempo Timesheets for Server. Additionally, to ensure accurate reporting and data transparency, users with the Approve Timesheets permission can no longer approve their own timesheets.

• Improvements

- More powerful custom reports are now available on Tempo Timesheets server.
- To ensure accurate reporting and data transparency, users with the Approve Timesheets permission can no longer approve their own timesheets.
- For 3rd party integrators to our server plugins: We've added documentation and sample code to demonstrate how to listen to Events fired by Tempo, e.g. when Team/Account/Folio/etc was created/updated/deleted.
- All emails that are sent from Tempo have been redesigned to focus on the action required, and to deliver key information at a glance. The text part of the emails is no longer supported and the new emails are exclusively in English. Customers that have modified the scheduler emails will keep those emails and will not be receiving the new layout of the scheduler emails.

• Bug fixes

- A problem where you could add, delete and edit expenses on a non-editable issue has been fixed.
- Wrong Accounts/values displayed in dropdown when editing work attributes has been fixed.
- Issue when editing items in a static list did not generate the same results for the work attribute in the Report view and exports files has been fixed.
- Dynamic list work attribute with a single value is auto-selected when that work attribute is configured as a required field.
- Issue where you could not type directly in User search field has been fixed.
- The Work Attribute page now displays correctly in IE11.
- Comments made when a reviewer approves or rejects planned work are now correctly appended to the Tempo Plan Approval email notifications.

- When editing a worklog description that includes line breaks the text is now correctly displayed on multiple lines.
- When editing a worklog description that includes one or more commas, the commas now persist when viewed in the Jira issue view or the user timesheet.
- Issue where users could not edit the worklog description in the Issue view when there was existing description text has been fixed.
- An error was preventing content from being properly parsed to XML when exporting worklogs using the servlet on some environments. This could cause inconsistency in data in some cases.

2018-03-08 | Tempo Timesheets for Server 8.9 Release

This release greatly increases the number of accounts that can be associated with a project - to more than 1000. We've also included some bugfixes with Timesheets 8.9.

- **Improvements**

- The account picker now allows more than 1000 accounts associated with a project.

- **Bug fixes**

- Inactive users who were added to a team as a member of a Jira group are no longer shown as team members provided they do not also have membership as an individual. An individual inactive member is still shown in the team list.
- When editing an issue in a project with a default account, or a single linked account the account is no longer automatically selected.
- Long words in worklog calendar view description wrapping into multiple lines in Firefox.
- When bulk-moving sub-tasks to another parent-issue in the same project, the Account field retains its values as originally set.
- Fixed a problem where some worklogs could not be copied in the Worklog Calendar. Also, we've added a feature where you can use the ALT button as a hotkey to copy Worklogs. Please note that you must have focus on the Worklog Calendar before copying or using the hotkey.
- Rounding error of plans in timesheets is now fixed.
- Export for the option of "All accounts" now works.
- Fixed - pressing the 'w' key when an issue is selected now opens the Log Work dialog box.
- Timesheets table behaves properly on Edge browser.
- A month is now correctly displayed so that you can successfully plan for team members when language is set to Russian or German.
- The Unaccounted Hours report supports larger numbers of issues. There is a performance boost of approximately 50%.

	Upgrading to Tempo Timesheets for Server 8.9 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager³⁴⁷ (UPM).

2018-02-08 | Tempo Timesheets for Server 8.8 Release

Tempo Timesheets for Server 8.8 has been released. It includes new functionality where you can use teams a custom field for your issues, event listening functionality in the Tempo REST API, and configurable options for both the team field and the role settings under Configurations in the Tempo Teams section of the Administration section.

New Features

- Team role has been [added as a custom field](#)³⁵¹. You can define a team role and include it in your issues.
- Events have been created on the main Tempo entities so that customers can [now listen for those events](#)³⁵² and customize their apps.
- You can now choose to make [the team field mandatory](#)³⁵³, and [have the ability to rename it](#)³⁵⁴, if you are using Jira Portfolio, it also has a field labeled 'team'.
- Both the [team field and role settings](#)³⁵⁵ can now be configured under Configurations in the Tempo Teams section of the add-on administration page. The 'Account configuration' page has been renamed to 'Configuration'; it is still found the Tempo Accounts section.

Bug fixes

- The username is now correctly displayed so that a user can be moved between Workload Schemes.
- List of reviewers in Plan Time dialog in Timesheets is fixed. The list of reviewers should be users with Plan Time permission.
- The '500' error that occurred when changing the period start date a second time is fixed.

354. <https://tempoplugin.jira.com/wiki/spaces/TEAMS/pages/62455856/Renaming+the+Tempo+Team+custom+field>

355. <https://tempoplugin.jira.com/wiki/spaces/TEAMS/pages/59506706/Team+roles>

- Incorrect ordering of columns in Accounts import validation screen is fixed.
- The scheduler is now properly closing the period for time registration.
- Fixed incorrect display of user picker custom field in Timesheets export.
- Incorrect worklog sum in the User Timesheet gadget is fixed. The total hours logged now add up correctly.
- Fixed issue where Tempo actions are not available when only Planning Approvals are enabled.
- A character display error in notification emails is fixed.
- Plan per day now works as intended, showing the correct number of hours for each day of the plan.
- Dynamic dropdowns are now accepting multiple parameters in the URL when logging work in the issue view.
- Improvement to how we search through group permissions when loading up the User Timesheet ensures better performance.
- Fixed the dead link in Team Calendar when browsing component plan.
- A user with Approve Timesheets permission can now change the Holiday scheme for a team member.

	Upgrading to Tempo Timesheets for Server 8.8 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ³⁵⁶ (UPM).
	This release is compatible with products listed in the Compatibility Page³⁵⁷ and the following Tempo plugins. Click here to view plugins bundled with this release... • Tempo Core 4.7.0 • Tempo Accounts 3.6.0 • Tempo Teams 3.6.0 • Tempo Planning API 3.12.0

2018-01-11 | Tempo Timesheets for Server 8.7 Release

This release for Tempo Timesheets for Server includes a new version of the worklog calendar. In the new Worklog Calendar, issue suggestions have been replaced with plans. By clicking on plans, the user can log hours directly onto the plan. The release also includes a number of other improvements, bugfixes, and database changes.

Database changes

- Upgrade task to save inherit values where before the inheritance was implicit.

Improvements

- A new version of the Worklog Calendar has been released. In the new Worklog Calendar, issue suggestions have been replaced with plans. By clicking on plans, the user can log hours directly onto the plan.
- The [Global Configuration](#)³⁵⁸: 'Maximum hours per day per user' has changed. The setting 'Unlimited' is no longer capped at 99 hours per worklog, and is now unlimited.
- When exporting Excel from getWorklog servlet, the user can choose to show or hide the issue and worklog details by using the flag parameters addIssueDetails and addWorklogDetails, respectively.
- Inherit value is saved explicitly when an issue inherits a [Team from a parent issue or Epic](#)³⁵⁹. The release includes an upgrade task to save inherit values where before the inheritance was implicit.

Bug fixes and minor improvements

- Customers with MySQL database can not delete plans - Fixed
- Accounts could not be removed from an issue if the project was no longer linked to the account - Fixed
- Suggestions for Account JQL functions were not working - Fixed

358. <https://tempoplugin.jira.com/wiki/spaces/TEMPO/pages/172785868/Configuring+worklog+options>

359. <https://tempoplugin.jira.com/wiki/spaces/TEAMS/pages/50364563/Teams+Custom+Field>

- Plan per day field in Plan Time form shows total number of hours planned when a plan is created for multiple days, instead of hours per day - Fixed
- Upgrade tasks causing problems in upgrading to newer versions - Fixed
- Inactive users were fetched in the user picker that caused performance problems on some JIRA instances - Fixed
- Changes of work attribute value with special characters are not displayed until after refresh - Fixed
- Broken links in Plan approval email - Fixed
- Reviewers, other than Team Leads, cannot be selected when submitting timesheets from approvals page - Fixed
- Worklogs disappear when moved to issues with the `jira.permission.work.denied=true`³⁶⁰ property set - Fixed
- The keyboard shortcut 'w' did not work in the Dashboard view - Fixed
- Users cannot scroll to the latest worklog in the worklog calendar - Fixed
- Endless spinner in Worklog Calendar if the logged-in user cannot be assigned to any issue -Fixed
- In some cases, the original estimate is updated when a user logs work - Fixed
- API token is not working for the getWorklogReport -Fixed
- tempoEpicIssues JQL function causes performance problems on JIRA instances if it's returning a large number of issues - Fixed

2017-11-13 | Tempo Timesheets for Server 8.6 Release

This release includes some improvements to make loading work attributes faster, and also a new feature that allows account managers to set Revenue Targets when creating new accounts. There are also some bugfixes and database changes in this release.

- **Database changes**

In this release we're adding DB columns. The following columns are added:

LAST_UPDATED_BY added to table AO_2D3BEA_WORKFLOW
and column

REQUESTER_KEY to table AO_2D3BEA_PLAN_APPROVAL_LOG

Improvements

- Improve speed loading values for specific worklog attribute
- Improve speed loading work attributes of a specific type
- Work attributes configuration page blank in IE11
- As an account manager, I would like to be able to set the Revenue Target when creating a new account

Bug fixes

- Bulk editing account field value is not respecting Account-Project links when bulk editing for multiple projects
- Can't remove account after it's no longer linked to the project
- Issue panel: lower_user_name arguments SQL query crashing a jira instance
- Time Planning different with Tempo Budget/Timesheet
- Dynamic dropdown work attribute dependent on account work attribute doesn't work
- Logging work should never impact "Original Estimate" of an issue

Upgrading to Tempo Timesheets for Server 8.6 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)³⁶⁷ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)³⁶⁸ and the following Tempo plugins.

2017-10-16 | Tempo Timesheets for Server 8.5.1 Release

This is a hotfix for Tempo Timesheets for Server.

• Bug fix

- Customers with Oracle DB are getting the following error after upgrading to version 8.5.0: `java.sql.SQLException: ORA-01408: such column list already indexed`.
In 8.5.0 we released a new DB table and two upgrade tasks.
Upgrade task no. 734: Migrate previous worklog externals (from JIRA property table) to new worklog external property table.
Upgrade task no. 735: Migrate global configuration property `LogWorkWithStartTime` to `StartAndEndTimesEnabled`.
This has now been fixed.

	Upgrading to Tempo Timesheets for Server 8.5.1 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ³⁷⁵ (UPM).
	This release is compatible with products listed in the Compatibility Page³⁷⁶ and the following Tempo plugins. Click here to view plugins bundled with this release... - Tempo Core 4.4.0 - Tempo Accounts 3.3.0 - Tempo Teams 3.3.1 - Tempo Planning API 3.9.0

2017-10-11 | Tempo Timesheets for Server 8.5 Release

This release includes improved speeds in loading account timesheets, and bug fixes that correct problems with Work Attributes, BillingKey and ProjectKey parameters in Servlet API, the account custom field, missing emails when submitting Timesheets and approving or rejecting, and link errors in the emails sent.

• Improvements

- Improve speed loading account timesheet when no account worklog attribute is defined

Bug fixes

- Customers not receiving events when Work Attribute is updated
- BillingKey & ProjectKey parameters are not respected in Servlet API
- Empty account fields are displayed as null (null) in notification emails for each notification as long as no Account is selected for the issue.
- The Account custom field gets the variable not the value
- Two Dimensional Filter Statistics Gadget drill down for "None" Account doesn't work
- Account Contact always saved in lower case when NOT Jira user
- Submitting Timesheets and approving/rejecting does not generate an email
- Timesheet approval request: 404 error trying to navigate to the link in the email
- Timesheet approval request email: "Worked" field is always "0"

Other

- Customers with Oracle DB are getting the following error after upgrading to version 8.5.0: java.sql.SQLException: ORA-01408: such column list already indexed.
In 8.5.0 we released a new DB table and two upgrade tasks.
Upgrade task no. 734: Migrate previous worklog externals (from JIRA property table) to new worklog external property table.
Upgrade task no. 735: Migrate global configuration property LogWorkWithStartTime to StartAndEndTimesEnabled.

- We are aware of this problem and are working on a hot fix to solve this problem. Estimated fix date is October 16th.

	Upgrading to Tempo Timesheets for Server 8.5 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ³⁷⁷ (UPM).
	This release is compatible with products listed in the Compatibility Page³⁷⁸ and the following Tempo plugins. Click here to view plugins bundled with this release... • Tempo Core 4.4.0 • Tempo Accounts 3.3.0 • Tempo Teams 3.3.0 • Tempo Planning API 3.9.0

2017-01-05 | Tempo Timesheets for Server 8.2 Release

- In this version we're introducing a completely new UI for creating work attributes (learn more about work attributes [here](#)). A new type of work attribute is now available: the static list. This is a simple drop-down list that allows you to define the list items in Tempo Timesheets. Furthermore, we are removing the Script type work attribute.

• Improvements

- In [413](#), [414](#), [415](#), [416](#), [417](#), [418](#) release, we're making work attributes easier to use by introducing a completely new UI. A new type of work attribute – the static list – is now available, allowing Tempo administrators to quickly create drop down lists and allowing users to fill out when they log work.
- In Timesheets 8.2 we're removing the script work attribute type. If you are not using this feature, this will not affect your Tempo setup, and you don't have to read further. This feature removal will affect the dynamic drop-downs that are populated in the URL (select list) but will not affect dynamic drop-down lists which get information from a REST service.

• Improvements

- Numeric work attribute to support decimal separator define by profile language
- Improvements to Spanish translations
- Remove "like Christmas" and "like Easter" text from holiday scheme configuration screen

• Fixes

- Migration problem when upgrading Budgets - fixed
- Unable to hide Worklog Calendar issue panel - fixed
- Unable to use "," in numeric input fields in Worklog Calendar - fixed
- Numeric type work attributes don't accept comma as decimal separator - fixed
- Error "Maximum number of cell styles exceeded" when exporting reports to excel - fixed

2022-12-13| Tempo Timesheets for Server 16.2.0 Release

This **version 16.2.0 of Tempo Timesheets** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed an issue where the timeline on top disappears when scrolling in **My Work** view.
- Fixed an issue where the Team Timesheet configuration was lost when reloading the page.
- Fixed an issue with the tracker showing an error while closing and not logging time.
- While changing from a sub-task to a task with the inherited account set as "**None**", it shows a blank Account field.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁴²⁵ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Timesheets for Server is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁴²⁶ (UPM).

2023-04-20| Tempo Planner for Server 16.5.0 Release

This **Version 16.5.0 of Tempo Planner** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed an issue with date picker in the **Plan Time** form that validates the correct format.
- Changed the information text in the UI when generating a new report.
- Jira issue history shows the value "null (null) [0]" when **Inherited from parent** is selected in Jira sub-task.
- **Planning** tab is missing from Teams when the legacy feature is enabled.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁴⁶² to find a list of features we are planning to deprecate and determine whether it will impact your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Planner](#)⁴⁶³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁴⁶⁴ (UPM).

2022-12-13| Tempo Planner for Server 16.2.0 Release

This **Version 16.2.0 of Tempo Planner** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed an issue with Resource Planning where settings were not retained even when the user navigates to different Jira or Tempo pages.
- While changing from a sub-task to a task with the inherited account set as "**None**", it shows a blank Account field.

IMPROVEMENTS

- Improved the performance of Planned Time Report.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁴⁷⁹ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2022-11-23| Tempo Planner for Server 16.1.0 Release

This **Version 16.1.0 of Tempo Planner** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed an issue with the Plan import teams filter.
- Fixed an issue where the *AllocationUpdateEvent* was not being published when reassigning plans from the context menu of a single plan.
- Fixed by creating a new event named *PlanReassignmentCreatedEvent* published every time a user reassigns plans in batch to a different user.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁴⁸³ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Planner](#)⁴⁸⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁴⁸⁵ (UPM).

2022-10-18| Tempo Planner for Server 16.0.0 Release

We've released **version 16.0.0 of Tempo Planner** which is compatible with **Atlassian's Jira 9.x** platform. This version contains improvements.

The option to export to PDF in **'Export to PDF'** and **'Download Account Report to PDFs'** in reports is removed due to security reasons. See the [KB article](#)⁴⁸⁷ for workaround options.

IMPROVEMENTS

- Improved: The performance on the Resource Planning page is improved.
- Improved: Email notifications are added to supported languages: German, Spanish, Portuguese, French, Russian and Chinese.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁴⁸⁸ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Planner](#)⁴⁸⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁴⁹⁰ (UPM).

2021-02-15 | Tempo Planner for Server 8.2.0 Release

We've released **version 8.2.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This release restores the full functionality of the Team Timeline for customers who have upgraded to Jira 8.15.

FIXES

- Fixed: Team Timeline is not working in Jira 8.15
- Fixed: Fixed discrepancy in Grid View (Weeks) splitting reports when in "Create Printable View"
- Fixed: Gradual slowdown in issue search when navigating often while Tempo is installed and enabled

	Upgrading Tempo Planner⁶¹⁸ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁶¹⁹ (UPM).
	This release is compatible with products listed in the Compatibility Page⁶²⁰, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 8.2 • Tempo Accounts 8.2 • Tempo Planning API 8.2 • Tempo Teams 8.2 • Tempo Platform - JIRA 8.2 • Tempo Platform API 8.2

2021-02-10 | Tempo Planner for Server 8.1.0 Release

We've released **version 8.1.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This includes a new feature which allows customers to import plans from Jira issues.

This latest version of Tempo Planner gives you the option to import Jira issues in order to automatically create plans for your resources. By importing the data that's already in the Jira issues – including assignee, estimate (hours) and due date – you can now easily create plans in the Resource Planning view and reduce the amount of time and effort needed for planning. You can find out more about this feature [here](#)⁶²¹.

Please note that the Team Timeline is not working as intended for customers who have upgraded to Jira 8.15. We will reinstate its compatibility with Jira 8.15 in our next release.

IMPROVEMENTS

- New Feature: With the Jira issue Planner sync you can now sync assigned Jira issues into Planner to automatically create plans for your resources. Plans are based on assignee, estimate (hours) and due date.

FIXES

- Fixed: Input in date picker for reports has been widened to allow the display of 2 character digits.
- Fixed: Subtitle of print report displays according to accepted requirements.
- Fixed: Fixed bug where some users were always filtered out in Resource Planning.
- Fixed: The field for Per day/Total is disabled if a user does not have permission to change the plan.
- Fixed: Fixed planning from staff when some resources only have future availability.
- Fixed: Clarified REST API documentation about updating membership in Teams.
- Fixed: Team memberships no longer show duplicates in the Manage Staff page.

621. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/1773044363/Creating+Plans+from+Jira+Issues+-+Tempo+Server>

- Fixed: Addressed too many sql parameters bug in the Capacity Report

	Upgrading Tempo Planner⁶²² is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁶²³ (UPM).
	This release is compatible with products listed in the Compatibility Page⁶²⁴, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 8.1 • Tempo Accounts 8.1 • Tempo Planning API 8.1 • Tempo Teams 8.1 • Tempo Platform - JIRA 8.1 • Tempo Platform API 8.1

2021-01-19 | Tempo Planner for Server 8.0 Release

We've released **version 8.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. **This includes changes to the Jira SPI and Jira REST API.**

This latest major version of Tempo Timesheets features changes to the **Jira SPI and Jira REST API**. This results in the Tempo Team custom field being returned as an object rather than as a string and also makes it possible to update the Jira SPI with an object. While it is still possible to use the existing Jira REST API endpoints to update the team custom field with name or ID, it is no longer possible to use the Jira SPI to do so.

The goal in making these changes is to give you more flexibility when integrating with the Tempo Team custom field through the Jira SPI and API interfaces, and to allow those of you who use these interfaces to simplify your third party integrations. These changes will return a Team object that includes both the team name and the team ID (instead of just the team ID), which will allow you to access more information when you use the Jira SPI and REST API interfaces.

Please note that these changes may have an impact on third party apps and integrations within your organization. We recommend that you confirm that your critical third party apps are compatible with this change before upgrading.

You can find more technical information about these changes [here](#)⁶²⁵. We have also compiled information to help you understand how to update the [team custom field in ScriptRunner scripts](#)⁶²⁶.

IMPROVEMENTS

- Tempo Team custom field is now returned as an object (rather than a string) that includes both the team name and the team ID.
- CSV exports of Jira issue data now include team name instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira.
- Deprecation warning: Private endpoint `rest/tempo-core/1/users/search` is being deprecated and slated for removal.

FIXES

625. <https://tempo-io.atlassian.net/wiki/spaces/KB/pages/1377468417/Jira+SPI+and+REST+API+changes+in+Tempo+11>

626. <https://tempo-io.atlassian.net/wiki/spaces/KB/pages/1682080365/Tempo+Team+custom+field>

- Bugfix: To avoid issues with special characters in the names of reviewers selected in the Plan Time form, Tempo now encodes the userkey before submitting it to the server.
- Fixed: Fixed bug where Print Report did not work on latest version of Firefox.
- Fixed: Reports were showing an infinite spinner while trying to load user information for some deleted users (when grouping by Users).
- Fixed: Reports will now always show worklogs for deleted users from an external user directory.
- Fixed: Changed styling on Reports subtask tooltip so that text is more readable.

	Upgrading Tempo Planner⁶²⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁶²⁸ (UPM).
	This release is compatible with products listed in the Compatibility Page⁶²⁹, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 8.0 • Tempo Accounts 8.0 • Tempo Planning API 8.0 • Tempo Teams 8.0 • Tempo Platform - JIRA 8.0 • Tempo Platform API 8.0

2021-01-08 | Tempo Planner for Server 7.18.9 Release

We've released **hotfix version 7.18.9 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This hotfix restores the ability to make plans using Resource Planning.

HOTFIX

- Fixed: Users who had installed Tempo Planner 7.18.8 can create plans again using Resource Planning.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.9, please follow [these instructions](#)⁶³⁰.

Upgrading [Tempo Planner](#)⁶³¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶³² (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁶³³, and bundled with the following Tempo System Plugins:

2021-01-04 | Tempo Planner for Server 7.18.8 Release

We've released **version 7.18.8 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Unable to plan on internal issues without having Browse Project permission.
- Fixed: Missing navigation menu items in Team planning when legacy planning features were enabled.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.8, please follow [these instructions](#)⁶³⁴.

Upgrading [Tempo Planner](#)⁶³⁵ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶³⁶ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁶³⁷, and bundled with the following Tempo System Plugins:

2020-12-14 | Tempo Planner for Server 7.18.7 Release

We've released **version 7.18.7 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

IMPROVEMENTS

- In order to improve performance in the Resource Planning view, only the first 250 users will have their avatar image displayed.
- In order to assist customers who have built listeners, we have added more properties to the allocation events. This includes `createdAt`, `updatedAt` and `startTimePerDayEvents`: `AllocationCreatedEvent`, `AllocationUpdatedEvent` and `AllocationDeletedEvent`.

FIXES

- Fixed: There are no longer delays in opening the Tempo Plan Time dialog when navigating through tickets in the Jira issue search.
- Fixed: Fixed bug where clicking the name in the Account column of Tempo Reports would redirect user to the wrong page.
- Fixed: There are no longer errors when executing a JQL filter with the Account field.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.7, please follow [these instructions](#)⁶³⁸.

Upgrading [Tempo Planner](#)⁶³⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁴⁰ (UPM).

2020-12-07 | Tempo Planner for Server 7.18.6 Release

We've released **version 7.18.6 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: We are always working on improving how we show our data in reports. This improvement adds the function of only showing child labels when relevant like No-Sub-task and No epic. This avoids duplication of the data visualization.
- Fixed: Fixing bug where customer search in report filter was case sensitive.
- Fixed: Fixed link to plan from plan approval email.
- Fixed: Project Color config is only available when Legacy planning is enabled.
- Fixed: Issues filter on the right has no issue summary in Team Timeline view after upgrade.
- Fixed: You are now able to delete accounts again when all project links are removed.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.6, please follow [these instructions](#)⁶⁴².

Upgrading **Tempo Planner**⁶⁴³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**⁶⁴⁴ (UPM).

2020-11-17 | Tempo Planner for Server 7.18.5 Release

We've released **version 7.18.5 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Current user shows in Resource Planning view even when not in team.
- Fixed: Plans created in Tempo Budgets are synched properly with Tempo Planner.
- Fixed: Icon URL in Resource Planning does not respect relative path.
- Fixed: Dynamic dropdown field is not updated after changes in the dependent field.
- Fixed: Location is shown as ID instead of name when printing Tempo reports.

How to move to this version

If you had previously upgraded to Tempo Timesheets 10.19.x or 10.20.x and would like to install version 10.18.5, please follow [these instructions](#)⁶⁴⁶.

Upgrading [Tempo Planner](#)⁶⁴⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁴⁸ (UPM).

2020-10-19 | Tempo Planner for Server 7.18.4 Release

We've released **version 7.18.4 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. Tempo Administrators and Tempo Team Administrators can now filter users by their Jira status (active, inactive or all) in the Manage Staff page in Settings.

IMPROVEMENTS

- Tempo Administrators and Tempo Team Administrators can now sort users by their Jira status (active, inactive or all) in the Manage Staff page in Settings.
- Improved performance for resource planning view.
- We have made improvements to make the Customer browser much faster when loading a large number of Tempo Customers. We've also aligned the Customer browser with the overall look and feel of Tempo, added filtering capabilities and improved its error handling.

FIXES

- Fixed: Reports are now performing correctly for customers with only Planner installed.
- Fixed: Planner does not recognize ISO8601 from Jira.
- Fixed: Missing Epic summary in Planned vs Actual report when time is assigned to Subtasks on Epics.
- Fixed: "Actions" button on Manage Staff page in Settings is now visible after you have selected a user.
- Fixed: Eliminated bug which caused a leaving page confirmation dialog to be shown after searching in issue side panel in Resource Planner and then trying to navigate to a new page.
- Fixed: Corrected text and removed double quotes from the French translation for Créer l'équipe on the Teams page.
- Fixed: Logging time directly from "plan on project" no longer selects a random issue to log work on.
- Fixed: Adjusted inconsistent estimates in Tempo reports.
- Fixed: Selected period in Tempo reports stays the same even when you click on team members.
- Fixed: Epic now shows in Tempo reports when the issue type was changed to Epic.
- Fixed: Fixed error message when moving worklogs in reports.

- Fixed: Saved Planned Time report's overview will display correct dates if a different time period is selected and Timesheets access is then removed.
- Fixed: Broken date range picker in reports.
- Fixed: Jira groups are not shown as members of team in permissions page.
- Fixed: Internal issue picker filter is hidden when user is missing access to Timesheets so that it doesn't produce errors when failing to load.
- Fixed: Fixed upgrade task 18 in Teams for users who had experienced failure previously.

How to move to this version

If you had previously upgraded to Tempo Planner 7.19.x or 7.20.x and would like to install version 7.18.4, please follow [these instructions](#)⁶⁵⁰.

Upgrading [Tempo Planner](#)⁶⁵¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁵² (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁶⁵³, and bundled with the following Tempo System Plugins:

2020-09-24 | Tempo Planner for Server 7.20.1 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the features described below have been included in the version [7.18.4 release \(see page 352\)](#). You can find more information [here](#)⁶⁵⁴.

We've released **version 7.20.1 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This hotfix corrects an error when reindexing issues with the team custom field.

- **HOTFIX**

- Bug fixed: Error when reindexing issues with the team custom field.

Starting with Tempo Planner 7.19.0, CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira. In addition, **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)⁶⁵⁵.

Upgrading [Tempo Planner](#)⁶⁵⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁵⁷ (UPM).

Tempo+for+Server+Product+Compatibility

2020-09-07 | Tempo Planner for Server 7.19.0 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the fixes described below have been included in the version [7.18.4 release](#) (see [page 352](#)). You can find more information [here](#)⁶⁶⁴.

We've released **version 7.19.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. Customers exporting Jira issue data to CSV will now see team name (instead of team ID) in the Team field. TeamCustomField now returns a Team object instead of a string. **The latter change may require updates to your third party apps or integrations.**

• Improvements

- CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Planned Time report as well as data exported to CSV directly from Jira.
- **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)⁶⁶⁵.

• Fixes

- Fixed: MsSql and Oracle database users were not seeing all teams in the teams overview page.

Upgrading [Tempo Planner](#)⁶⁶⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁶⁷ (UPM).

2020-08-17 | Tempo Planner for Server 7.18.0 Release

We've released **version 7.18.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. Team visibility can now be managed through Team Permission Roles. The release also contains other improvements and several bug fixes.

• Improvements

- Team visibility can now be managed through Team Permission Roles with a new permission: *View Team*. This replaces an older permission (*Browse team*) that used to control this through the *Team is visible to* setting. Read more [2020-07-29 | Updates to Team Permissions are Coming](#)⁶⁷⁵.

• Fixes

- Fixed: Customer picker is now more performant.
- Fixed: The overlapping issue with app navigator.
- Fixed: Teams linked to programs/boards and issues can now be deleted (with a warning).
- Fixed: Jira logo misalignment.
- Fixed: Export report performance improvement.

Upgrading [Tempo Planner](#)⁶⁷⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁷⁷ (UPM).

2020-06-11 | Tempo Planner for Server 7.17.0 Release

We've released **version 7.17.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. Now you can see the issue type by hovering over the issue icon in reports. We've also fixed some issues.

• Improvements

- You can now see the issue type by hovering over the issue icon in reports.

• Fixes

- Fixed: Team commitment not shown when adding a new team member if the classic planner was enabled.
- Fixed: The **Plan Time** button would not work in Resource Planning when empty state was displayed.
- Fixed: A bug where it was not possible to export or save capacity report that had not been given any specific name and where filtering had been applied on program(s).
- Fixed: A bug in Firefox where resizing a plan in Resource Planning would create a new plan on the first day of the plan.

Upgrading [Tempo Planner](#)⁶⁸⁸ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁶⁸⁹ (UPM).

2020-05-12 | Tempo Planner for Server 7.16.0 Release

We've released **version 7.16.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces the new Tempo look. We've also made improvements to the Planned vs Actual report and fixed several bugs.

• New Features

- We're excited to launch the newest iteration of the Tempo brand to our Server and Data Center customers. This includes our updated Tempo logo as well as a newly designed Tempo sidebar. These changes are part of a larger rebranding effort that we have recently implemented across the company. To make the best use of screen real estate for the content that matters most, you can now unpin the sidebar and have it show up as a hamburger menu in the upper-left corner. Read more here: [Tempo is Getting a New Look](https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/858095786/2020-05-05+Tempo+is+Getting+a+New+Look)⁷⁰⁰.

• Improvements

- We've made improvements to the suggested name when saving a Planned vs Actual report.

• Fixes

- Fixed: Page crashes in some cases when approval period is selected in the dateRangePicker.
- Fixed: Required field for Allocations in API Documentation is missing.
- Fixed: Wrong URL parameter in link from plan approval email.
- Fixed: Team Lead cannot plan time in the Jira Issue view for team members who were added by group.
- Fixed: A bug where the Team commitment field was not displayed when adding a member after enabling the Team planning legacy feature.
- Fixed: Resource Planning view does not show all team members.

2020-04-14 | Tempo Planner for Server 7.15.0 Release

We've released **version 7.15.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces the Planned vs Actual report. We've also fixed an issue with the Capacity Report.

• New Features

- Planned vs Actual in Tempo Reports. Server and Data Center customers with both Timesheets and Planner can now access Planned vs Actual in the Tempo Reports overview. This report shows planned hours against logged time so that managers and team leads can see how well the project is going according to plan and execution.

A data visualisation canvas features key metrics of the report as well as two charts for planned hours, logged hours, and the variance. Read more about the Planned vs Actual report in our [user documentation](#)⁷¹⁰.

• Fixes

- Fixed: Capacity Report Graph shows a scale for y-axis that is out of proportion with data in the graph for certain cases where planned time goes over 100% at some point.
- Fixed: A bug where Account search was broken, for example in project settings/accounts.

Upgrading [Tempo Planner](#)⁷¹¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁷¹² (UPM).

2020-03-26 | Tempo Planner for Server 7.14.0 Release

We've released **version 7.14.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. In this release we've added the location field to report exports. We've also fixed several issues.

• Improvements

- We've added the location field to the report data exports of Planned Time reports.

• Fixes

- Fixed: Users with the permission to plan time for their team members can plan time for users that are not in their teams. Now team leads can only select users for which they have permission to plan in the Plan Time form.
- Fixed: Wrong calculation in the Capacity Report when plotting graph for non-resource grouping (grouping by project, account, or epic) and some sub-periods of the overall report period have holidays.
- Fixed: When editing a plan in the Jira issue view, the form shows the currently logged in user as the owner of the plan instead of preserving the previous value
- Fixed: Some users with proper permission experienced inconsistent behavior when trying to edit a plan created by others in the Planning view and My Work Calendar.
- Fixed: The My Work gadget does not work when only Planner is installed.
- Fixed: Utilisation report now supports multiple team memberships for the same team.

Upgrading **Tempo Planner**⁷²³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**⁷²⁴ (UPM).

2020-03-10 | Tempo Planner for Server 7.13.0 Release

We've released **version 7.13.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces the Capacity Report that lets you report on resource capacity. This report replaces the previous team and program capacity reports. We've also fixed a scrolling issue.

• New Features

- You can now access the Capacity Report in the Tempo Reports overview. This report shows the planned and available capacity of your employees, helping you to get a clear picture of staff capacity and utilization on project, epic, location, program, team, role, and user levels. For more information about the Capacity Report, see our [user documentation](#)⁷²⁹.

• Changes to Planner Features

- As part of redesigning the Capacity Report, we are replacing the previous team and program capacity reports as well as relocating access to certain key resource planning and reporting features. These features are still accessible as legacy features, but **you need to enable access to view them**. These include the following:
 - Team commitment
 - Team planning timeline
 - Program board
 - Previous Team Capacity report
 - Previous Program Capacity report

• Fixes

- Fixed: Sometimes it is not possible to scroll to far right in Resource Planning and Reports.

Upgrading [Tempo Planner](#)⁷³⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁷³¹ (UPM).

2020-02-11 | Tempo Planner for Server 7.12.0 Release

We've released **version 7.12.0 of Tempo Planner** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces Location in the Manage Staff and Reporting tools. We've also aligned with Atlassian to comply with GDPR standards and fixed issues.

• New Features

- Tempo is pleased to introduce **Location** into the Manage Staff and Reporting tools.
 - Easily update and manage the Location of your staff. This update will allow you to create locations and assign them to your staff members, as well as filter by location inside of Manage Staff.
- You can now report by Location. You can now Filter and Group by Locations in Tempo Planned Time reports.
- Check out our user documentation for more information about [Locations](#)⁷³³.

• Aligning with Atlassian to comply with GDPR standards

In line with Atlassian's changes towards GDPR compliance, Jira Administrators will now have the ability to **anonymize a range of personal information for existing users**. This will allow you to do the following:

- Change user keys and usernames of existing users.
- Anonymize user profiles.
- Delete or anonymize personal information that appears in Jira.

For more information about Atlassian's GDPR changes, see <https://confluence.atlassian.com/adminjiraserver/anonymizing-users-992677655.html>

• Fixes

- Fixed: An issue where expanding users in the Weeks view of Resource Planning resulted in a blank page.
- Fixed: In the Planned Time report plans against issues with the Account field and value set are not grouped under the associated accounts.

2019-10-10 | Tempo Planner for Server 7.8.0 Release

We've released version 7.8.0 of Tempo Planner which is compatible with Atlassian's **Jira 8.x** platform. This release introduces the **Planned Time report** that shows the time that has been planned on projects based on teams and individual users.

• New Features

- We've added a new Planned Time report that lets you review your plans in the context of your human resources, priorities and constraints so that you can assess estimated effort, predict costs, and plan effectively. Before running the report, you can apply filters to help you see only what you need and you can also group the report results so that the report is easier to read. You can save your filtered reports for future use and reference.

For more information about the improved reporting options, check out our [user documentation](#)⁷⁷⁶.

• Improvements

- We've added more German translations. Also, translation strings for *Lithuania Litas* and *Latvia Lat* have been updated with *Lithuania Euro* and *Latvia Euro*.

2019-09-12 | Tempo Planner for Server 7.7.0 Release

We've released **version 7.7.0 of Tempo Planner** where we introduce a new feature that allows you to easily update staff workload and holidays..

• New Features

- Easily update staff workload and holidays

Tempo is pleased to introduce Manage Staff, a tool that lets users with the *Tempo Team Administrator* permission easily change the workload and holiday schemes of many Jira users simultaneously. With the Manage Staff tool team administrators also get a good overview of their staff as they can look up staff members based on team memberships and roles, Jira groups, as well as workload- and holiday schemes. Customers using Tempo Staff ID are able to search and view staff by ID of their employees.

For more information about how to use Manage Staff, see our [user documentation](#)⁷⁸³.

• Fixes

- Fixed: It was not possible to add users to a team when the team's visibility had been changed. We've fixed the "Team Visibility" modal to support adding groups.

Upgrading [Tempo Planner](#)⁷⁸⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁷⁸⁵ (UPM).

2019-07-10 | Tempo Planner for Server 7.5.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release fixes an issue with planning total time in the issue view and introduces an updated Servlet API.

We've released an updated Servlet API to address issues with the team custom field in various Jira views. For more information about these changes, see [Changes are Coming to the Servlet API on July 10, 2019](#)⁷⁹⁶.

- **Fixes**

- Fixed: Planning total time over a period in the issue view results in per day entries when Tempo Timesheet is disabled.

	Upgrading Tempo Planner ⁷⁹⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ⁷⁹⁸ (UPM).
	This release is compatible with products listed in the Compatibility Page⁷⁹⁹, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 6.5.0 • Tempo Accounts 6.5.0 Plan Core 6.5.0 • Tempo Teams 6.5.0 • Tempo Planning API 6.5.0 • Tempo Budgets 13.5.0

2019-06-13 | Tempo Planner for Server 7.4.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release fixes an issue where it was not possible to search for reviewers and an issue with Tempo Planner's API.

• Fixes

- Fixed: **Reviewer** field is not searchable.
- Fixed: Tempo Planner's API is returning inconsistent data when querying planned items for a user. Plan description field is now always returned and if it is null, it is returned as "" (empty string).

Upgrading [Tempo Planner](#)⁸⁰⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁰¹ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸⁰², and bundled with the following Tempo System Plugins:

2019-04-11 | Tempo Planner for Server 7.2.0 Release

Compatible with Atlassian's **Jira 8.x** platform. This release includes improvements to our REST API. We've also fixed an issue with the Time Tracking + button and an issue where inactive users could be selected as reviewers.

• Improvements

- We've made improvements to our REST API allowing you to export plans for multiple teams.

• Fixes

- Fixed: Inactive users can be selected as reviewers.
- Fixed: With Planner only installed, it is not possible to log time by clicking the "+" in the Time Tracking section of the Issue view.

	Upgrading Tempo Planner ⁸⁰⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ⁸⁰⁷ (UPM).

2019-03-21 | Tempo Planner for Server 6.4.0 Release

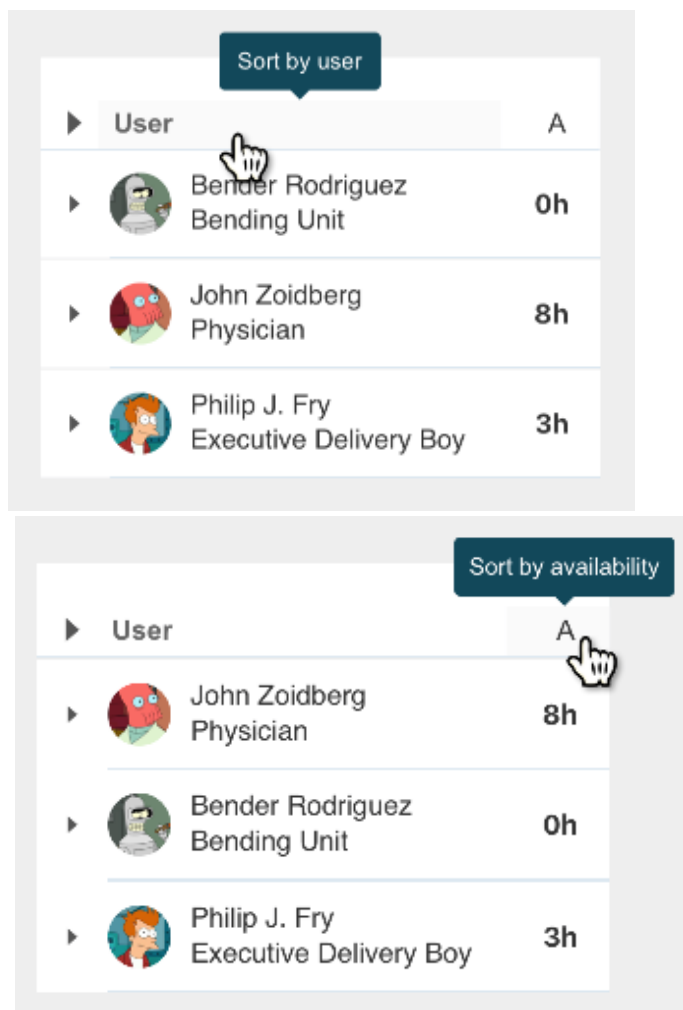

Compatible with Atlassian's **Jira 7.x** platform. We've made more improvements to the Resource Planning in Tempo Planner for Server. We've added an Issues side panel, you can sort your resources, you can easily see availability and planned hours for each issue as well as plan approval status. We've also improved the timesheet approval workflow and fixed an issue with recurring plans.

- **New Features and Improvements in Resource Planning**

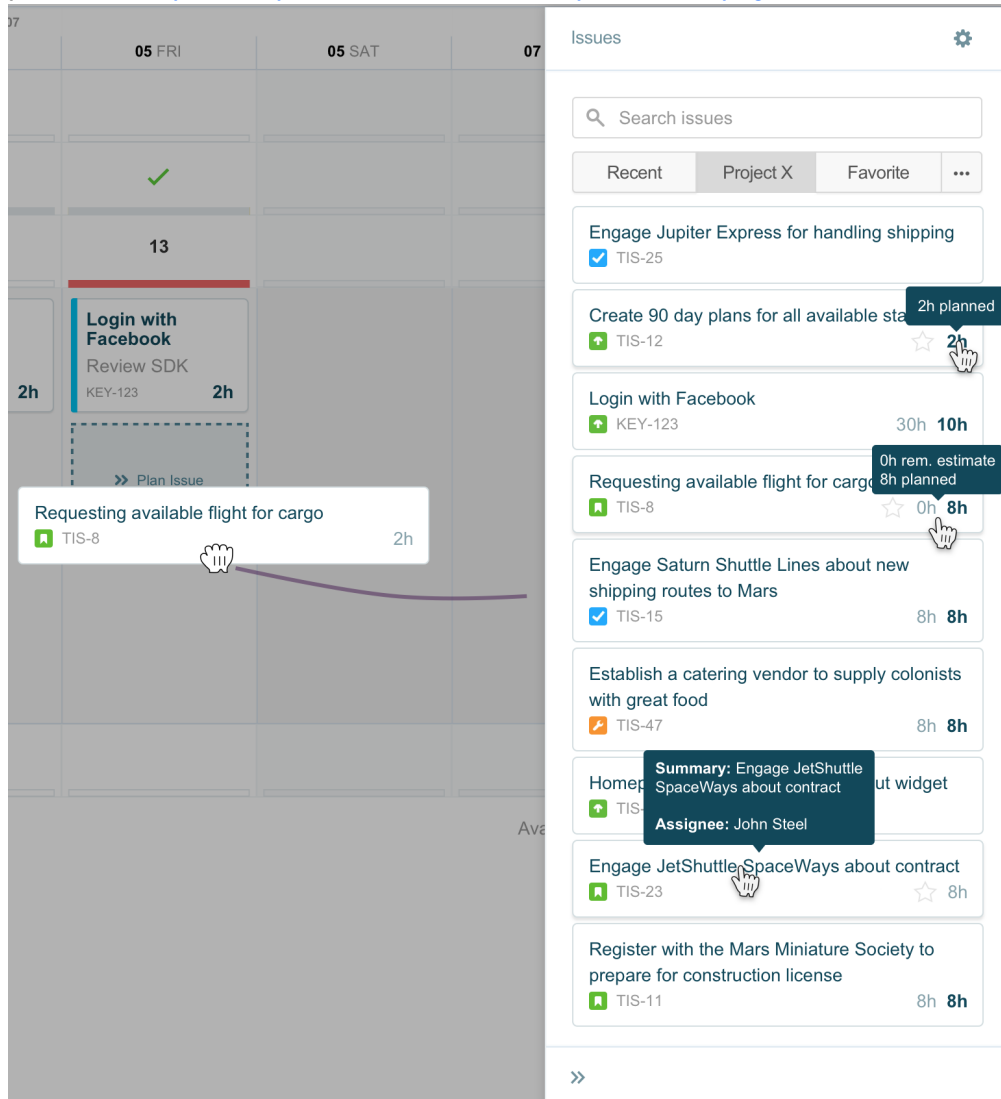

Our latest improvements and new features in Resource Planning make it easier for you to plan who's working on what.

- You can now get a better overview of your resources by sorting them either by their display name or availability in the Resource Planning view.

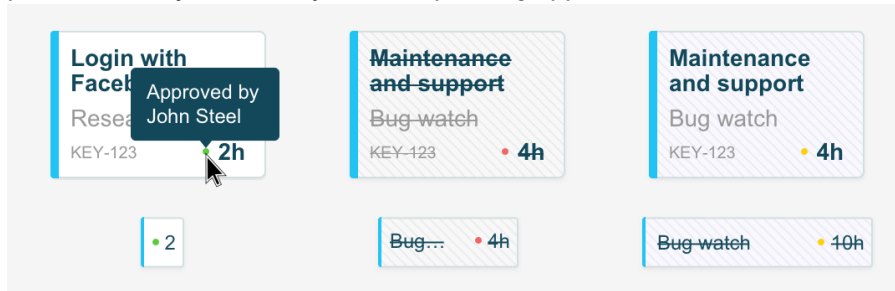

- The Resource Planning view now has an Issues side panel. The side panel includes the customizable Tempo Issue picker which can be configured to show relevant issues from Jira filters and projects. You can drag issues from the side panel directly onto the schedule to plan time for your resources. For more information about how to use the Tempo Issue

picker, see <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/366709500>.

- The cards in the Issues side panel show the remaining estimate on the issue, when available, to help resource managers understand how much time needs to be planned to complete the task. When time has been planned on the issues in the selected time period, the hours planned are also displayed. They also show the remaining time. When planning by dragging issues from the Issues side panel onto the schedule, the remaining estimate and available hours are used to suggest planned hours. If the remaining hours are more than the availability of the selected user on that day, the suggested plan is the available time remaining for that user.
- Plan cards show the approval status so that reviewers can quickly spot plans that need attention. Approval status is shown as colored dots in the plan cards: green for approved

plan, red for rejected, and yellow for pending approval.

- You can edit plans by dragging and dropping a card between days and users. When dragging a plan card that is a part of a period plan, only the selected card will be moved. For more information about how to plan your resources in Tempo Planner for Server, check out our [documentation](#)⁸⁰⁹.
- **Improvements**
 - We've made improvements to our REST API allowing you to export plans for multiple teams.
- **Fixes**
 - Fixed: With Planner only installed, it is not possible to log time by clicking the "+" in the Time Tracking section of the Issue view.
 - Fixed: Recurring plans shown only when **Copies of Team Plans** option is selected.

	Upgrading Tempo Planner ⁸¹⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ⁸¹¹ (UPM).
	This release is compatible with products listed in the Compatibility Page ⁸¹² , and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 5.4.0 • Tempo Accounts 4.4.0 Plan Core 4.4.0 • Tempo Teams 4.4.0 • Tempo Planning API 4.4.0 • Tempo Budgets 12.4.0 Platform 2.4.0

2019-03-14 | Tempo Planner for Server 7.1.0 Release

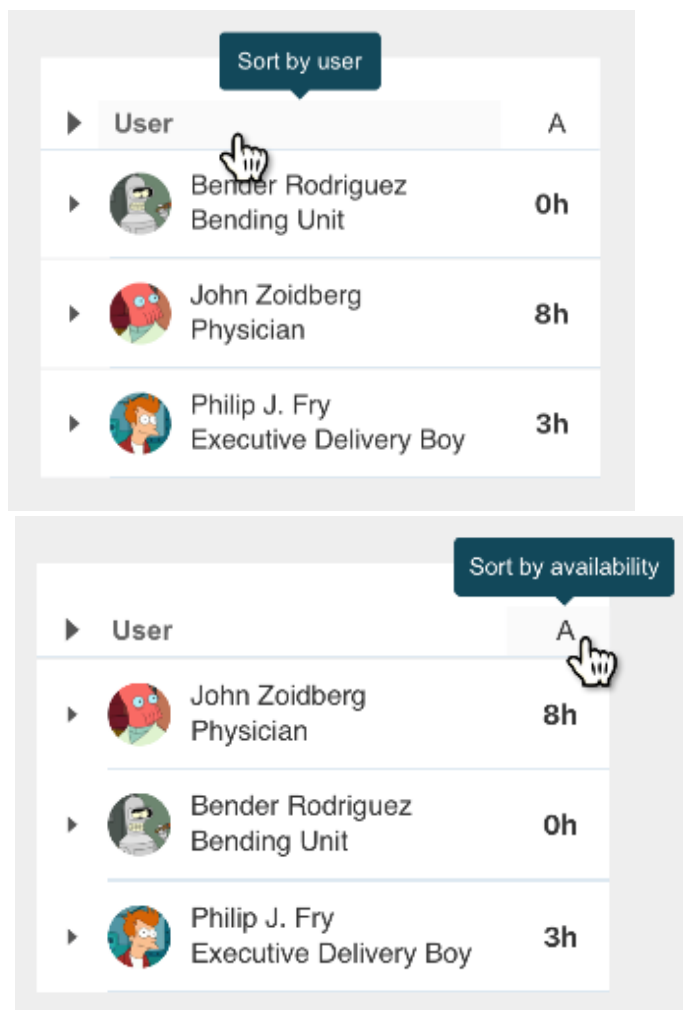

- Compatible with Atlassian's **Jira 8.x** platform. We've made more improvements to the Resource Planning in Tempo Planner for Server. We've added an Issues side panel, you can sort your resources, you can easily see availability and planned hours for each issue as well as plan approval status. We've also improved the timesheet approval workflow and fixed an issue with recurring plans.

- **New Features and Improvements in Resource Planning**

Our latest improvements and new features in Resource Planning make it easier for you to plan who's working on what.

- You can now get a better overview of your resources by sorting them either by their display name or availability in the Resource Planning view.

- The Resource Planning view now has an Issues side panel. The side panel includes the customizable Tempo Issue picker which can be configured to show relevant issues from Jira filters and projects. You can drag issues from the side panel directly onto the schedule to plan time for your resources. For more information about how to use the Tempo Issue

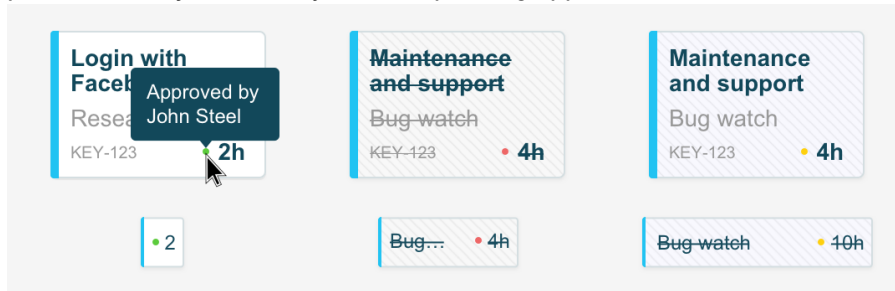

picker, see <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/366709500>.

The screenshot displays the Tempo Capacity Planner interface. On the left, a calendar grid shows dates 05 FRI, 05 SAT, and 07. A plan card for 'Requesting available flight for cargo' (TIS-8) is shown with a 2h duration. A tooltip for this card indicates '0h rem. estimate' and '8h planned'. On the right, the 'Issues' side panel lists various tasks with their durations and planned times. A tooltip for the 'Engage JetShuttle SpaceWays about contract' issue (TIS-23) shows the assignee 'John Steel'.

Issue Title	Key	Duration	Planned Time	Remaining Estimate
Engage Jupiter Express for handling shipping	TIS-25	2h	2h planned	0h
Create 90 day plans for all available sta	TIS-12	2h	2h planned	0h
Login with Facebook	KEY-123	2h	30h	10h
Requesting available flight for cargo	TIS-8	2h	8h planned	0h rem. estimate
Engage Saturn Shuttle Lines about new shipping routes to Mars	TIS-15	8h	8h	0h
Establish a catering vendor to supply colonists with great food	TIS-47	8h	8h	0h
Engage JetShuttle SpaceWays about contract	TIS-23	8h	8h	0h
Register with the Mars Miniature Society to prepare for construction license	TIS-11	8h	8h	0h

- The cards in the Issues side panel show the remaining estimate on the issue, when available, to help resource managers understand how much time needs to be planned to complete the task. When time has been planned on the issues in the selected time period, the hours planned are also displayed. They also show the remaining time. When planning by dragging issues from the Issues side panel onto the schedule, the remaining estimate and available hours are used to suggest planned hours. If the remaining hours are more than the availability of the selected user on that day, the suggested plan is the available time remaining for that user.
- Plan cards show the approval status so that reviewers can quickly spot plans that need attention. Approval status is shown as colored dots in the plan cards: green for approved

plan, red for rejected, and yellow for pending approval.

- You can edit plans by dragging and dropping a card between days and users. When dragging a plan card that is a part of a period plan, only the selected card will be moved. For more information about how to plan your resources in Tempo Planner for Server, check out our [documentation](#)⁸¹³.
- **Improvements**
 - We've updated the Tempo permission description on the Permission Overview page. It now reads: "Grant or deny access to Tempo Planner to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."
- **Fixes**
 - Fixed: Recurring plans shown only when **Copies of Team Plans** option is selected.

	Upgrading Tempo Planner ⁸¹⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ⁸¹⁵ (UPM).

2019-02-14 | Tempo Planner for Server 7.0.0 Release Notes

- We've released **version 7.0 of Tempo Planner** which is compatible with Atlassian's **Jira 8.0**. Tempo Planner 7.0.0 is not backward compatible with the Jira 7.x platform. This release also introduces improvements to Resource Planning and My Work calendar.

As announced earlier ([view announcement](#)⁸¹⁷), **Tempo Planner 7.0.0 supports Jira 8.0**. Note that Tempo Planner 7.0.0 is not backward compatible with the Jira 7.x platform. If you upgrade to Jira 8, you will need to upgrade to Tempo Planner 7.0.0. Make sure to check out [these instructions](#)⁸¹⁸ before upgrading the Tempo apps.

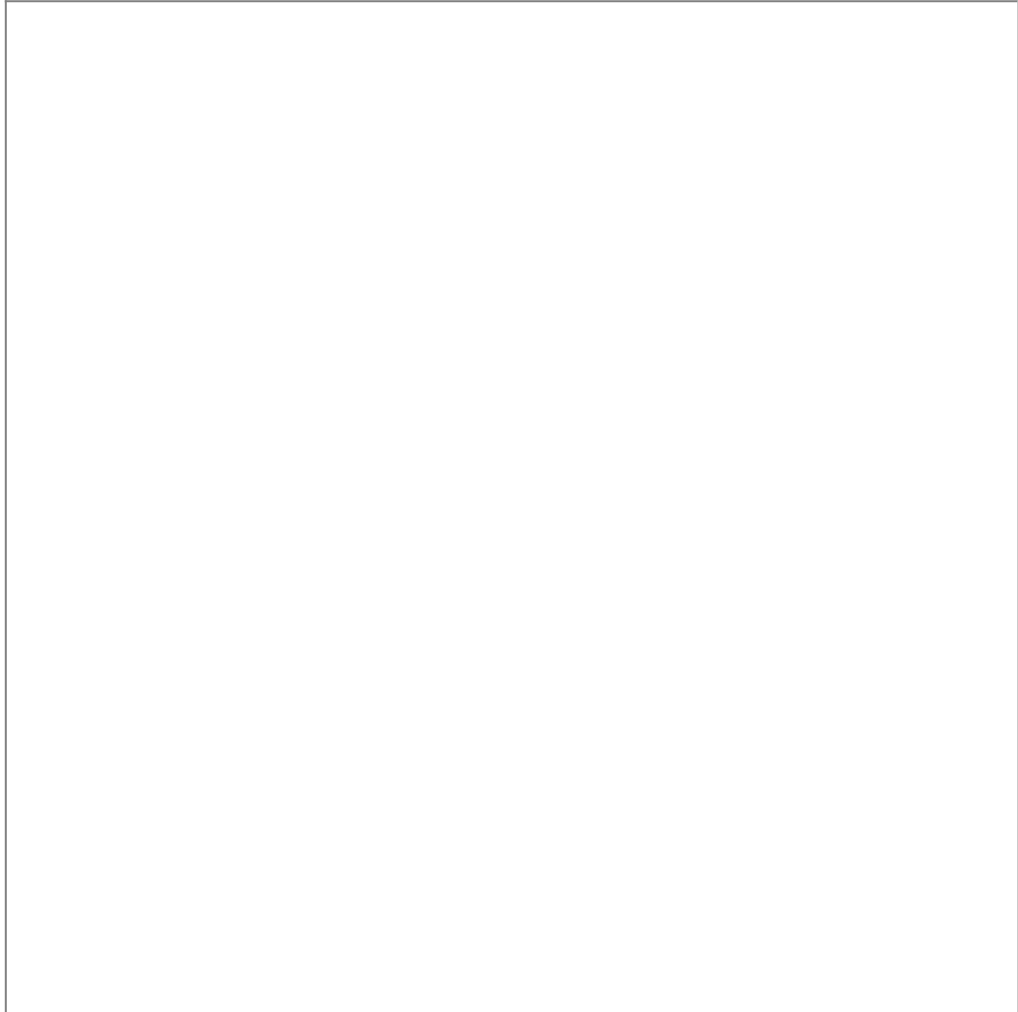

- **Improvements**

- We've made some improvements to Resource Planning to make planning even quicker and easier. Apart from some changes to the look and feel of the view, the improvements include:

817. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/380044147/2019-02-08+Jira+8+support+changes+to+Resource+Planning>

818. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/382304307/Tempo+Apps+compatible+with+Jira+8>

- You can now expand and collapse the user list with one click in the Resource Planning view.

- Plan cards are now displayed in chronological order.
- When creating or updating a plan in the **My Work Calendar**, the plan card is updated dynamically, similar to when creating and editing worklog cards.
- Plan work is now called **Plan time** in Tempo.
- **Fixes**
 - Fixed: Tempo panel is not displayed when issue is in "work is denied" status.
- **Deprecated features**
 - We've removed hidden resource planning features, as [announced](https://tempo-io.atlassian.net/wiki/spaces/CLOUDNEWS/pages/164692019/2018-02-26+Announcing+Tempo+Planner+Feature+changes)⁸¹⁹ in early 2018. The following features will not be available in the Jira 8 compatible version of Tempo:
 - Team - Backlog View
 - Team - Board View
 - Team Project Timeline

819. <https://tempo-io.atlassian.net/wiki/spaces/CLOUDNEWS/pages/164692019/2018-02-26+Announcing+Tempo+Planner+Feature+changes>

- Program -Timeline View - Projects
- Program - Timeline View - Teams
- Planning on Plan item type “Sprint”

	Upgrading Tempo Planner⁸²⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁸²¹ (UPM).

2019-02-14 | Tempo Planner for Server 6.3.0 Release

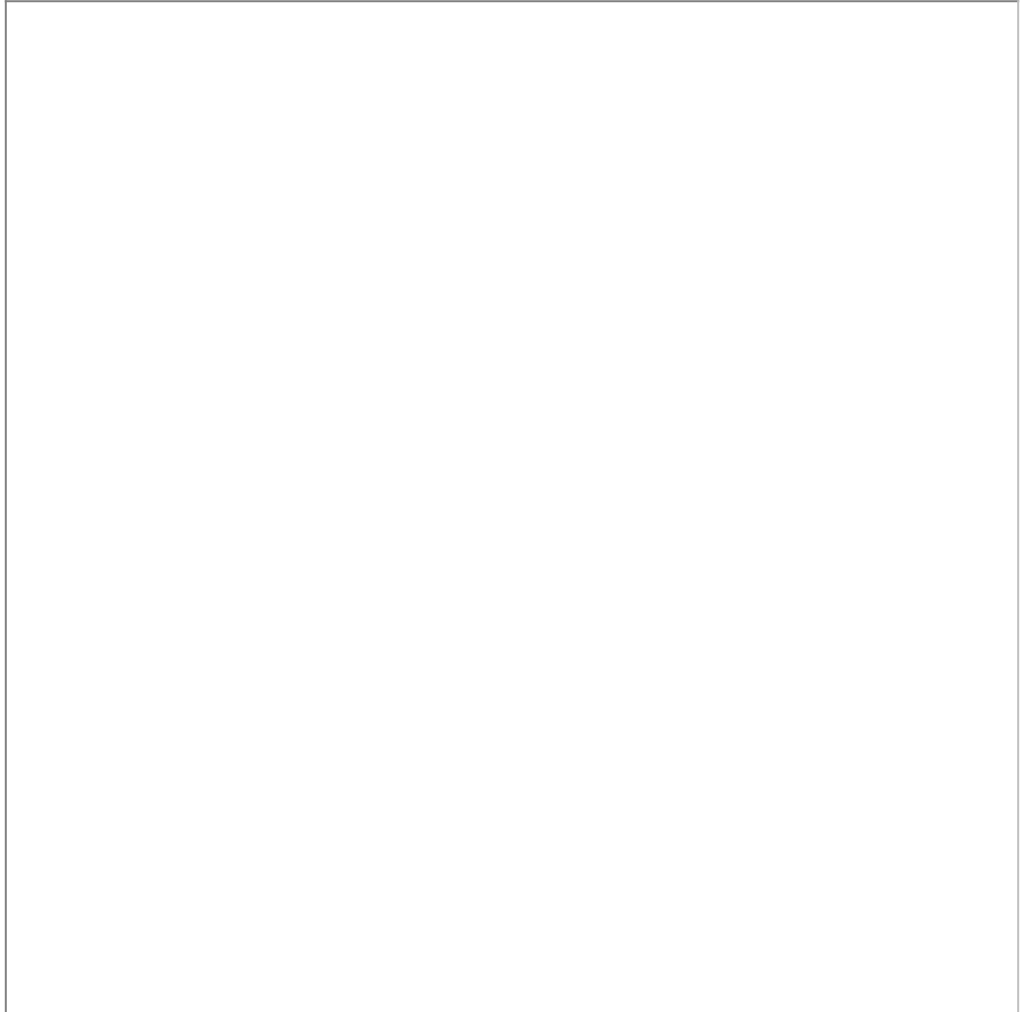

- **Tempo Planner 6.3.0** is compatible with Atlassian's **Jira 7.x** platform. In this release we've made improvements to Resource Planning and the My Work Calendar. Also, you can now add Jira projects and filters to your Tempo Issue picker, the My Work gadget shows plans ordered by start time, and Plan Work is referred to as Plan Time. We've also fixed some errors.

Tempo Planner 6.3.0 supports **Jira 7.x**. Note that Tempo Planner 6.3.0 is not compatible with Jira 8.0 so please take care when selecting your installation versions from the Atlassian Marketplace.

- **Improvements**
 - We've made some improvements to Resource Planning to make planning even quicker and easier. Apart from some changes to the look and feel of the view, the improvements include:

- You can now expand and collapse the user list with one click in the Resource Planning view.

- Plan cards are now displayed in chronological order.
- When creating or updating a plan in the My Work Calendar, the plan card is updated dynamically, similar to when creating and editing worklog cards.
- Plan work is now called **Plan time** in Tempo.
- The My Work gadget shows worklogs and plans ordered by start time.
- We've updated the Tempo permission description on the Permission Overview page. It now reads: "Grant or deny access to Tempo Planner to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."
- **Fixes**
 - Fixed: Dynamic drop-down attribute with {account} placeholder was not working in reports.
 - Fixed: In the My Work Calendar when entering 0m or 0h in the **Planned Time** box in the Plan Time dialog box, the page crashes.
 - Fixed: When the language is set to other than English in Jira, the My Work gadget does not load data and the date shows an "invalid date" error.

- Fixed: Error with German translation.
- Fixed: It is not possible to define floating holidays in a Holiday Scheme when the system language is other than English.

	Upgrading Tempo Planner⁸²³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁸²⁴ (UPM).
	This release is compatible with products listed in the Compatibility Page⁸²⁵, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 5.3.0 • Tempo Accounts 4.3.0 Plan Core 4.3.0 • Tempo Teams 4.3.0 • Tempo Planning API 4.3.0 • Tempo Budgets 12.3.0 Platform 2.3.0

823. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/252052035>

2019-01-10 | Tempo Planner for Server 6.2.0 Release

- **My Work** features an improved UI with many productivity enhancements.

New Features and Improvements

We've made some improvements to **My Work**, making it even easier to log time quickly. Improvements include:

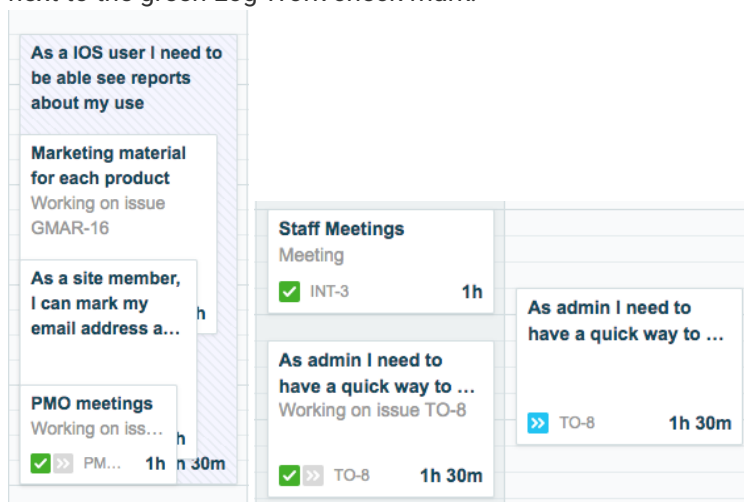

- A streamlined header lets you navigate between weeks quickly, and modify your view
- In the **User Timesheet**, total hours worked vs total available is neatly displayed to the immediate right of the date-picker.

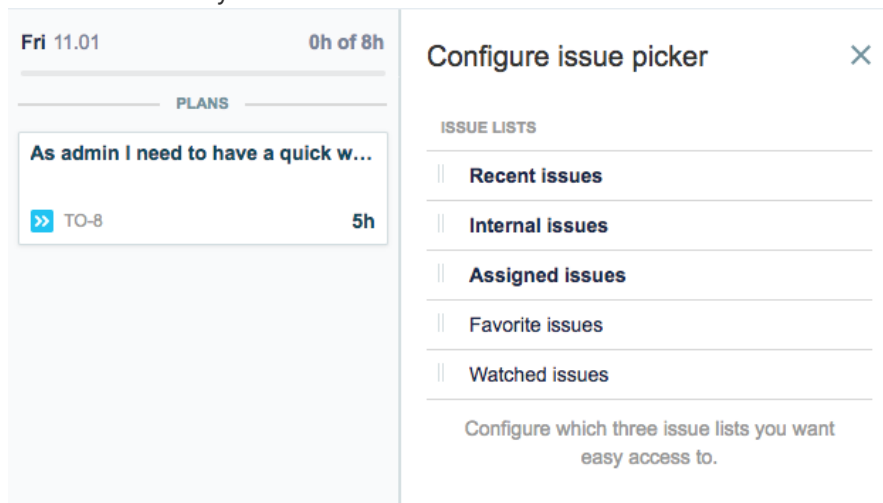

Taylor ▾

< 6/Jan/19 - 12/Jan/19 > 10h of 40h

- Worklog and Plan cards have received a face-lift, and now stack neatly in the **Time view** when they overlap, making it easy to select them. Pending and rejected Plan cards are shaded differently so you can quickly see their status at a glance. The cards are also labelled according to type and status. Worklog cards that originate from plans show the source icon greyed-out next to the green Log Work check-mark.

- When time is logged on a Plan card, the original Plan card is hidden from view, even when logged hours are less than planned. When a Worklog that originates from a Plan card is deleted, or moved to another issue, the original Plan card is displayed again.
- You can move worklogs between issues. If you logged time on the wrong issue, you can move the worklog to another issue. Simply click the ellipsis in the upper-right corner of the card to display the Move Worklog dialog box and select the issue you want to move the logged time to.
- The Issues side panel now integrates the Tempo Issue Picker. The user interface in the Issue Picker Configuration has been simplified to let you interactively select which issue lists to include as the default selections, and quickly change the order. You can now simply drag-and-drop issue lists. The top three lists are bolded to show that they are selected. Note that Jira filters are currently unavailable in the issue lists.

Improvements

- Users with the Tempo Administrator permission can now access Period Management through Tempo Settings instead of Jira Administration. Managing Tempo periods no longer requires the Jira Administrator permission.

Fixes

- Fixed: Plans are displayed as worklogs in reports.
- Fixed: When editing worklogs the date picker starts on a wrong date.
- Fixed: No issues are shown in the plan item picker when **Disable Empty JQL Queries** is set to **ON**.

Upgrading **Tempo Planner**⁸²⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**⁸²⁷ (UPM).

2018-12-13 | Tempo Planner for Server 6.1.0 Release

Tempo Planner 6.1.0 shows total member count in the Team overview and displays team name and user role in the CSV export. It also fixes an issue where clicking on a component plan resulted in an error.

• Improvements

- Team Name and User Role are now displayed in the CSV export from the Team Timeline.
- Total Member and Active Member count is now displayed in the Team overview.

• Fixes

- Fixed: Clicking on a component plan leads to a 404 dead link page.

Upgrading [Tempo Planner](#)⁸³⁵ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸³⁶ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸³⁷, and bundled with the following Tempo System Plugins:

2018-11-29 | Tempo Planner for Server 6.0.0 Release

In **Tempo Planner for Server 6.0.0** we've improved the navigation by introducing the Tempo sidebar and we've also started moving Tempo configuration to a dedicated Tempo Settings page.

Note

Tempo Planner 6.0.0 is compatible with Tempo Timesheets 9.0.0 and Tempo Budgets 12.0.0. Earlier versions of Timesheets and Budgets are NOT compatible with Tempo Planner 6.0.0

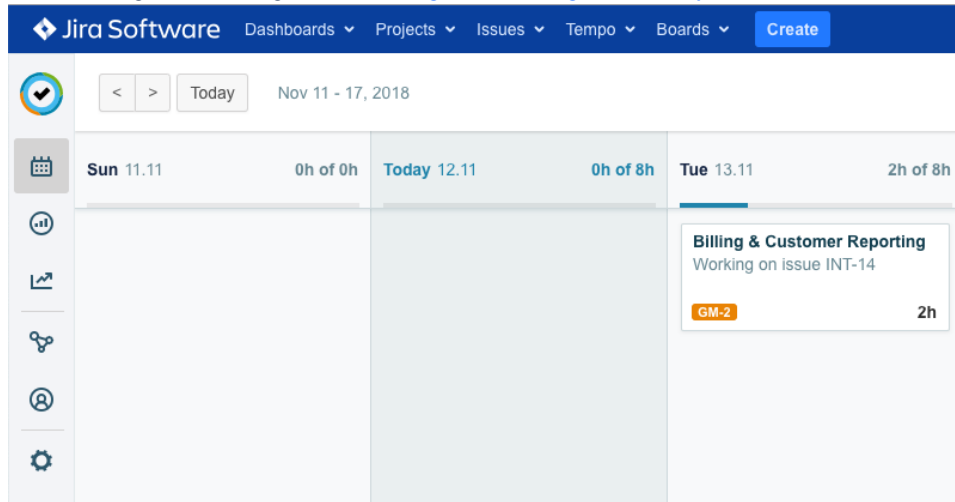

At the bottom of the release notes you can view a detailed description of the changes occurring in Tempo Planner 6.0.0, see [Changes in Tempo Planner 6.0.0 \(see page 433\)](#).

- **New Features**

- **New permission settings.** New permissions give you flexibility to control who can view and manage personal data, while ensuring that external stakeholders have the level of access they need to get their job done. Access to worklogs can now be granted directly from Tempo using the new **Team Permissions**. These permission changes help you to comply with local privacy legislation. Learn more about the new permissions [here](#)⁸³⁸.
- **Tempo sidebar.** We've made navigation improvements by introducing the **Tempo sidebar** and simplifying the Tempo drop-down menu to make it easier for users to find what they're looking for. Now you have single click access to Tempo core features from everywhere in the product. This change also improves the performance of the UI. [For more information](#)

838. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/315490361/2018-11-01+Big+changes+coming+soon+to+Tempo+Server#id-2018-11-01|BigchangescomingsoontoTempoServer-Reportingoptimizations>

about navigation changes, see [Navigation changes in Tempo Timesheets 9.0](#)⁸³⁹.

- Team planning and resource planning are found under Planning in the **Tempo** menu or in the **Tempo sidebar**.
- **Tempo Settings page.** We've also started to move Tempo configuration to a dedicated **Tempo Settings** page, making them more accessible to the people that need them. With this release the following global configuration settings for the following categories have been moved to Tempo Settings, accessible via the new Tempo sidebar navigation :
 - **Configuration:** Internal issues, Permissions, Work Attributes, Expense categories.
 - **Working days:** Holidays, Workload. We've also made changes to who can access the Working Days configuration, to include users that have the global **Tempo Team Administrator** permission.
 - **Periods:** Period configuration.
 - **Teams:** Roles.
 - **Accounts:** Import/Export, Categories, Price Tables.
- **Improvements**
 - When planning work, you can now configure the issue picker to show favorite issues and Jira filters. Click here to see <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/366709500>.
 - We've made updates to our APIs. [Click here](#)⁸⁴⁰ for information about these changes.

840. <https://tempo-io.atlassian.net/wiki/spaces/SERVERNEWS/pages/332267631/2018-11-01+API+Changes+with+upcoming+Server+release>

- **Teams Browser:** We have added a **create another** option to the Create Team dialog box to help creating many teams in succession.
- **Team Overview:**
 - The Team overview page design has been improved and consolidated to a single page, where users can view all attributes of the teams and make configuration changes. The permission configuration page is still a separate page and is accessed via the cogwheel in the page header.
 - Workload and holiday schemes are no longer available through the Team page. Instead, users can view and manage these settings through Tempo settings.
 - Deactivation of team memberships is not supported. A membership can be deleted when it is no longer relevant/required.
 - Creating multiple memberships for the same user in a single team is not supported.
 - Creating placeholder memberships for non-Jira users is no longer supported. NOTE: anonymous members that were added to Tempo Teams before upgrading to Planner 6.0.0, will still exist as team members of those teams.
- **Creating Teams:** We have added a “create another” option to the create Team dialog to help creating many teams in succession.

Accounts

- **Accounts Browser**
 - Accounts settings previously accessible via the Manage drop-down in the Accounts Browser, are now accessible via Tempo Settings in the Tempo sidebar. This includes Account Categories, Import / Export Accounts and Price Tables.
 - Predefined search filters are no longer available in the Accounts browser.
- **Account Overview**
 - The Accounts overview page design has been improved and consolidated to a single page, where users can view all attributes of the accounts and make configuration changes.
 - Teams linked to same projects as an Account are no longer displayed in the Accounts overview page.
- **Creating Accounts**
 - Users can now link project to Accounts directly in the Create Account dialog box.
 - We have added a “create another” option to the Create Account dialog box to help creating many accounts in succession.
 - Creating Customers and Categories on the fly is no longer supported. Users can only select from already existing Customers and Categories. Customers can be created in the Customers browser. Account Categories can be created in Tempo Settings.

Tempo Settings

A number of Tempo settings previously accessible through the Jira Administration page or the Teams

or Accounts Browsers, have been moved to the Tempo Settings accessible on the **Tempo sidebar**.

- **Configuration**
 - **Permission Overview** provides an overview of how permissions are used in Tempo.
- **Working Days**
 - **Workload** and **Holiday** schemes. We've added the functionality to search for scheme members to make changes to scheme memberships easier.
 - Users with the Tempo Team Administrator permission can now view and edit Tempo Working Days.
- **Teams**
 - **Team Roles**
- **Accounts**
 - **Import / Export** Accounts. This was previously accessed through the Accounts Browser.
 - **Account Categories**. This was previously accessed through the Accounts Browser.

2018-10-11 | Tempo Planner for Server 5.3.0 Release

Tempo Planner 5.3.0 introduces the ability for administrators to control content displayed to certain users or roles, as well as fixing an issue with the Manage team plans permissions.

• New Features

- You can now control which users can access the Tempo Planner add-on for Jira ([view announcement](#)⁸⁴⁷). The access is managed by configuring the [Tempo Planner Access global permissions](#)⁸⁴⁸ in Jira.

• Fixes

- Fixed: User with Manage team plans permissions cannot modify a team plan created by another user.
- Fixed: Difficult to change team in the Team Planning view.

Upgrading [Tempo Planner](#)⁸⁴⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁵⁰ (UPM).

2018-09-13 | Tempo Planner for Server 5.2 Release

The Tempo team is pleased to announce the release of Tempo Planner 5.2.0 which introduces improved Resource Planning view.

• New Features and Improvements

- **Resource Planner:** We have made it easier to see which month is being displayed in the week view of Resource Planning. The month name is now shown in the header of the view. This is especially useful when you have selected a long period in the date picker.

• Fixes

- Fixed: When planning, it is not possible to select a reviewer if the reviewer's start date in a team is in the future. Now users that have the *Approve Plans* permission for a team are listed in the **Reviewer** drop-down for plans that are assigned to a user who has not yet joined the team, but who is scheduled to be a member during the time planned for.
- Fixed: Plans on issues in a deleted Project cannot be removed. Now plans on deleted issues, versions, projects, and components can be edited or deleted by the user, if the user has the needed plan permissions to do so. This also applies to plans on issues, versions or components that belong to a deleted project.
- Fixed: Plan for 3,5 hours results in an email notification to reviewer stating that duration is 1 day. We have improved the clarity of how planned hours and the duration of period plans are presented in confirmation emails sent when plans are approved and in other transitions.
- Fixed: AO_2D3BEA_USER_INDEX table is cleared and repopulated every time a node is restarted. Now we do not re-index users on plugin install when less than 30 minutes have passed since the last index was run.
- Fixed: Users with correct permissions cannot edit plans for themselves or other users if the plan was created by another user.

Upgrading [Tempo Planner](#)⁸⁵² is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁵³ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸⁵⁴, and bundled with the following Tempo System Plugins:

2018-08-30 | Tempo Planner for Server 5.1.1 Release

Tempo Planner 5.1.1 introduces a new panel in the Jira issue view, a new Plan time form and cosmetic improvements to confirmation dialogs.

New Features and Improvements

Tempo introduces a new panel in the Jira Issue view that instantly displays all data on the issue. The plans displayed can be updated and deleted through this panel.

The panel can be filtered to show only your plans or all plans. Tempo stores your panel settings between issues.

The new Plan time form is now available in the Issue view and follows permissions set up for Resource planning. The view allows managers with the appropriate permissions to view, edit, and delete other users' plans from the issue.

The changes also include some cosmetic improvements to confirmation dialogs.

Bug fixes

- When you type a name that does not exist in the Team field in the Issue view or Edit issue view, the correct value is now saved in the Team Custom Field.
- Fixed an issue where the Team field in the Issue view was not displayed when "Anyone" viewed the issue (a user that is not logged in but has the Browse Project permission).
- Plans are now correctly ordered by start time in the My Work Calendar view.
- Fixed an issue where the end date of a long plan would change when editing the plan's start date.
- Fixed an issue in the Team Timeline where an error, occurring when a start date later than the end date was entered, would not disappear when the dates were corrected.
- Fixed an issue where users could plan for other users through the Jira issue view without having Tempo Planner installed. Now it's only possible to create plans for other users through the issue view if Planner is installed.

	Upgrading to Tempo Planner⁸⁵⁸ 5.1.1 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager⁸⁵⁹ (UPM).
	This release is compatible products listed in the Compatibility Page⁸⁶⁰, and bundled with the following Tempo System Plugins: • Tempo Core 4.12.1 • Tempo Accounts 3.11.1 • Tempo Teams 3.11.1 • Tempo Planning API 3.17.1

2018-06-15 | Tempo Planner for Server 5.0 Release

Tempo Planner 5.0 has a new main view: Resource Planning. It also includes a new user agenda style gadget, My Work.

New Features

- **Resource Planning:**
 - Tempo Planner has a new focus on Resource Management. **Resource Planning** is now the main view of Tempo Planner, giving resource managers a quick overview of available resources, allowing them to view details of plans, and plan resources within the same view. Resource filters can be saved to quickly access favorite resource filters.
 - Features focusing on Sprint and Release planning have been deprecated and removed from Planner navigation. However, these features can for some time be enabled again and will be accessible from a Legacy feature dropdown in Planner.
 - Emails for plan approval requests link directly to the Resource Planning view for approval.
- The My Work gadget is a new user agenda style gadget in Tempo that shows the user schedule for the day. The gadget can both display planned and worked time as well as how user work logs are progressing towards planned time.

Bug fixes

- The User Agenda gadget can now handle maxResults in issue API call; this corrects an issue where plans for issues were not displayed.

Upgrading to [Tempo Planner](#)⁸⁶¹ 5.0 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁶² (UPM).

861. <https://tempo-io.atlassian.net/wiki/spaces/THC/pages/252052035>

This release is compatible products listed in the [Compatibility Page](#)⁸⁶³, and bundled with the following Tempo System Plugins:

- Tempo Core 4.11.0
- Tempo Accounts 3.10.0
- Tempo Teams 3.10.0
- Tempo Planning API 3.16.0

863. <https://tempo-io.atlassian.net/wiki/spaces/TEMPO/pages/268861789/Tempo+for+Server+Product+Compatibility>

2018-05-23 | Tempo Planner for Server 4.9 Release

Tempo Planner 4.9 includes improvements such as the ability to set a start time when creating plans.

• New Features

- A start time can now be set when creating plans.
- A Tempo Administrator can configure if the start time is available when planning work. This is available by default.

• Fixes

- A display issue that occurred when creating overlapping plans for a given team member has been fixed.
- An issue where the capacity report only recorded whole hours has been fixed. Fractional values are now included and calculated correctly into the total.
- Header drop-downs now work in Planner if the "Git integration for Jira" add-on is also installed.

Upgrading [Tempo Planner](#)⁸⁶⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁶⁵ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸⁶⁶, and bundled with the following Tempo System Plugins:

2018-04-13 | Tempo Planner for Server 4.8 Release

Tempo Planner 4.8 introduces a new look and feel to the Plan Time dialog.

• New Features

- New look and feel of Plan Time dialog. User can now plan hours per day or total hours but not percentage of capacity.
- User plans are now stored as fixed hours-per-day instead of as a percentage of their workload. This allows for differing workload schemes or changes to workload schemes without affecting the number of hour-per-day already planned. Team plans continue to use a percentage of workload capacity.

• Fixes

- Comments made when a reviewer approves or rejects planned work are now correctly appended to the Tempo Plan Approval email notifications.

Upgrading [Tempo Planner](#)⁸⁶⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁶⁸ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸⁶⁹, and bundled with the following Tempo System Plugins:

2018-03-08 | Tempo Planner for Server 4.7 Release

Tempo Planner 4.7 changes filtering, bringing improvements to the filter picker.

• New Features

- In this release of the Resource overview we are preparing for next steps in Resource planning. Filtering has changed, and filtering by User, Team and Role has been moved into one filter picker. Filtering by available time has been removed. In addition, Resource filter management has been moved into the filter picker.

• Improvements

- In Team Timeline editing of plans has been changed. Team plans cannot be changed to user plans and user plans cannot be changed to team plans.

• Fixes

- Capacity report in Planner now shows hours planned on non-working days correctly.

Upgrading [Tempo Planner](#)⁸⁷⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁷¹ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)⁸⁷², and bundled with the following Tempo System Plugins:

2018-02-08 | Tempo Planner for Server 4.6 Release

Tempo Planner 4.6 adds team role as a custom field.

- **New Features**

- Team role has been added as a custom field. You can define a team role and include it in your issues.

- **Fixes**

- The issue summary is now aligned properly when planning on projects.
- The quarterly view in the Capacity report is now showing the quarters labeled correctly.

Upgrading [Tempo Planner](#)⁸⁷³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁷⁴ (UPM).

2018-01-17 | Tempo Planner for Server 4.5 Release

Tempo Planner 4.5 fixes a bug where customers with a MySQL database could not delete plans, amongst other changes.

- **Database changes**
 - Upgraded task to save inherit values. The inheritance was implicit before.
- **Improvements**
 - Inherit value is saved explicitly when an issue inherits a Team from a parent issue or Epic. The release includes an upgrade task to save inherit values where before the inheritance was implicit.
- **Fixes**
 - Customers with MySQL database can not delete plans - Fixed.

Upgrading [Tempo Planner](#)⁸⁷⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁸⁸⁰ (UPM).

2023-09-19| Tempo Budgets 16.9.0 Release

This **version 16.9.0 of Tempo Budgets** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes.

FIXES

- Fixed: Custom staff members with names that include special characters do not appear in the Folio Workload report.
- Fixed: The Log Time button remains visible in the Tempo panel for a Jira issue, even when the workload editable property is set to false.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁹³⁰ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading Tempo Budgets is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁹³¹ (UPM).

2022-09-13| Tempo Budgets for Server 15.11.0 Release

This **version 15.11.0 of Tempo Budgets** is compatible with **Atlassian's Jira 9.x** platform. This version contains fixes and improvements.

FIXES

- All team members are to be added if any error occurs during team synchronization, even when a team member is already a staff member.
- Fixed an error where Account Report failed to be generated when an invalid logo was set in PDF Configuration.
- Incorrect folio is displayed in the expanded section of **Distribution of Total Planned Costs** chart.
- Wrong format of date picker custom field in **Revenue** history's tooltip.

IMPROVEMENTS

- Improved the results retrieved when the **Display Archived Portfolios** check box is selected.
- Improved the misaligned form fields in **Settings > Periods > Period Configuration** page.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)⁹⁸³ to find a list of features that we are planning to deprecate and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Budgets](#)⁹⁸⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)⁹⁸⁵ (UPM).

2021-12-07 | Tempo Budgets for Server 15.2.0 Release

We've released **version 15.2.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

FIXES

- Fixed: An incorrect number of story points is shown in Folio Overview.
- Fixed: The value of billed hours is not properly synchronized with Folio when the "Synchronize with the Tempo billed hours" setting is enabled, it yields 0 value in Revenue section.
- Fixed: The wrong data format is used when a date field is exported from Folio custom fields.

IMPROVEMENT

- A new public API function is created to retrieve Folio's expense report data.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰³⁹ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Budgets](#)¹⁰⁴⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁰⁴¹ (UPM).

2021-11-09 | Tempo Budgets for Server 15.1.0 Release

We've released **version 15.1.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform.

FIXES

- Fixed: Updating and refreshing the page doesn't affect the billable hours.
- Fixed: Retrieving labels from issues and assign to planned cost automatically when this cost was created by **Plan from staff > Based on Staff Members Planned Effort** in folio Costs tab
- Fixed: Not showing the billable hours after the folio had data refreshed.

IMPROVEMENTS

- Created filters for Start Date and End Date for retrieving payments.
- Added pagination for the endpoints.
- Async event dispatched when the team is changed to improve performance at folio level
- Optimizing performance for getting positions to increase the overall performance at folio level.
- Created two new endpoints - For retrieving position data and retrieving expenses data.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁴⁷ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Budgets](#)¹⁰⁴⁸ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁰⁴⁹ (UPM).

2021-10-12 | Tempo Budgets for Server 15.0.0 Release

We've released **version 15.0.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

Note that we have synchronized the version numbers of our products and restarted them at version 15.0.0 in this release. Tempo Budgets moved from version 14.9.2 to 15.0.0 to comply with the updated numbering sequence.

FIXES

- Fixed: Unable to remove the link of duplicated members from a team.

IMPROVEMENTS

- Improved performance: For Folios with Active EVM that takes too long to load.
- Improved performance: For the class used in staff summary tab and revenue summary tab in Folio.
- Improved performance: For retrieving worklogs when there's no cache in Folio.
- Improved performance: For the revenue summary tab in Folio.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁶⁰ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

Upgrading [Tempo Budgets](#)¹⁰⁶¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁰⁶² (UPM).

2021-09-14 | Tempo Budgets for Server 14.9.0 Release

We've released **version 14.9.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

IMPROVEMENTS

- The Actualize data button is replaced by the new Refresh Current Portfolio button to refresh the cache asynchronously.
- The Folio Overview tab has now improved performance.
- The staff section in Folio Overview and Staff Summary in Staff tab has improved performance.
- A validation check is now added to detect if a Folio is associated to an empty Jira filter. A message prompts the user to change the invalid filter.
- The Staff page for Portfolio Staff now loads faster with improved performance.
- The Staff Members page now loads faster with an added button to show/hide progress bar for Folio and Portfolio.
- The Portfolio data is now cached asynchronously to improve performance.
- A new scheduled job updates all active Folio matrices every day the server starts in an effort to improve performance.

FIXES

- Fixed: Improved cache processing when retrieving Folio overview data.
- Fixed: The decimal delimiter in Staff Availability is allowed in a language that uses comma.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁷¹ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-09-09 | Tempo Budgets for Server 14.8.1 Release

We've released **version 14.8.1 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This hotfix corrects an error with wrong username appearing in Budgets reports.

HOTFIX

- Fixed: The wrong username appears as JIRAUSERXXX in Budgets reports and where a Jira username is deleted.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁷⁶ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-08-10 | Tempo Budgets for Server 14.8.0 Release

We've released **version 14.8.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes and improvements.

IMPROVEMENTS

- The 'Distribution of Total Planned Revenue' and the 'Distribution of Revenue to Date' sections now show 'No items to display' message when there's nothing to render.
- The 'Distribution of Total Planned Costs' and the 'Distribution of Costs to Date' sections now show 'No items to display' message when there's nothing to render.
- Users can now pin Folio and Portfolio sections to open by default on page load.
- All sections in the Revenue tab and the Cost tab are now collapsed to improve performance.
- The Finance and Roadmap sections now display 'No items to display' message when Portfolio has no Folios to render.
- The Staff member page now loads faster. Users can click on the Staff member names to access their details.

FIXES

- Fixed: The 'Show Timeline' button in Folio and Portfolio does not work properly.
- Fixed: The 'Today' label in the Folio Overview page that is visible in the IE browser is now visible in all other browsers.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁸⁰ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-06-15 | Tempo Budgets for Server 14.6.0 Release

We've released **version 14.6.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Improved performance for Staff Planning page in order to prevent crashing when scrolling down a large list with a large number of users.
- Fixed: Improved user selection method in an effort to limit the number of returned users from Jira. Fetching a large number of users is causing an Out-Of-memory error.
- Fixed: When planning five years ahead from now, show an alert error to users instead of a blank screen.
- Fixed: Unable to plan a resource for a single day only.

Tempo continually reviews its code to evaluate what is needed and ensure we provide our customers with the best and most up-to-date software releases possible. **Please see our [Code Deprecation and Removal page](#)¹⁰⁸⁸ to find a list of the code that has been deprecated and determine whether it will have an impact on your integration points with Tempo.** The deprecated code will be removed in our October release.

2021-01-19 | Tempo Budgets for Server 14.0 Release

We've released **version 14.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. **This includes changes to the Jira SPI and Jira REST API.**

This latest major version of Tempo Timesheets features changes to the **Jira SPI and Jira REST API**. This results in the Tempo Team custom field being returned as an object rather than as a string and also makes it possible to update the Jira SPI with an object. While it is still possible to use the existing Jira REST API endpoints to update the team custom field with name or ID, it is no longer possible to use the Jira SPI to do so.

The goal in making these changes is to give you more flexibility when integrating with the Tempo Team custom field through the Jira SPI and API interfaces, and to allow those of you who use these interfaces to simplify your third party integrations. These changes will return a Team object that includes both the team name and the team ID (instead of just the team ID), which will allow you to access more information when you use the Jira SPI and REST API interfaces.

Please note that these changes may have an impact on third party apps and integrations within your organization. We recommend that you confirm that your critical third party apps are compatible with this change before upgrading.

You can find more technical information about these changes [here](#)¹¹¹⁵. We have also compiled information to help you understand how to update the [team custom field in ScriptRunner scripts](#)¹¹¹⁶.

IMPROVEMENTS

- Tempo Team custom field is now returned as an object (rather than a string) that includes both the team name and the team ID.
- CSV exports of Jira issue data now include team name instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira.
- Deprecation warning: Private endpoint `rest/tempo-core/1/users/search` is being deprecated and slated for removal

2020-12-07 | Tempo Budgets for Server 13.18.6 Release

We've released **version 13.18.6 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Folio and portfolio page shows null if the associated Jira filter is missing.

How to move to this version

If you had previously upgraded to Tempo Budgets 13.19.x or 13.20.x and would like to install version 13.18.6, please follow [these instructions](#)¹¹³².

Upgrading [Tempo Budgets](#)¹¹³³ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹¹³⁴ (UPM).

2020-11-17 | Tempo Budgets for Server 13.18.5 Release

We've released **version 13.18.5 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This version contains fixes but no new features.

FIXES

- Fixed: Plans created in Tempo Budgets are synched properly with Tempo Planner.
- Fixed: User's cost rates outside of the Folio's timeframe incorrectly accounted for calculating a flattened rate when planning human resource costs from staff planned time.

How to move to this version

If you had previously upgraded to Tempo Budgets 13.19.x or 13.20.x and would like to install version 13.18.5, please follow [these instructions](#)¹¹³⁶.

Upgrading [Tempo Budgets](#)¹¹³⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹¹³⁸ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)¹¹³⁹.

2020-10-19 | Tempo Budgets for Server 13.18.4 Release

We've released **version 13.18.4 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. Tempo Administrators and Tempo Team Administrators can now filter users by their Jira status (active, inactive or all) in the Manage Staff page in Settings.

IMPROVEMENTS

- Tempo Administrators and Tempo Team Administrators can now sort users by their Jira status (active, inactive or all) in the Manage Staff page in Settings.
- We have made improvements to make the Customer browser much faster when loading a large number of Tempo Customers. We've also aligned the Customer browser with the overall look and feel of Tempo, added filtering capabilities and improved its error handling.

FIXES

- Fixed: Adjusted staff member overhead percent calculation to ensure it is the same in both portfolio and folio.
- Fixed: Renamed "Approve" to "Set baseline" in Costs and Revenue tabs.
- Fixed: Made folio overview tab (from portfolio overview gadget) responsive to browsers.
- Fixed: "Actions" button on Manage Staff page in Settings is now visible after you have selected a user.
- Fixed: Jira groups are not shown as members of team in permissions page.
- Fixed: Corrected text and removed double quotes from the French translation for Créer l'équipe on the Teams page.
- Fixed: Fixed upgrade task 18 in Teams for users who had experienced failure previously.

How to move to this version

If you had previously upgraded to Tempo Budgets 13.19.x or 13.20.x and would like to install version 13.18.4, please follow [these instructions](#)¹¹⁴⁰.

1140. <https://tempo-io.atlassian.net/wiki/spaces/KB/pages/1371832322/>

	Upgrading Tempo Budgets ¹¹⁴¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹¹⁴² (UPM).

2020-09-24 | Tempo Budgets for Server 13.20.1 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the features described below have been included in the version [13.18.4 release](#) (see page 549). You can find more information [here](#)¹¹⁴⁴.

We've released **version 13.20.1 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. This hotfix corrects an error when reindexing issues with the team custom field.

- **HOTFIX**

- Bug fixed: Error when reindexing issues with the team custom field.

Starting with Tempo 13.19.0, CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV from Tempo's Logged Time report as well as data exported to CSV directly from Jira. In addition, **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)¹¹⁴⁵.

Upgrading [Tempo Budgets](#)¹¹⁴⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹¹⁴⁷ (UPM).

2020-09-07 | Tempo Budgets for Server 13.19.0 Release

Version No Longer Available

Please note that this version is no longer publicly available due to unforeseen impacts on third party apps and integrations. However, the fixes described below have been included in the version [13.18.4 release](#) (see page 549). You can find more information [here](#)¹¹⁵⁴.

We've released **version 13.19.0 of Tempo Budgets for Server** which is compatible with **Atlassian's Jira 8.x** platform. Customers exporting Jira issue data to CSV will now see team name (instead of team ID) in the Team field. TeamCustomField now returns a Team object instead of a string. **The latter change may require updates to your third party apps or integrations.**

• Improvements

- CSV exports of Jira issue data now include **team name** instead of team ID in the Team field. This applies to data exported to CSV directly from Jira.
- **TeamCustomField now returns a Team object** instead of a string. **Please note that you may need to update your third party apps or integrations due to this change.** You can find more information [here](#)¹¹⁵⁵.

• Fixes

- Fixed: MsSql and Oracle database users were not seeing all teams in the teams overview page.

Upgrading [Tempo Budgets](#)¹¹⁵⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹¹⁵⁷ (UPM).

2020-05-12 | Tempo Budgets for Server 13.16.0 Release

We've released **version 13.16.0 of Tempo Budgets** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces the new Tempo look. We've also fixed issues with the Profitability report and financial charts.

• New Features

- We're excited to launch the newest iteration of the Tempo brand to our Server and Data Center customers. This includes our updated Tempo logo as well as a newly designed Tempo sidebar. These changes are part of a larger rebranding effort that we have recently implemented across the company. To make the best use of screen real estate for the content that matters most, you can now unpin the sidebar and have it show up as a hamburger menu in the upper-left corner. Read more here: [Tempo is Getting a New Look](#)¹¹⁸⁹.

• Fixes

- Fixed: Numbers not showing in the Profitability report.
- Fixed: Financial charts showing broken or inconsistent lines when Folios are expired or closed.

Upgrading [Tempo Budgets](#)¹¹⁹⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹¹⁹¹ (UPM).

2020-04-14 | Tempo Budgets for Server 13.15.0 Release

We've released **version 13.15.0 of Tempo Budgets** which is compatible with **Atlassian's Jira 8.x** platform. In this release we've fixed permission errors and an issue with the Account search.

• Fixes

- Fixed: "Logged In" filter share type is displayed as private in folio permissions configuration.
- Fixed: Folio's permission is overwritten when other users refresh the data. The fix removes visibility of folios from explicitly defined Viewers and Administrators if these users cannot see the associated filter.
- Fixed: A bug where Account search was broken, for example in project settings/accounts.

	Upgrading Tempo Budgets ¹¹⁹⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹²⁰⁰ (UPM).
	This release is compatible with products listed in the Compatibility Page¹²⁰¹, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Core 6.15.0 • Tempo Accounts 6.15.0 Plan Core 6.15.0 • Tempo Teams 6.15.0 • Tempo Planning API 6.15.0

2020-02-11 | Tempo Budgets for Server 13.12.0 Release

We've released **version 13.12.0 of Tempo Budgets** which is compatible with **Atlassian's Jira 8.x** platform. This release introduces Location in the Manage Staff tool. We've also aligned with Atlassian to comply with GDPR standards.

• New Features

- Easily update and manage the Location of your staff.
Tempo is pleased to introduce Location into the Manage Staff tool. This update will allow you to create locations and assign them to your staff members, as well as filter by location inside of Manage Staff. Check out our user documentation for more information about [Locations](#)¹²²⁰.

• Aligning with Atlassian to comply with GDPR standards

In line with Atlassian's changes towards GDPR compliance, Jira Administrators will now have the ability to **anonymize a range of personal information for existing users**. This will allow you to do the following:

- Change user keys and usernames of existing users.
- Anonymize user profiles.
- Delete or anonymize personal information that appears in Jira.

For more information about Atlassian's GDPR changes, see <https://confluence.atlassian.com/adminjiraserver/anonymizing-users-992677655.html>

Upgrading **Tempo Budgets**¹²²¹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**¹²²² (UPM).

2019-09-12 | Tempo Budgets for Server 13.7.0 Release

We've released **version 13.7.0 of Tempo Budgets** where we introduce a new feature that allows you to easily update staff workload and holidays.

• New Features

- Easily update staff workload and holidays

Tempo is pleased to introduce Manage Staff, a tool that lets users with the *Tempo Team Administrator* permission easily change the workload and holiday schemes of many Jira users simultaneously. With the Manage Staff tool team administrators also get a good overview of their staff as they can look up staff members based on team memberships and roles, Jira groups, as well as workload- and holiday schemes. Customers using Tempo Staff ID are able to search and view staff by ID of their employees.

For more information about how to use Manage Staff, see our [user documentation](#)¹²⁶⁶.

• Fixes

- Fixed: It was not possible to add users to a team when the team's visibility had been changed. We've fixed the "Team Visibility" modal to support adding groups.

Upgrading [Tempo Budgets](#)¹²⁶⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹²⁶⁸ (UPM).

2019-03-14 | Tempo Budgets for Server 13.1.0 Release

- Compatible with Atlassian's **Jira 8.x** platform. Tempo Account Administrators can now add or edit the Expense (and Revenue) Categories in Tempo Settings. We've also updated the Tempo permission description and fixed an issue where the drop-down menu was not accessible for planned items in Budgets planner.

• Improvements

- Expense and Revenue type in Tempo Budgets Folios, are now part of a predefined list of Expenses and Revenue Categories. Tempo Account Administrators can add to or edit the list of Expense (and Revenue) Categories in Tempo Settings. This ensures consistency and data integrity.
Note that your existing Expense and Revenue types will be migrated to the Expense (and Revenue) Categories list.
- We've updated the Tempo permission description on the Permission Overview page. It now reads: "Grant or deny access to Tempo Budgets to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."

• Fixes

- Fixed: Drop-down menu not accessible for planned items in Budgets planner.

Upgrading **Tempo Budgets**¹³⁰⁴ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**¹³⁰⁵ (UPM).

2019-02-14 | Tempo Budgets for Server 12.3.0 Release

- **Tempo Budgets 12.3.0** is compatible with Atlassian's **Jira 7.x** platform. In this release we've added list management for Expense types.

Tempo Budgets 12.3.0 supports **Jira 7.x**. Note that Tempo Budgets 12.3.0 is not compatible with Jira 8.0 so please take care when selecting your installation versions from the Atlassian Marketplace.

- **Improvements**

- Expense and Revenue type, in Tempo Budgets Folios, are now part of a pre-defined list of Expense and Revenue Categories. Tempo Account Administrators can add to or edit the list of Expense (and Revenue) Categories in Tempo Settings. This ensures consistency and data integrity.

Note that your existing Expense and Revenue types will be migrated to the Expense (and Revenue) Categories list.

- We've updated the Tempo permission description on the Permission Overview page. It now reads: "Grant or deny access to Tempo Budgets to specific groups in your organization, or to external Jira users with permission to view your Jira issues. All users in your organization are granted access by default."

Upgrading **Tempo Budgets**¹³⁰⁷ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**¹³⁰⁸ (UPM).

2019-02-14 | Tempo Budgets for Server 13.0.0 Release Notes

- We've released **version 13 of Tempo Budgets** which is compatible with Atlassian's **Jira 8.0**. Tempo Budgets 13.0.0 is not backward compatible with the Jira 7.x platform.

- As announced earlier ([view announcement](#)¹³¹⁰), Tempo Budgets 13.0.0 supports Jira 8.0. Note that Tempo Budgets 13.0.0 is not backward compatible with the Jira 7.x platform. If you upgrade to Jira 8, you will need to upgrade to Tempo Budgets 13.0.0. Make sure to check out [these instructions](#)¹³¹¹ before upgrading the Tempo apps.

	Upgrading Tempo Budgets¹³¹² is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager¹³¹³ (UPM).

2018-11-29 | Tempo Budgets for Server 12.0.0 Release

- In **Tempo Budgets for Server 12.0.0** we've improved the navigation by introducing the Tempo sidebar and we've also started moving Tempo configuration to a dedicated Tempo Settings page.

Note

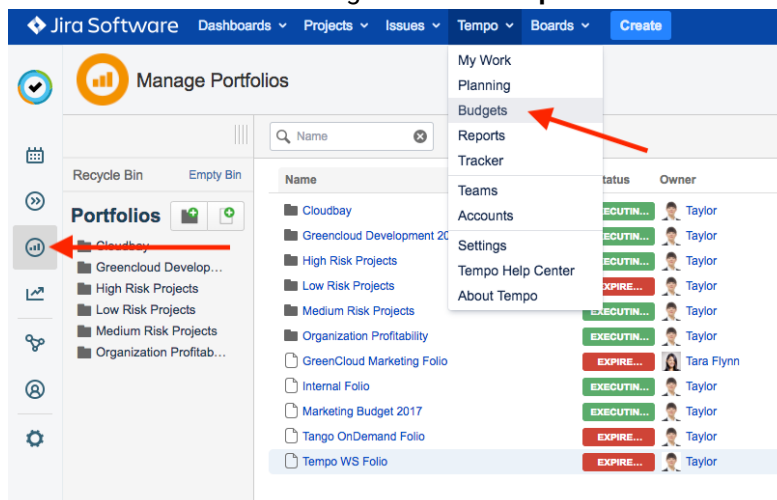

Tempo Budgets 12.0.0 is compatible with Tempo Timesheets 9.0.0 and Tempo Planner 6.0.0. Earlier versions of Timesheets and Planner are NOT compatible with Tempo Budgets 12.0.0

At the bottom of the release notes you can view a detailed description of the changes occurring in Tempo Budgets 12.0.0, see [Changes in Tempo Budgets 12.0.0 \(see page 616\)](#).

• New Features

- We've made navigation improvements by introducing the Tempo sidebar and simplifying the Tempo drop-down menu to make it easier for users to find what they're looking for. Now Tempo users have single click access to Tempo core features from everywhere in the product. This change also improves the performance of the UI. Your folios and portfolios can now be found under Budgets on the **Tempo** menu or in the **Tempo sidebar**.

- We've also started to move Tempo configuration to a dedicated Tempo Settings page, making them more accessible to the people that need them. Budget users can now manage Team and Account configurations, as well as issue Expense categories from Tempo Settings, accessible via the new Tempo sidebar navigation.

Changes in Tempo Budgets 12.0.0

Teams

- **Teams Browser:** We have added a **create another** option to the Create Team dialog box to help creating many teams in succession.
- **Team Overview:**
 - The Team overview page design has been improved and consolidated to a single page, where users can view all attributes of the teams and make configuration changes. The permission configuration page is still a separate page and is accessed via the cogwheel in the page header.
 - Workload and holiday schemes are no longer available through the Team page. Instead, users can view and manage these settings through Tempo settings.
 - Deactivation of team memberships is not supported. A membership can be deleted when it is no longer relevant/required.
 - Creating multiple memberships for the same user in a single team is not supported.
 - Creating placeholder memberships for non-Jira users is no longer supported. NOTE: anonymous members that were added to Tempo Teams before upgrading to Tempo Budgets 12.0.0, will still exist as team members of those teams.
- **Creating Teams:** We have added a “create another” option to the create Team dialog to help creating many teams in succession.

Accounts

- **Accounts Browser**
 - Accounts settings previously accessible via the Manage drop-down in the Accounts Browser, are now accessible via Tempo Settings in the Tempo sidebar. This includes Account Categories, Import / Export Accounts and Price Tables.
 - Predefined search filters are no longer available in the Accounts browser.
- **Account Overview**
 - The Accounts overview page design has been improved and consolidated to a single page, where users can view all attributes of the accounts and make configuration changes.
 - Teams linked to same projects as an Account are no longer displayed in the Accounts overview page.
- **Creating Accounts**
 - Users can now link project to Accounts directly in the Create Account dialog box.

- We have added a “create another” option to the Create Account dialog box to help creating many accounts in succession.
- Creating Customers and Categories on the fly is no longer supported. Users can only select from already existing Customers and Categories. Customers can be created in the Customers browser. Account Categories can be created in Tempo Settings.

Tempo Settings

A number of Tempo settings previously accessible through the Jira Administration page or the Teams

or Accounts Browsers, have been moved to the Tempo Settings accessible on the **Tempo sidebar**.

- **Configuration**
 - **Permission Overview** provides an overview of how permissions are used in Tempo.
- **Working Days**
 - **Workload** and **Holiday** schemes. We’ve added the functionality to search for scheme members to make changes to scheme memberships easier.
 - Users with the Tempo Team Administrator permission can now view and edit Tempo Working Days.
- **Teams**
 - **Team Roles**
- **Accounts**
 - **Import / Export** Accounts. This was previously accessed through the Accounts Browser.
 - **Account Categories**. This was previously accessed through the Accounts Browser.

2018-10-11 | Tempo Budgets for Server 11.14.0 Release

In **Tempo Budgets 11.14.0** the Budgets user permissions are migrated to the Tempo Budgets Access global permissions. In this build we've also fixed an issue with Tempo Budget API calls.

• Improvements

- User groups that have been granted the Budgets user permission will be migrated to the Tempo Budgets Access global permission with basic access. [Budgets Super Admins](#)¹³³³ will need to be given the Tempo Budgets Access permission manually by a Jira admin. They will not be able to access Budgets until they get this permission ([view announcement](#)¹³³⁴).

• Fixes

- Fixed: Duplicate attribute returned on some Tempo Budget API calls.

Upgrading [Tempo Budgets](#)¹³³⁵ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹³³⁶ (UPM).

This release is compatible with products listed in the [Compatibility Page](#)¹³³⁷, and bundled with the following Tempo System Plugins:

2018-09-13 | Tempo Budgets for Server 11.13 Release

This release includes a fix for Tempo Budgets that reduces reindexing on the USER_INDEX table.

• Fixes

- Fixed: AO_2D3BEA_USER_INDEX table is cleared and repopulated every time a node is restarted. Now we do not re-index users on plugin install when less than 30 minutes have passed since the last index was run.

Upgrading [Tempo Budgets](#)¹³³⁸ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹³³⁹ (UPM).

2018-08-31 | Tempo Budgets for Server 11.12.2 Release

Tempo Budgets 11.12.2 is now compatible with Jira for Data Center.

-
- **New Features**
 - Tempo Budgets is now compatible with Jira for Data Center.

2018-08-30 | Tempo Budgets for Server 11.12.1 Release

- With this release, **Tempo Budgets** admins can now add and manage custom currencies for use in folios and expenses. Also, issue expenses and price tables can use custom currencies, and changes made when adding or updating custom currencies are now recorded for auditing purposes.

• New Features and Improvements

- Tempo Budgets admins can now add and manage custom currencies for use in folios and expenses.
- Issue expenses and price tables can use custom currencies
- Changes made when adding or updating currencies are now recorded in the Configuration > History page for auditing purposes.
- Administrator can manage the list of currencies that are available in Tempo Budgets.

• Bug fixes

- When you type a name that does not exist in the Team field in the Issue view or Edit issue view, the name you typed is now saved in the Team Field.
- Fixed an issue where the Team field in the Issue view was not displayed when "Anyone" viewed the issue (a user that is not logged in but has the *Browse Project* permission).
- All folios in portfolio are now displayed under the Distribution of cost to date.
- User cost rates are now used based on the date they become effective.
- Fixed a link to permissions in global configuration for Budgets.
- Fixed an inconsistency in the description text when planning from staff using assigned issues in Budgets.

Upgrading to **Tempo Budgets**¹³⁴¹ 11.12.1 is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**¹³⁴² (UPM).

2018-03-08 | Tempo Budgets for Server 11.8 Release

With this release, users can now add Budgets reports as gadgets, and may also create dynamic portfolios. This release also includes a number of bug fixes.

New Features

- Users can now add Budgets reports as gadgets. There are two types of report gadgets, one for folios and the other for portfolios. In each gadget, users can select between the Forecast Report, Earned Value Report, Planned Variance, Profitability Report and the Budget vs. Actual Report.
- When creating dynamic portfolios, you may now select one or two folio fields as criteria to create a dynamic portfolio. Folios that match the requirements of **both** Folio fields will be included in the dynamic portfolio.

Bug fixes

- When you add a Budgets "Folio Overview Gadget" to Confluence, it displays correctly.
- Now the account work attribute on the worklog is respected when you are splitting up actual work in a Folio between Capitalized and Operational.

	Upgrading Tempo Budgets ¹³⁵⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹³⁵⁷ (UPM).
	This release is compatible with products listed in the Compatibility Page¹³⁵⁸, and bundled with the following Tempo System Plugins: Click here to view plugins bundled with this release... • Tempo Accounts 3.7.0 • Tempo Core 4.8.0 • Tempo Planning API 3.13.0 • Tempo Teams 3.7.0

2018-02-08 | Tempo Budgets for Server 11.7 Release

With this release, team role has been added as a custom field, you can now use the global settings to set the fiscal year, expenses added to issues can now be deleted from budgets, and forecast charts can now be displayed as reports with parameters. The release also includes a number of bugfixes.

New Features

- Team role has been [added as a custom field](#)¹³⁵⁹. You can define a team role and include it in your issues.
- You can now use the [Global Settings](#)¹³⁶⁰ to set the Fiscal year. Once set, you then have the option to view your report data segmented by Fiscal year.
- Expenses added to issues can be [deleted from Budgets](#)¹³⁶¹.
- Forecast charts can now be [displayed as reports with parameters](#)¹³⁶².

Improvements

- Users can now base the completion ratio on a fixed number of hours worked. When using this option, all hours logged on issues within a folio's scope will be taken into account when calculating the completion ratio.
- Added support for the official currency of Mongolia, the Tughrik.

Bug fixes

- Fixed an issue that affected a limited number of customers when updating budgets.

2018-01-11 | Tempo Budgets for Server 11.6 Release

This release includes changes to the database, as well as improvements that allow users to save the inherit value explicitly when an issue inherits a team from a parent issue or epic. Also, reports can be split per fiscal year.

Database changes

- Upgrade task to save inherit values where before the inheritance was implicit.

Improvements

- Inherit value is saved explicitly when an issue inherits a [Team from a parent issue or Epic](#)¹³⁶⁶. The release includes an upgrade task to save inherit values where before the inheritance was implicit.

Story

- Links worked hours showing in the Worklog inspector to the corresponding report in Timesheets.
- Allows for splitting reports per fiscal year.

Bug fixes

- When a folio is based on account(s), the Staff Workload report cannot be filtered using labels - Fixed.

2017-11-13 | Tempo Budgets for Server 11.5 Release

With this release for Tempo Budgets for Server, we've created a set of new events that can be triggered by creating, updating, or deleting Tempo budgets domain objects. There are also some fixes and improvements for Budgets in this release.

Story

- Trigger events on create-update-delete on main Tempo Budgets domain objects
- As a project manager, I would like to quickly see a list of issues and logged hours from worked hours in the staff screen

Improvements

- Make issue cost report support large scopes

Bug fixes

- When planned human resource cost rate is zeroed out, planned hours for the resource shows 0
- "w" shortcut in results in dead link from Staff Member page

	Upgrading Tempo Budgets ¹³⁷⁰ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA Universal Plugin Manager ¹³⁷¹ (UPM).

2017-09-18 | Tempo Budgets for Server 11.3 Release

This release includes improvements that add the remaining budget to costs and revenue summary and display the **Estimate at completion (known)** in cost and revenue summaries.

Improvements

- Add remaining budget to costs and revenue summary
- Display Estimate at completion (Known) in cost and revenue summaries

Bug fixes

- Baseline viewing mode in planned expenditures is forgotten if user logs out and closes browser
- No default price table found prevents displaying global accounting config
- Two users with the same display name cannot be picked with user pickers
- Incoherent data between actual costs and staff tabs when overriding a monthly period with 0 hour
- Server error occurs when editing cost rate of a planned human resources starting in the future
- Broken link in Create new Folio with Custom JQL

2017-01-27 | Tempo Budgets for Server 11.1 Release

We're proud to unveil Tempo Budgets 11.1. This version offers you an enterprise-grade portfolio overview with enhanced search performance, advanced filtering capabilities, and customizable columns. This release also has a tighter integration with [Tempo Timesheets](#)¹³⁹⁶ components, which provides more automation when tracking costs and revenues.

• Improvements

- The search performance of the budgets overview has been improved by a factor of 30.
- The filter function has undergone a major upgrade - to work much like your usual filters in Jira. You can now build advanced filters that use multiple fields at the same time.
- It is now possible to create custom fields to define for your folios. These custom fields can be added to the overview - as columns - and they can be used in your filters as well.
- There is now a tighter integration between [Tempo Timesheets for Server](#)¹³⁹⁷ and [Tempo Budgets for Server](#)¹³⁹⁸.
 - Tempo Budgets now pulls the fixed expenses reported in issues associated with your folio directly in the actual costs of that folio
 - A price table can now be linked to a folio to have automatic access to accurate rates when you report revenue

Upgrading [Tempo Budgets](#)¹³⁹⁹ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA [Universal Plugin Manager](#)¹⁴⁰⁰ (UPM).

2016-10-05 | Tempo Budgets for Server 11.0 Release

Tempo Budgets 11 redesigns the folio and portfolio overviews in order to make them easier to understand and digest. We've also new summaries of staff, costs, and revenues, and customizable dashboards with folio and portfolio gadgets. Finally, Tempo Budgets now allows you to reschedule your existing folios. This release includes a number of improvements to existing features, and bug-fixes.

• Improvements

- We now show the folio's name first on browser tab title.
- We have added a tip explaining Remaining Estimates vs Planned Time in staff summary charts.
- We have improved empty states in the Manage Portfolios screen.
- We have inverted the 2 first steps of the create folio wizard: the scope step is much more meaningful to a beginner.
- We have clarified the two main buttons in the planned costs empty state screen.
- We have changed the "position" term to human resource to clarify its meaning.
- We have added tips on the « Add portfolio » and « Add folio » buttons in Manage Portfolios.
- We have added Profit Margin % in Folio summary.
- We have added attachments in the pop up screen.

• Fixes

- Fixed a problem where users were unable to inline edit expense or position custom field value.
- Fixed a problem where there was a missing custom field values when fetching expenditures from the REST API.

Upgrading **Tempo Budgets**¹⁴⁰⁶ is free for all customers with an active Tempo license. Upgrade Tempo by using the JIRA **Universal Plugin Manager**¹⁴⁰⁷ (UPM).
